Executive Summary

The Government has made significant progress towards its goals since January 2008. This mid-year budget update continues and extends the achievements of the Government to date, putting the economy on a sound basis for future growth and development.

Budget execution in the Transitional Budget 2007 was very high (90.1 per cent) and in absolute cash terms (\$80.2 million) the year to date execution for budget 2008 is higher than for any previous State Budget at the same point in the budget year.

Global commodity prices have risen sharply so far in 2008. These are outside Timor-Leste's control, but the Government has intervened to mitigate the impact on the economy and the people of Timor-Leste. The recent Food and Agricultural Organisation (FAO) Emergency summit in Rome on the global food situation agreed that food prices would remain around their current levels over the medium term. Similarly, the cost of fuel is expected to remain high with increases beyond previous maximum prices.

Developments in the global economy will impact on Timor-Leste via the slowdown in the United States, the depreciating US dollar, and increasing commodity prices. Although the dollar is now close to its lowest levels in real terms, studies conclude that it still remains relatively overvalued, so further depreciation can be expected relative to the region, which will result in higher prices for imports to Timor-Leste.

Timor-Leste enjoys a net benefit from high oil prices, but high prices for food and oil flow on to the domestic prices of many other goods and services. This has repercussions throughout the economy which may impede or deflect the Government's program for national development. To reduce the potential expected impact of such large price shocks on the public and economy of Timor-Leste the Government is requesting additional funds, in addition to those for general government services, to establish an Economic Stabilisation Fund (ESF) which will aim to secure the supply of critical commodities at affordable prices to ensure that the continuation of the development process.

The international economic environment during 2008 is expected to be characterised by higher inflation, and will also experience slowing growth, flowing from the downturn in the United States. However, Timor-Leste's oil revenues are increasing, driven by the sustained higher price for oil. This has led to revising the estimate of sustainable income upwards. The revised estimate still allows a prudent margin for fluctuations in price and production.

The Government proposes a supplementary funding of \$185.6 million for state supplied services and \$240m for The Economic Stabilisation Fund in the mid-year budget update, making a total of \$773.3 million for the 2008 budget year.

Part 1 Speech by the Prime Minister

His Excellency, President of the National Parliament

Distinguished Members of Parliament

Distinguished Members of Government

Ladies and Gentlemen,

The State General Mid-Year Review Budget for 2008 symbolises the commitment of the AMP Government to advance the development of the country.

With this Mid-Year Review Budget, to be debated today, we are preparing the future of the nation. And the future, Distinguished Members of Parliament, will come through stability and national development.

This was the mandate the People gave us, to redefine the path of the country, taking the only opportunity available to transform Timor-Leste into a stable, solid and developed community. It was with this desire for change and for reform that we were sworn in – it is this will of the

For that reason, this Mid-Year Review Budget, despite the criticisms, is to update the annual budget. Rectifying signifies aligning. The circumstances have changed, the international context has changed, and therefore, we must have the courage to update the budget, without hesitation, to the new and demanding reality that Timor-Leste faces, and this change can only be addressed with an audacious budget.

This Government has the benefit of having learned lessons from the mistakes of previous Governments and this means that we cannot turn away when peace and national stability are at stake. The Government must always be on alert to recognise problems that threaten national development and be ready to act immediately. This means that the Government cannot dismiss emerging opportunities for growth, even if they come in the middle of the financial year.

- Has there been any progress made on the priorities set for 2008? Let us redefine our priorities to improve the living conditions of more Timorese this year;
- Has new data been collected for the payment of pensions to the elderly, combatants and martyrs? We will correct this and support the elderly and combatants and we will not wait until the 2009 Budget to do so;
- Were we confronted unexpectedly by the dramatic incidents in early February, which forced us to reallocate funds within Government security bodies to meet these needs? We will not wait until next year to adjust these funds, we will allow these Government bodies to implement their programs as planned for 2008;
- Have the prices for food and other essential goods increased significantly around the world, putting at risk national stability? We will respond immediately so as to not allow these increases to have disastrous consequences for our country;
- Have we not had extraordinary increases in the petroleum revenue as a result of the increasing world oil prices? We will use these revenues to alleviate poverty and address social problems immediately, while implementing in 2008 new measures for economic growth.

Distinguished Members of Parliament

Ladies and Gentlemen

The State Mid-Year Review Budget is not just a document of arithmetic nor should it be understood simply in terms of economic returns. The economic and social returns resulting from peace and national stability are the best investment that we can now make.

This was the first investment that our Government proposed to undertake! I will move on to present the “value” of this first investment, given that some Members of this Parliament have had difficulty recognizing the progress made and seek “guarantees” that this Government has the capability to effectively set the country on the path to development.

The exercise is simple: what was the situation in our nation, exactly a year ago on 18 July 2007, compared to the current situation?

Back then we had thousands of people internally displaced in camps in the centre of Dili, living in appalling conditions. This year, we closed down 18 camps and 3,206 families returned to their homes.

We had a group of ex-F-FDTL (a third of the Armed Forces), frustrated with decisions made by the State, who became disillusioned with society after having no response to their petitions. This year, and starting this week, we will pay financial compensation to all these petitioners who opted to return to civilian life, successfully bringing to a close this issue.

We had an unacceptable situation of lack of coordination and distrust between two institutions fundamental to security and national stability; the PNTL and F-FDTL. This year these two institutions successfully worked together for the good of the Nation, as evidenced by the success of the Joint Command. This has starting a new stage in the history of the relationship between these forces, resulting in the development of new relationships of coordination and cooperation on security and national defence, as is seen with the Campaign of Weapons Collection.

We also had an armed rebel group, with significant influence among the population, which could at any moment endanger the security of the country, as indeed it did, by threatening our national sovereignty. This year, this group surrendered peacefully to the forces of the Joint Command, and consequently, to justice.

The parties that make up the AMP Government have travelled across the country “from the eastern point to the enclave” and the message that they heard from the population was always the same: Discontentment with a lack of trust in the State institutions!

