LINE ITEM BUDGET TO PROGRAM BASED BUDGETING IMPLEMENTATION

IMPLEMENTATION PROGRESS
- 2021 Budget was prepared based on Line Ministry programmes;
- The effort was started by VI Constitutional Government in 2016, gradually integrating line ministries into the platform each financial year;
- The Planning, Monitoring and Evaluation Unit (UPMA) within Prime Minister Office together with MoF play important roles in this effort along with all line ministries;
- UPMA has developed and used a software system called “Sistema Dalan ba Futuru (DBF)” – that uses the same Chart of Accounts used in the Ministry of Finance’s Financial System to store all planning and reporting data – (DFAT Australia play important role).

CHALLENGES
- Absence of written criteria to rationalize programmes of line ministries;
- How to make line ministries understand and be aware that programmes must be aligned to the Strategic Development Plan, Government Policy Plan and Priorities, Sectoral Strategic Plan and other strategic documents and reviews such as PEFA assessment; Court of Accounts recommendations, etc;
- Change the way things have beendone in the past was quiet hard (from thinking of budgeting on what into budgeting for what?).
