## Preface

We are pleased to present External Trade Statistics 2020, the seventh official publication of annual trade statistics for Timor-Leste. The statistics contained in this report show the patterns of international trade relating to Timor-Leste during the 2020 calendar year. Additionally, the report provides comparative annual data for 2016 to 2020

This publication provides the trade statistics required for government, the donor community, NGOs, universities, research organizations and the private sector. This report is produced annually, along with the regular monthly trade data releases that began in January 2004.

In addition to this publication the DGE has now established a comprehensive Trade statistics database. On request, this database can provide detailed statistical data that is presented in this annual publication.

External Trade Statistics are compiled from declaration made to the Timor-Leste Customs Service by importers and exporters, or their agents. We would like to express our thanks for the cooperation of the Customs Service in providing the base data used to compile this publication.

This publication is a result of a team at DGE Trade Statistics Section, composed of Mr. Eduardo Martinho Ximenes, Mr. Martinho Celcius Yeros, Ms. Laura de Jesus Moreira under the Director of the National Directorate of Economic and Social Statistics, Mr. Cristino Gusmão, SE, M.ec.Dev..

The GDS kindly advise users to read the concepts and definitions in the initial section of this report to fully understand the statistical data presented.

The GDS would welcome any comment from users of this publication for improving the future Trade statistics releases.

Elias dos Santos Ferreira, L.Ec. MM  
General Director of Statistics

## Introduction

With the publication of this annual Trade Statistics report the DIRECÇÃO GERAL DE ESTATÍSTICA provides the latest available data on imports and exports for Timor-Leste during the 2020 calendar year. As a "stand alone" indicator, Trade statistics form a valuable source of information on the economic health of a country, as well as being used by wide variety of planning and business organization. Statistics on imports and exports form a valuable component of a country's statement of economic transaction in the National Accounts and Balance of Payments. Accordingly, internationally comparable Trade Statistics that are accurate, detailed and timely have always been a statistical priority. Such information is vitally important for the planning and future development of Timor-Leste.

The information contained in this report aggregates the regular monthly releases of Trade Statistics issued by the Directorate during 2020. Additionally, there are tables whose aim is to provide a more comprehensive picture of trading partners than is possible from viewing a single month's data. As the Trade Statistics database grows it is now possible to present comparative annual data.

The Statistical methods and concepts used to compile data for this report closely follow the recommendation of UN publication "International Merchandise Trade Statistics: Concepts and Definitions (IMTS), Rev.2" wherever possible. The objective of External Trade Statistics, 2020 is to provide an aggregate view of import and export statistics for the 2020 calendar year, accepting the fact that more detailed analysis of specific commodities is available by contacting the DIRECÇÃO GERAL DE ESTATÍSTICA

## Concepts, Definitions and Explanation of data

The following section aims to provide additional information on the methods used to collect and analyze the Trade Statistics contained in this report. As already mentioned, these trade statistics are compiled using the UN "International Merchandise Trade Statistic: Concepts and Definitions (IMTS, Rev.2)" as a guide and quotations from that publication are included here.

### Source of Data

Data is obtained from imports and exports documents lodged with the Customs Service of Timor-Leste. This data is then processed by the National Statistics Directorate to produce external Trade Statistics that conform to United Nations statistical concept.

The ASYCUDA (Automated System for customs Data) system became operational in the Timor-Leste Customs Services in October 2003. This system provides the basic data from which external trade statistics are prepared. Currently this system provides coverage of all imports and exports from the main airport and seaports plus parcel post. Some documentation from "small" ports is also processed at the Dili customs Office, however it should be noted that approximately 4% of entries (those not lodged electronically via ASYCUDA), may not be included in the Trade Statistics.

### Time of recording

Imports and Exports Statistics are compiled by Date of Assessment. This is the date on which the duty to be paid (if any) is assessed by the Customs Services, in effect "clearing" the goods for import/export.

### System of Recording

External Trade Statistics are compiled in close accordance with the United Nations International Merchandise Trade Statistic Concepts and Definitions. The system is known as the "general" system of recording trade statistic as defined in UN statistic papers M52. Under this system, imports include all goods entering the economic territory of a compiling country and export includes all goods leaving the economic territory of a compiling country. The "economic

### Merchandise Trade

Merchandise Trade is the import or export of goods that alter the nation's stock of material resources as a result of their movement in or out of the country.

### BEC

The original Classification by Broad Economic Categories (BEC) was produced in 1961 to provide a means for international trade statistics to be analyzed by broad economic categories such as food, industrial supplies, capital equipment, consumer durables and consumer non-durables. The original BEC was linked to the Standard International Trade Classification.

**Non Merchandise trade**

Goods which do not permanently add to the material resources of a country are identified as “Non Merchandise” trade. Some common examples would be temporary imports, returnable containers, goods in transit and goods consigned to foreign embassies within a host country.

**Country Statistic**

Import statistic are available by "Country of Origin" - the country of manufacture of the goods.

Export statistic are available by "Country of Destination" - the country of final destination as shown on the export declaration.

**Commodity Classification**

Goods are classification by Customs using the Customs Tariff that is based on the international "harmonized Commodity Description and Coding System", or "HS" as it is sometimes called.

**Limitations of Data**

External Trade statistics are compiled from documents provided by exporters and importers to the Timor-Leste Customs Services. Considerable reliance is placed on the exporters/importers and their agents submitting correct codes and information. Before the data is released for statistical purposes it is validated and detected errors corrected. However no warranty can be given that this information contains no errors.

It should also be noted that goods crossing international borders without appropriate Customs documentation would not be included in Trade Statistics.

**F.O.B. (Free on Board)**

Method of valuation for Exports. This valuation includes the cost of the goods plus their delivery on board ship ready for departure.

**C.I.F. (Cost, Insurance and Freight)**

Method of valuation for Imports. This valuation includes the cost of the goods, cost of insuring the goods during transportation and cost of freight.

**Re Exports**

Re Exports are goods leaving the country that were previously imported into Timor-Leste and comprise less than 50 percent Timor-Leste value by content at time of export.

## Summary Trade Statistics Timor-Leste in Thousand USA Dollar

<b>Key Statistics</b>	<b>2016</b>	<b>2017</b>	<b>2018</b>	<b>2019</b>	<b>2020</b>