What about the private sector? It was totally neglected and lacking any incentive to work with the Government in the process of nation-building. Foreign investors? They were reluctant to invest in a country that failed to offer the minimum conditions of security in both physical and legal terms. What about domestic production to offset the cost of imports? The revenues from exports of non-petroleum goods are essential to pay for imported goods in our country, as we depend heavily on the import of essential goods – to date the only thing our private sector had to export was pessimism.

However, the most shocking was to see our national heroes, Combatants for the National Liberation, eight years after the end of the war, without just recognition and living in conditions of extreme poverty. And up until last year, and before this Government took office, the payment of pensions to the elderly had never seriously been considered.

Without these katuas, without these Combatants, without the widows and orphans who made sacrifices to achieve our Independence, we would not be here today to defend this State Budget.

We believe in social justice measures, essential to national stability, just as we believe in investing for future generations. And so our policies are developed to alleviate the needs of the most underprivileged today with our eyes set on economic growth for the future.

Distinguished Members of Parliament

Ladies and Gentlemen

Addressing these problems has been an important focus of this Government. In eleven months the progress made has been impressive and is there for all to see. We have practically delivered on 100% of measures approved by this National Parliament for 2007 and are accelerating the program for 2008, and not even the constraints that emerged at the beginning of this year have sidetracking us from our set goals.

I will not bother you with more discussion of all that this Government has achieved and refer you instead to this Government's activities report which has been presented to the Parliament.

Better still, we can demonstrate the work of this Government through discussion of the numbers:

I remind you that the budget for the transitional period was only approved on October 10, 2007, notwithstanding the reduced execution period of two and a half months, the budget execution achieved was 90.1%. This execution rate is exceptional when compared to those rates achieved in regard to previous budgets.

Of the \$119 million inherited from previous Governments and carried over into the Transitional Budget, \$104 million related to the 2006-07 financial year and \$15 million to previous years. This carryover is equivalent to almost one third of recurrent budget. The IV Constitutional Government considered this practice unsustainable and took action to reduce carryovers to a more manageable level.

This Government was able, with the application of improved methods of financial management and with reforms in the Ministry of Finance, to improve management and transparency of public funds, and reduce the \$119 million to \$55.19 million. In conclusion, 53% of carryovers have now been resolved.

And in 2008, we have already executed \$153 million out of the \$348 million that was approved. Which means the budget execution rate achieved up to 16th July 2008 equates to 81% on a pro-rata basis. If we only examine the situation in terms of cash, we have executed \$111 million or 59% on a pro-rata basis.

I ask that you do not distort the numbers to manipulate public opinion against the Government's performance. And I also ask you to recognise that performance is not measured in quantitative terms alone.

In the first months of this year, we focused on preparing for the implementation of the measures set for 2008, reforms which define this Government. Reforms in the Ministries, reforms in policies and procedures, legislative reforms and the changing of attitudes and behaviours to become more focused on service to the People.

Reforms are not implemented overnight. However, the experience of other countries suggest that bold reforms, a committed Government, capable and new systems and mechanisms – which while they may take some time to produce results – are the key to successful sustainable growth. But these reforms are not ends in themselves; they are merely the means of achieving our goals, which is the improvement of the living conditions of all Timorese.

We inherited an essentially stagnant government apparatus. We examined the problems, identified the gaps and we acted. Our machine does not stop! A concrete example is the review made of procurement process and the customs and tax services – by independent internationals – who identified the main problems in the system which were impacted on the economic and social development of the country. And the recommendations which were made are already being implemented.

These fundamental reforms are difficult to quantify in terms of budget execution. The improvement of processes and procedures for a more efficient public investment, the strengthening of the capacity building of the private sector, the closure of carry-over projects, the settling of previous Governments' debts, the reforms in the defence and security sectors, the drafting of fundamental legislation which we have approved, the development of attractive mechanisms for foreign investment – these are not easily quantifiable but they will be the foundation for successful execution of the mid-year review budget.

A concrete example of these reforms is the rate of execution of the carry-overs, which was 57%. If we consider only the carry-overs of the IV Constitutional Government, out of the \$40.560 million, we have executed \$29.317 million or 72% in six months!

Excellency, President of the National Parliament

Distinguished Members of Parliament,

These results demonstrate the discipline which has guided our work and the decisive way with which we intend to create the necessary conditions for economic development. We have neither supernatural powers nor can we make miracles, but in mere months we have achieved results never before achieved in this country.

This is the guarantee we give you that we know what we are doing and it is because of this that I ask your full attention for the measures that I will now outline.

However, first I will make a minor detour: this Government has been criticized for not presenting detailed action plans and for not having yet finished the second National Development Plan.

Well, the action plans are an integral part of the Budget papers, the National Development Plan is being developed, and the draft State of the Nation Report is finished. But, more important than the plans are our completed activities and for this reason it is with great pride that we state that in less than a year, of the five that we have to realise our programs, we have made great strides in accomplishing the Government's Program, the document which guides our actions.

And I ask, of the many plans made previously, including the First National Development Plan, where are the achieved results? Where is the execution of the great capital development projects? Where are the important infrastructure works and the public investment within Timor-Leste, which resulted from these magnificent plans?

If we carefully study the measures proposed in this Mid-Year Review, we can conclude that we are not only beginning to develop our infrastructure, we are preparing for 2009, which will be the Year of Infrastructure. Unfortunately, in a country with so many challenges and needs, we cannot do everything at once – and it is because of this that our priorities were a subject of careful reflection. Firstly, a priority will be the consolidation of national stability, for without it there will be no room for investment. And secondly, a priority will be the development of public investment, for without it there will be no room for economic growth and sustainable development.

I would like now to draw your attention to some numbers in the Mid-Year Review Budget, which re-directs Government spending to key areas of economic growth, while at the same time providing assistance to the population, especially the poorest and those in rural areas.

