INTRODUCTION

The Land Law Program, currently being implemented by the Direcção de Terras e Propriedades, the Universidade Nacional de Timor Lorosa’e and the technical team of ARD Inc, seek to facilitate rigorous research on land issues that will be presented to the Ministry of Justice and the government to serve as the basis of future policy options and legislative drafting of land laws.

In doing so, it is necessary to support all participants of the project in the usage of these legal and technical terms. Consequently, we are engaged in developing a working document called the Land Glossary. This document attempts to clarify concepts of legal and technical land terminology in Tetum and its equivalents in Portuguese, English and Indonesian.

This glossary has been developed as part of a capacity-building exercise. Therefore, it will be revised and expanded in the future. We welcome suggestions, comments and corrections.

When translating the terms to Tetum, several issues arose. Timor-Leste has several varieties of Tetum. The approach adopted in the development of the glossary was to choose Tetum Praça because it is considered to be the most widely spoken dialect in the country. Jeffrey Hull states: “In fully creolized form, known as Tetum-Praça or Tetum-Dili, it is the first Language of most of the 110.000 inhabitants of the Capital, Dili, and the common vernacular of the entire indigenous population of the territory, which numbers today some 750.000. For most East Timorese Tetum Praça, the Liturgical medium of the East Timorese Catholic Church is thus a second language, and as such, is constantly expanding its resources”.

Note: The definitions quoted in this working document come from various sources. English, Portuguese, Indonesian and Tetum dictionaries, as referenced the bibliography, provided definitions, in some cases, in others, the ARD translations team translated those definitions to the other languages. Finally, the team also developed its own definitions as indicated.