\$31.9 million for electricity supply

\$27.2 million for agriculture and food security

\$20.5 million for infrastructure investment

\$15.9 million for security

\$10.3 million for health and education

\$5.7 million for training and professional development

This increase in spending will:

- Pay for the maintenance of and fuel for generators to secure the supply of electricity to all districts, and at the same time finance the first construction phase of infrastructure for the generation and distribution of electricity at the national level, to definitely resolve the perennial problem of poor electricity supply. And for the longer term, the Government will conduct a study to evaluate the viability of renewable and alternative energy sources.
- Increase agricultural production to improve food security, through the construction of agricultural buildings and Regional Centres of Maintenance, improvement of irrigation systems to increase the quantity of arable land and support measures to farmers to improve methods of production for increased productivity, while also creating storage capacity for food stock through the building of warehouses.
- This increase in spending will also:
- Improve infrastructure, through the rehabilitation of more than 200km of rural roads, the design of projects and works to stabilise river beds and control floods, construction of bridges and rehabilitation of roads and footpaths in Dili, maintenance of the International Airport and of the Berlin-Nakroma Ferry and the implementation of the first phase of a strategic infrastructure plan, focusing on 2009.
- Allow for the reinforcement of defence and security of the country through a series of initiatives ranging from deployment of F-FDTL in the western part of the country, to the establishment of an Integrated Centre for Crisis Management, to increase civilian protection, and the better equipping of the Armed Forces. We will also proceed with payment for the first phase of the building of two coastal patrol boats, including the provision of training. I emphasize the importance of this project because never before were measures taken to adequately protect our national maritime wealth from exploitation, which currently results in an estimated loss of \$36 million each year. Illegal fishing and the way in which the maritime floor has been attacked, places at serious risk our marine life and destroys our precious corals – and so it is urgent that we effectively combat illegal fishing in our country, to ensure that future generations enjoy the benefits of these resources, which are a source of wealth and beauty for Timor-Leste.
- Rehabilitate and finalise the construction of Schools and Health Posts and other medical buildings, provide medicine and services to the hospitals, implementation of policies to improve maternity and infant health, and continuing nutritional support services to mothers and babies, services previously provided by development partners. And in education, in addition to a pilot program for intensive training of teachers, a program for school meals and improvement of teaching systems through decentralization of services and improved school inspections will be implemented.

Finally, this increase in spending,

- Will finance professional development training and capacity building programs and investment in human capital, including scholarships, language training, rehabilitation of training centres and overseas training in fields where learning is not available in Timor-Leste – this is a fundamental instrument for national economic growth.

The expenses I have just outlined, in particular those of capital development and the provision of goods and services are but a timid step, however, they represent a strong indication of the Government's future spending priorities, to increase investment in infrastructure, education and health, and to stimulate the private sector and create conditions for new businesses and industries to emerge. With this spending, there will be less investment risk in a society where one can count on the benefits of a well educated and able workforce, a more efficient health system, better roads, communications and reliable electricity as well as access to markets.

Minor capital spending will increase by \$14 million, primarily to acquire tractors and other machinery to support farmers and to purchase multifunctional vehicles for health centres.

In addition to this, the Mid-Year Review Budget will fund an increase of \$10.4 million for a one-off payment, equivalent to one month's salary, to all public servants, health professionals and health workers, judicial staff and academic staff and continue to fund the subsidies for members of PNTL and F-FDTL.

This measure will acknowledge and improve public sector performance, taking into account the fact that since the UNTAET period, public service positions have not been reviewed, thereby leaving them in a less advantageous situation compared with private sector workers and international agency staff which offer much more attractive remuneration packages. This will, however, be a temporary measure, as the current public administration reform and the implementation of the already approved diplomas, will permanently address this situation.

Further, the recognition of the work of our security and defence forces, who undertake activities of great risk and responsibility, are essential to the improvement of their performance, increasing professionalism and minimizing the risks of corruption. These payments are also a transitional measure, as this year's defence and security sector reform will deliver improved and promotional opportunities for PNTL officers.

The public transfers expenditure will increase by \$48.1 million to a total of \$112 million, to account for the increased number of old age pension beneficiaries, the pension payments to Combatants of the National Liberation, assistance to internally displaced people, additional assistance to the Petitioners, greater support to sporting organisations throughout the country and increased payments for "cash for work".

The Mid-Year Review Budget includes, for the first time, multi-year programs. National development requires patience and cross-sectoral, medium and long-term implementation plans. Not understanding this requirement places at risk the development of the country. We will not mortgage the quality of projects because of a lack of flexibility to approve projects which are impossible to implement within a financial year. This mechanism is in accordance with the Law and guarantees a proper and transparent process.

Distinguished Members of Parliament

Ladies and Gentlemen

The 2008 Budget update to \$773.3 million reflects an additional amount of \$185.6 million in economic development investment and general State services. The remaining \$240 million targeted for the Economic Stabilisation Fund is a temporary preventative measure to guarantee national stability.

This measure results from the worldwide increased cost of essential goods, not only making the goods more expensive but also increasing the scarcity of their supplies in the international market. And at the same time that we are increasing investment in capital development projects, we are faced with shortages in building materials, in particular when procured individually by the private sector which now requires government support.

The increase in spending is only possible because the Petroleum Fund continues to enjoy the benefits of recent petrol price increases, which have resulted in the sustainable revenue increasing in a few months by more than \$100 million per annum.

While the international outlook suggests that the increases in petrol prices will continue to rise, we have taken a conservative approach to our estimated sustainable revenue and at the same time are developing an investment and fund management strategy, which will maximize the value of revenues derived from the petroleum sector.

We have no doubt that we are investing our resources in a sensible and responsible manner, thereby guaranteeing, in the present, social stability and investment in the development of essential infrastructure, while maintaining sufficient resources for future generations. We also have no doubt that we are managing this in accordance with the Law. The people expect no less from this Government.

We are acting in the national interest and, like resource rich countries which have experienced economic growth “miracles”, we are transforming the use of petroleum revenues to provide an increased sustainable national income which can be distributed to all the population – worse than having poor people in a rich country, is having rich people in a rich country where the majority of the people are poor.

We do not want to leave anybody behind! I acknowledge that this is a huge challenge but at least we will not be accused of not having tried. This is not a Government for some, it is a Government for all. Therefore, we have no intention of allowing some to improve their living standards, while others continue to face extreme difficulties in accessing jobs, essential goods and public services - it is for this reason that a significant part of this money is allocated for rural development, the elderly, veterans and to the poorest, and not just to invest in infrastructure projects which would immediately silence the opposition and international theorists.

The true wealth of Timor-Leste is not its oil but its Dignity! The true wealth of the country is not its natural resources but its people: men, women and children, who did not fight for a “fat” account sitting in a “central bank” but for the Dignity of the Timorese people.

Distinguished Members of Parliament

Ladies and Gentlemen,

The consumer price index which was 9% in 2007, will increase in 2008, with estimates of 10-12% during this year. The prices of staples at the global level, has been increasing rapidly with the price of rice trebling in the first four months of this year.

Added to this worldwide food crisis, which some call the “silent tsunami”, is the significant increase in fuel prices and building materials. Timor-Leste relies on the import of these products to feed the population and to stimulate economic growth, however, the producing countries of the world have been reducing their exports and thereby inflating prices even further.

Ladies and gentlemen,

I am convinced that there is no doubt whatsoever among those present in this “Casa Magna” what this could mean to such a fragile country as ours. The disturbances and demonstrations that have been taking place in other countries, where poverty is not as prevalent as it is here, is a warning that we cannot afford to ignore.

The damage that food insecurity could bring to our people has no price. And, it is not only social stability that is at stake, it is also national development that is at risk.

Hunger causes increased vulnerability to illnesses such as malaria and tuberculosis, endemic in our country. Hunger causes greater learning difficulty for our children and mortgages the development of human capital. Hunger leads to violence and national instability.

And the shortage of fuel combined with the lack of building materials, poses serious difficulties to the development of infrastructure which the Government started this year and will increase further in 2009. For a country that is attempting to free itself from extreme poverty, a complex situation such as this requires bold measures – and it is because of this that we included the Economic Stabilisation Fund in this Mid-Year Review Budget.

We have the resources to fund this budget update. We are a sovereign State. It does not make sense to “hold out our hand” for international assistance, that may take time to arrive or not arrive at all, when such assistance could be channelled to other countries where the needs are more pressing. There are countries in Africa where children are dying of hunger and these countries are not blessed with the same resources that Timor-Leste possesses. Our response is also one of international solidarity.

The Economic Stabilization Fund, which has caused such criticism, is an instrument for the Government to monitor the pressure on prices. It is not, however, the only means. To reduce the rise of inflation, we will reduce import duties and sales tax to 2.5% and the service tax to 5%, through the recently approved tax law reform. Other measures, such as the establishment of a price monitoring and surveillance unit in the Ministry of Tourism, Commerce and Industry and increased dialogue with the private sector and other associations, such as cooperatives and veterans associations, will serve to guarantee adequate goods and services price competition.

The projects undertaken so far to increase agricultural productivity and expand the production of essential goods have already shown results and we are now in the phase of sowing the seeds to realise our own food security – but of course, it will take time and we cannot expect to harvest sufficient rice this year to address the current crisis.

The Government has defined the guiding principles for this Fund, however, the mechanisms used to prevent future challenges will depend on specific situations. It is not our intention to tie ourselves down to a fixed solution. We are looking for a degree of flexibility to respond to the pressing needs of this crisis, as and when they arise.

The majority of the \$240 million will be returned to State coffers. The preventative measures will serve to combat unpredictable factors dictated by the international environment, as they arise. These are exceptional measures, which require some degree of legislative and bureaucratic flexibility, but can save a country, which is in a post-conflict labyrinth, from an irreversible decline.

The Government leaves it to the conscience of each one of the Distinguished Members of Parliament to decide whether to approve or not to approve this Fund. If the situation deteriorates and demonstrations emerge, it will fall on the Government to restore peace and security. If that happens I will come back to this National Parliament to reiterate: do we invest in peace and stabilise the country or do we destroy the hope of this young nation?

President of the National Parliament,

Distinguished Members of Parliament

Ladies and Gentlemen,

The policies underpinning this Mid-Year Review Budget promote sustainable economic growth by creating an environment conducive to greater levels of investment, job creation, mobility of resources, social protection, equity and inclusion.

The capacity of a Government is not measured only by its ability to stay the course from start to finish but above all by its capacity to adapt to new circumstances and to transform challenges into opportunities, with practical results that foster stability and national development.

This Budget, more than updating the approved budget, will place Timor-Leste in a more stable position and safeguard the rights of the poorest and most vulnerable.

Thank you very much.

Part 2 Fiscal Overview

The supplementation of the State Budget for 2008 is primarily designed to overcome the current difficulties and external supply shocks emanating from global economic conditions. The Government remains strongly committed to continue its efforts to put Timor-Leste on a sound foundation for a prolonged phase of economic growth and development.

The Government proposes increases in public expenditure to enable further investment in economic development, bringing forward productivity gains in key sectors such as agriculture and productive infrastructure so as to be able to reap the benefits of economic growth earlier and reduce budget dependency on oil in the medium to long term.

The review also includes an Economic Stabilisation Fund to mitigate the potential domestic shocks from global price increases which are outside Timor-Leste's control.

The supplementary budget has been formulated by:

- assessing progress thus far against the Government's programme;
- seeking opportunities to advance the programme more aggressively in light of progress to date;
- moderating the impact of external economic shocks; and
- responding to unforeseen internal events.

Tables 2.1, 2.2 and 2.3 show the overall Budget Statement for the whole of Government. They provide actual cash expenditure for 2006-07 and the transition period in 2007, the estimate for forecast cash expenditure for 2008 and the projected budgets for 2009 to 2011. Expenditure in the forward years is expected to stay high due to significant increases in public investment in infrastructure from 2009 onwards. It is envisaged that such investment will lead to an improvement in the productive capacity of the economy of Timor-Leste.

Financing from the Petroleum Fund

The Petroleum Fund continues to benefit from the recent increases in oil prices. The balance of the Petroleum Fund was \$2,086 million at 31 December 2007. It had increased to \$2,630 million by 31 March 2008. By the end of 2008 the balance is expected to be \$3,339 million, instead of the amount originally predicted in the 2008 State Budget of \$3,116 million. The Fund is expected to increase steadily in the medium term. The current forecast shows the total value of the Fund rising to \$4,501 million by the end of 2009 and \$6,968 million by the end of 2011. Total Petroleum Wealth on a Net Present Value basis is estimated to be \$13,203 million at 1 January 2008, based on current cash holdings and conservative estimates of future quantities of oil and oil prices.

The recent and expected future increases in the price of oil has led to an increase in the estimated net worth of the petroleum fund. Sustainable income has risen correspondingly from \$294 million per annum at the time of the formulation of the 2008 State Budget to \$396 million per annum in early 2008.

Table 2.1 provides a consolidated picture of the State Budget from 2006-07 through to 2011. In 2008 the Government will have a non petroleum fiscal deficit of \$701.8 million assuming approval of the supplementary budget. This deficit will be partially financed through the petroleum fund. The Government is seeking to withdraw \$686.8 million from the Petroleum Fund. The remaining \$15.0 million will be financed from the Treasury Account.

Future estimated deficits forecasts in 2009 to 2011 are only indicative and do not imply that the Government will withdraw amounts from the petroleum fund which exceed sustainable income in the years beyond 2008. Details on financing of any future deficits will be provided in the General Budget of State for the actual year in question.

In regard to the estimating sustainable income the Ministry of Finance has used assumptions, which are prudent. For 2008 the oil price assumption is an average \$86 per barrel. It should be noted that this is not an expected oil price for 2008 but the oil price used in the calculation of sustainable income. At the time of writing the actual average oil price so far in 2008 has been \$107 per barrel.

Part 3 – Economic Overview

International and Regional Economic Overview

The IMF's World Economic Outlook April 2008 stated that the global economy in the last six months of 2007 was shaped by two opposing forces: robust economic expansion in emerging markets, particularly China and India, and a slowdown in advanced economies particularly the United States where the slowdown has been, exacerbated by the housing market correction. World economic growth is now forecast to slow by over one percentage point from the 4.9 percent experienced in 2007 to 3.7 percent in 2008 and 3.8 percent in 2009.

In recent months rising food and fuel prices have led to higher levels of headline inflation in many countries. Food price increases have accounted for almost 45 per cent of global headline inflation in 2007 in major industrial and emerging economies.

The current commodity boom of which Timor-Leste has been a net beneficiary has been broadly based and includes oil, metals, major food crops as well as some beverages.

Overall the current boom is largely associated with the increased demand for commodities in China and other fast growing economies of Asia which is outpacing current levels of supply the diversion of food crops for the production of bio fuels may have also had some impact.

Food prices are expected to peak in 2008 and forecast to remain at the same levels in the medium term.

The region as a whole grew by 7.4 percent led by China and India with growth of more than 9 percent. However, signs of moderating activity have emerged in line with the global slowdown in the United States. Given its extensive trade and financial linkages with the rest of the world, Asia is unlikely to escape all effects of this downturn. In 2008, growth for the region is expected to decline by 1.25 percent to 6.2 percent which is also the expected growth of Indonesia. Growth in Australia, a major commodity exporter to Asia, is expected to be 4.4 percent in 2008 while Indonesia, is expected to experience growth of 6.2 percent.

Inflation pressures are now strong or rising across most of Asia. While the initial rise in headline inflation in much of the region reflected supply-related food price shocks and higher global commodity prices (where they have been allowed to pass through) price increases are now starting to become more broadly based. Core inflation has begun to rise more rapidly in recent months. Producer price inflation has also picked up sharply across Asia. This reflects higher costs for energy as well as other raw material inputs.

Developments in the global economy will impact on Timor-Leste via the slowdown in the United States, the depreciating US dollar, and increasing commodity prices. Although the dollar is now close to its lowest levels in real terms, studies conclude that it still remains relatively overvalued, so further depreciation can be expected relative to the region, which will result in higher prices for imports to Timor-Leste.

In terms of commodity prices, Timor-Leste is currently benefitting from higher oil prices and the resulting income from oil revenues and will continue to do so. Increases in the price of coffee, Timor-Leste's major agricultural export, have been more moderate, rising from 123 cents to 149 cents per pound between January 2007 and March 2008.

Any associated rise in export income will therefore also be moderate. By contrast, increases in rice prices from \$323 per metric ton in 2007 to around \$1,200 per metric ton in May 2008 has and will continue to have a large impact on the cost of living in Timor-Leste.

Domestic Economy

In the short to medium term, the domestic economy of Timor-Leste will continue to be driven by the public sector, with expenditure primarily financed by transfers from the Petroleum Fund. In 2007 it is estimated that domestic non-oil GDP grew by 8% in real terms.

Output in the agricultural sector in 2007 is estimated to have contracted significantly due to bad weather and locust plagues, with an overall decline of around 10% for crops such as coffee and maize. However, this was more than offset by a rebound in industry after the civil unrest in 2006, and increases in government expenditure. Overall government expenditure on a cash basis contributed more than half of non oil domestic GDP. The total government expenditure in 2007 on a cash basis was \$156.5 million.

The outlook for the domestic economy in 2008 reflects the commitment of the Government to increasing real rates of economic growth which will lead to increased levels of employment and poverty alleviation.

The Government is acutely aware of the fact that higher economic growth rates are necessary to achieve these objectives and intends to utilize the substantially larger financial resources from oil and gas to achieve these goals.

Provisions have been made in the 2008 supplementary budget to provide rice subsidies, increases in transfer payments for internally displaced people, pensioner and veteran, as well as more work programmes for the unemployed to alleviate the incidence of poverty.

In the areas of health and education there will be major increases in maternal health and hospital care, and expansion of the school feeding program, teacher training and construction of school facilities.

Greater public investment in infrastructure, human capital and intensified reform of the business environment are also set to increase sustainable growth over the medium term.

Infrastructure projects to be commenced in 2008, such as improvements in electricity supply, road rehabilitation, and improvements to ports and airports will be implemented. Investment in agriculture will also be stepped up substantially particularly with the purchase of tractors and machines as well as irrigation related projects and construction of agricultural facilities. The Government is investing heavily in increased agricultural productivity with the goal of increased food security and import substitution.

Total spending for 2008 is expected to be in the order of \$773.3 million made up of the original budget appropriation of \$347.8 million, and a mid-year supplementary budget of \$425.6 million, including \$240 million to establish the Economic Stabilisation Fund. Spending at these levels, which will include the construction of new power plants and other investment in electricity generation, is expected to significantly enhance the living standards of the Timorese people. In addition it will provide a positive impetus for business expansion and further development and investment particularly with the envisaged public investment in capital projects, which will lead to a real rate of economic growth of approximately 9-10 percent.

Consumer inflation rate of almost nine percent was recorded in 2007. In 2008 inflation is expected to be in the range of 10-12 percent. Following global developments, food prices have been increasing rapidly, with rice prices in international markets up some 200 percent during the past six months. In addition the costs of building materials have also risen considerably.

The government will be vigilant in monitoring price pressures and the Economic Stabilisation Fund will be used as a major tool for this purpose. Another factor which may mitigate the rise in inflation will stem from the reduction of import duties and sales tax to 2.5 percent and service tax to 5 percent through the recently approved fiscal law. Here the extent to which tax reductions are passed through by producers and retailers is important.

The Government is taking steps through the establishment of a prices surveillance unit in the Ministry of Tourism, Commerce and Industry, increased dialogue with the private sector, and other associations such as co-operatives and veterans associations to ensure there is adequate competition in regards to the prices of goods and services in the economy.

The Government is committed to increased rates of economic growth, together with targeted assistance to the vulnerable and disadvantaged, as essential steps to increased employment and poverty reduction. It intends to utilize the rapidly growing financial resources from oil and gas to achieve these goals.

Petroleum Sector

Currently there is only one field in operation in the Joint Petroleum Development Area (JPDA). The Bayu-Undan field is still in its early stage of production. It is expected that it will continue to generate revenue for the State of Timor-Leste until 2023.

The actual production in 2007 was 58.8 million barrels oil equivalents compared to the estimate of 59.3 million barrels oil equivalents in Budget 2008. Lower actual production in 2007 than assumed in the Budget 2008 was due to a reduction in the production of Liquefied Petroleum Gas (LPG).

To date increases in petroleum revenue have arisen from steadily increasing oil prices. Oil revenue estimates are based only production levels which are nearly certain. In the medium-term, however, significant increases in production are expected. For example, another field in the JPDA, known as Kitan, has been declared commercially viable. This will be included in the petroleum revenue estimates in the near future when it is clear what flows can be expected. Production will also eventually increase as a result of ten drilling expeditions in the Timor Sea between 2009 and 2012.

As outlined in the Budget 2008 the peak production from the Bayan Udan field is expected to occur in 2008. The estimated production schedules are unchanged since the Budget 2008 and are provided in Table 3.4. However, the actual production data is updated on annual basis after the realisation of actual data. The projection estimates are based on the operator's low production case, in order to take into account the significant risk related to the petroleum sector.

The average oil price of West Texas Intermediate (WTI), in 2007 was \$72 per barrel compared to the estimate of \$73 per barrel in Budget 2008. However, the actual prices from the production of condensate and LPG from the Bayu-Undan field were higher than assumed in the Budget 2008, due to the fact that the differential between the WTI-price and the actual product prices were less than anticipated.

At the time of writing the actual average oil price so far in 2008 has been \$107 per barrel, compared to the forecast of \$62 per barrel assumed in Budget 2008. Due to the substantial increase in the actual oil price and the forecast for the rest of the year, the Ministry of Finance has increased the oil price assumption in 2008 to \$86 per barrel on average. This is not an expected oil price for 2008 but the oil price used in the calculation of sustainable income, reflecting the requirement that all assumptions, according to the Petroleum Fund Law, shall be prudent. Even though the oil price assumption in 2008 is lower than the actual prices so far in 2008, it should be noted that it is significantly higher than the actual oil price only one year ago. Chart 3.1 illustrates the historical nominal changes in the oil price and the assumptions used in calculating future petroleum revenue.

Chart 3.1
Changes in World Oil Price WTI Basis (\$ Per Barrel)

Petroleum Fund

The actual petroleum revenue, excluding the returns on petroleum fund investments for 2007 was \$1,258.5m. Correspondingly, petroleum revenue for 2008 is estimated to be \$1,845.8m, which is an increase of \$487.2m from the estimate provided in the Budget 2008, due to the updated oil price estimate for 2008.

Table 3.1
Estimated Petroleum Fund Savings 2006-07 to 2011 (\$m)

--

The actual return on petroleum fund investments in 2007 was \$117.0m. Almost 80% of the actual return was received in 3rd and 4th quarter of 2007 because a significant drop in the US Government bond yield during that period caused windfall return on the investments held in that period. Based on the current investment strategy and an US Government bond yield of 3.5%, the return on the investments for 2008 is expected to be \$93m.

Chart 3.2 shows the recent changes in the 0-5 years US Government yield curve.

Chart 3.2

Petroleum Fund Interest	37.5	32.8	93.3	134.8	176.4	218.8	623.4

The balance of the Petroleum Fund as at 31 December 2007 was \$2,086m. It has increased to \$2,630m at 31 March 2008. By the end of 2008 the balance is expected to be \$3,339 million. The Fund is expected to increase steadily in the medium term. The current forecast shows the total value of the Fund by the end of 2009 to be \$4,501 million and by the end of 2011, \$6,968 million.

¹ Source: Federal Reserve (<http://www.federalreserve.gov>)

Petroleum Revenues, Wealth and Sustainable Income

Total Petroleum Wealth is estimated to be \$13,203 million as of 1 January 2008 on a Net Present Value basis. In addition to the total value of Petroleum Fund as at 1 January 2008, the Petroleum Wealth also consists of a Net Present Value (NPV) of future petroleum revenue of \$11,117 million. The estimated Petroleum Wealth has increased by \$3,392 million compared to the calculations provided in the Budget 2008. The significant increase in the Petroleum Wealth is due to the revised oil price forecast and the decline in the discount rate from 4.3 % to 3.5 %.

According to the Petroleum Fund Law the Estimated Sustainable Income (ESI) shall be 3% of the Petroleum Wealth. Correspondingly, the Estimated Sustainable Income for the Budget year 2008 is estimated at \$396m. This is an increase of \$102m compared to the calculation for the preparation period for Budget 2008, where the ESI for 2008 was estimated to be \$294m.

Chart 3.3
Timor-Leste Petroleum Revenue and Sustainable Income 2002 to 2023 (nominal prices)

Chart 3.3 illustrates the long term level of ESI and petroleum revenue to be received up until 2023.

Table 3.3
Sustainable Income from the Petroleum Fund 2006-07 to 2011 (\$m)

--

Oil prices used in this calculation are lower than current market prices. It should be noted that calculations are based on prices that are significantly higher than seen only a few years ago, and oil prices have displayed volatility over time.

Chart 3.4
Historical and Projected Oil Prices in Real Terms (2007 Prices)

Review of Methodology

The Petroleum Fund Act presupposes that the estimated nominal yield on a US Government security averaged over the years, in which the Petroleum Fund receipts are expected, should be used as the discount rate when calculating the present value of the future cash flow from the petroleum sector. At the time when the Sustainable Income calculation was revisited prior to the mid term review of the Budget 2008, the weighted average of the US Government securities was estimated at 3.5%, which has been chosen as the discount rate for the calculations. Furthermore, forecast petroleum revenues are discounted to the start of the calendar year (1 January 2008), assuming revenues are received on average in the middle of the year.

Using a risk free interest rate when calculating the present value of future revenue has implications for the assumptions used, when estimating the cash flow. There should be a substantial likelihood that the cash flow will materialize. The State Budget estimates production on the basis of the operator's "Low" estimate. The Low estimate is that there is a 90% likelihood that predicted production levels will be achieved.

As mentioned above the Kitan field has been declared commercially viable, and the Government is very actively seeking to progress Greater Sunrise. Furthermore there are ten drilling explorations between 2009 and 2012, all of which have expected positive revenue impacts for the State.

The State Budget uses the "Low Price Case" forecast of the imported crude oil prices of the US Government's Energy Information Administration (EIA) as the benchmark price for making the price assumptions. In order to obtain the West Texas Intermediate (WTI) price, which is the price used as the basis for the calculation, the imported crude oil prices are adjusted with the expected differential between these two benchmark prices.

The annual forecasts of the imported crude oil prices are usually published by the EIA in February every year, but in 2008 the forecasts are delayed and have not yet been made public. However, EIA has already made public its "2008 revised early release" of the "Reference Oil Price Case" and a "Low Price Case" is thus estimated by the Ministry of Finance based on the same differential between the "Reference Price Case" and the "Low Price Case" as in 2007. This estimated "Low Price Case" is used as the basis for estimating the WTI price forecast in current sustainable income calculation.

As there are several petroleum products (condensate, Liquefied Petroleum Gas (LPG) and Liquefied Natural Gas (LNG)) from Bayu-Undan with various prices, the historical differential between the WTI benchmark price and the various product prices have been used to forecast the product prices. These differentials are unchanged since Budget 2008.

Timor-Leste does not have a range of petroleum fields from which it gains petroleum revenue, as a result there are risks associated with petroleum revenue. The risk, however small, is that an event affecting the Bayu Undan field will cause an interruption of the revenue stream to the State of Timor-Leste. Such a deferral may last for months, years or even indefinitely, depending on the event. Furthermore, oil prices are very volatile, and it should not be ruled out that oil prices fall below the price assumptions used in the calculations of the Petroleum Fund.

In calculating the Petroleum Wealth only fields in production are included. As there is no development plan for the Greater Sunrise field yet, potential Timor-Leste revenues from this field are not included in the calculation of the Petroleum Wealth, nor are potential revenues from the acreages opened for exploration.

Table 3.5 summarises the forecasts of the petroleum revenues from the operations at Bayu Undan, the:

- first column refers to the calendar year;
- second column shows the oil price forecast which has been used to estimate future petroleum revenues, based on the Low Price Case published by the Energy Information Administration in the US;
- third column shows the estimated petroleum production based on the Low Production Case provided by the operator, ConocoPhillips; and
- fourth column shows the total estimated petroleum revenues based on the above information.

The petroleum revenues shown in column 4 are undiscounted, and are presented in current prices (revenue received in 2010 is measured in 2010 dollars, revenues received in 2015 are measured in 2015-dollars etc). The calculation of the Petroleum Wealth is based on the net present value (NPV) of future revenue. All future revenues are discounted back to 1 January 2008 as this is the point of time where Petroleum Wealth is estimated for 2008.

At the time of formulating the 2008 budget update the funds in the petroleum fund are reflected in 2008 prices, to calculate the petroleum wealth, consistency needs to be applied, and all future revenues are also reflected in 2008 prices. The NPV shows all the future revenues in this base year of the budget (2008 dollars).

In 2009 budget, petroleum wealth will be calculated on a 2009 price basis.

As petroleum production consists of several products (condensate, LPG, LNG) with different price formulas and contracts, it is not straightforward to calculate the total undiscounted petroleum revenues based on the WTI oil price and the production figures in the table 3.4.

The estimated total petroleum revenues from 1 January 2008 to 2023 in undiscounted terms are \$13,235 million, while the net present value of future revenues in discounted terms is estimated at \$11,117 million. The discount factor used in the calculation is 3.5 % in accordance with the provisions in the Petroleum Fund Law. Total Petroleum Wealth is estimated at \$13,203 million, as presented in table 3.5, this is made up of Petroleum Fund balance as of 1 January 2008 of \$2,086 million to the future discounted petroleum revenue of \$11,117 million.

Sensitivity

There are a range of risks and uncertainties in any forecast of petroleum revenues. The most sensitive assumption is oil price, meaning that the forecast of petroleum revenues changes substantially even given a relatively small change in assumed oil prices.

Other uncertainties include LNG contract volume and pricing terms, condensate and LPG spot sales prices relative to oil prices, operating costs and inflation. The Ministry of Finance has endeavoured to adopt prudent assumptions in all cases.

Table 3.5 shows the sensitivity of Petroleum Revenues, Petroleum Wealth and Estimated Sustainable Income to changes in production and prices.

Table 3.5²
Sustainable Income Calculations – Sensitivity Analysis (\$m)

	Oil price - \$10	MY 2008	Oil price + \$10	Operators Expected Production Case
Petroleum Receipts 1 Jan 2008 to 31 Dec 2024	10,479	13,235	15,991	15,128
Petroleum Wealth at 31 Dec 2007	10,970	13,203	15,436	14,487
Estimated Sustainable Income 2008	329	396	463	435

² The 2008 State Budget is based on the Ministry of Finance case (MoF Case). The low price is based on oil prices at \$10 per barrel lower than that assumed by MoF officials; high price is based on oil prices \$10 per barrel higher than that assumed by MoF officials. Expected production is based on the operators expected production rather than the low production estimate (P90).

Part 4 – Revenue

Total State revenue for 2008 has been revised as detailed in Table 4.1. This revenue is comprised of:

- Petroleum revenues (including interest from the petroleum fund);
- Domestic taxes;
- User fees and charges;
- Interest earned on cash balances of the State; and
- Autonomous Agency fees.

Table 4.1

Discussion on petroleum revenues are discussed in Part 2 – Economic Overview.

Estimates of expected domestic tax have been revised to take into account the increase in domestic products and activities which have continued to grow since 2006. Increased Government spending and a significantly larger international presence both contributed to this increase.

Revisions have also been made following the June 2008 reforms to the domestic tax system (*Taxes and Duties Act*, expected to be gazetted by July 2008). Revenue estimates in the 2008 Budget paper were prepared on the basis that the new tax law would operate from 1 January 2008. These estimates have now been updated to reflect the implementation date of 1 July 2008 as approved by National Parliament.

The new reforms aim to improve the competitiveness of Timor-Leste in the region and support the future expansion of the private sector. A brief summary of the key impacts on domestic revenue are set out below.

Wages Income Tax

For resident tax payers the first \$500 of taxable monthly wages will not be subject to tax, with amounts in excess of \$500 subject to tax of 10%. Non-residents will have to pay tax at 10% on all amounts of taxable wages received.

Withholding tax

Dividends and interest will no longer be subject to withholding tax, but interest must be included in gross income in calculating taxable income.

Recipients of certain service income currently subject to final withholding tax will be able to elect (irrevocably) that the withholding tax will not be a final liability. These taxpayers will lodge tax returns, be subject to normal income tax and receive credits for any tax withheld.

Service Tax

The rate of service tax will drop from 12% to 5%, and the provision of motor vehicles rental services will no longer be subject to service tax.

Income tax

Taxable income for resident natural persons in Timor-Leste (individuals) will be taxed at the rate of 10% on funds in excess of \$6,000. The rate of income tax for non-resident natural persons will be 10% on taxable income. For all other taxpayers (non-individuals), the rate will be 10% on all taxable income. 1% minimum income tax will no longer be payable.

Depreciation

The depreciation rate for all depreciable assets and business buildings will be 100% in the year of acquisition from the 2008 tax year. As a transitional arrangement, tax payers will also be entitled to claim a depreciation deduction for the written down value of any depreciable assets and business buildings as at 31 December 2007. This is expected to provide a significant tax saving for many businesses in Timor-Leste.

Amortisation

The amortization rate for all intangibles will also be 100% from the 2008 tax year. The same written down value applies to amortisation as is proposed for depreciation.

Interest

Deductions for interest expenses will only be allowable for financial institutions (eg – banks).

Part 5 – Expenditure

Budget execution

The impact of the budget depends on how much of the funds appropriated are used to support the Government's program. Budget execution occurs in four stages:

- **appropriation**, which is the legal maximum amount the National Parliament has allowed the Government to spend under the budget appropriation;
- **commitment**, which occurs when a Ministry raises a commitments and payments voucher;
- **obligation**, which occurs when a Ministry is legally bound to make a payment at a later stage, through a signed contract with a supplier and upon delivery; and
- **cash payments**

During the year, budget execution is estimated as the total of commitments net of obligations, obligations net of cash payments and cash payments as a percentage of the total appropriation

At the end of the budget year, appropriations lapse; no money can be spent against them after the budget year is over. Similarly, commitments which have not been obligated or paid lapse. Budget execution is then obligations plus cash spending as a percentage of the total appropriation. Obligations, however, continue because the Government is legally bound to pay the money on delivery. Obligations are thus future payables and are classified as expenditure.

In the 2008 supplementation the Government is presenting a number of projects which are multi-year appropriations , that is with full costing of multi-year projects phased over the years in which they are expended. This will enable Government to estimate its expenditure more accurately, particularly as investment in basic infrastructure increases. It will also eliminate persistent large budget carryovers. To achieve this will require more careful project planning by the Government and a commitment by the National Parliament to agree to funding over more than one year. The Government recognizes that at this stage of budgetary reform it will take some time to implement both the required planning process and the multiyear budgeting.

This mid year budget update covers three stages of budget execution:

- the transitional 2007 budget which covered the period 1 July 2007 to 31 December 2007;
- execution for the first two quarters for the 2008 budget to 10 June 2008; and
- carryover of unspent funds from previous years

Execution of the budget for the transitional period July – December 2007

Funds appropriated in the 2007 transitional budget had to be spent or obligated in just over two and a half months between approval on 10 October and the end of the transitional period on 31 December 2008.

To expedite execution of the transitional 2007 budget, a dedicated team was established for quicker specification, tendering and awarding of contracts, while ensuring probity, quality and value for money. As a result, despite the substantial amount of money appropriated in a very short time frame, execution for the transitional 2007 budget was 90.1%. This is very high compared with previous budgets.

Table 5.1
Transitional 2007 Budget execution, Whole of Government (\$m) ³

	Appropriation		Actual Expenditure			
	Original	Revised	Cash Payments		Total Expenditure	
Salary & Wages	19,485	19,603	17,442	89%	17,442	89%
Goods & Services	73,107	68,403	37,116	54%	59,837	87%
Minor Capital	2,964	5,624	688	12%	5,286	94%
Capital & Development	8,739	10,665	727	7%	10,575	99%
Transfers	12,114	12,114	8,363	69%	11,731	97%
Total	116,409	116,409	64,336	55%	104,871	90%

Budget execution was strong across all categories of expenditure, ranging from 89% for salaries and wages and goods and services to 94% for minor capital and 99% for capital and development. Much of the execution at the end of the year for the last two categories was in the form of obligations pending final delivery of the goods and completion of public works. Execution of salaries and wages is likely to have been reduced by lags in recruitment. Budget execution was improved across the Government, with more than half of all ministries and autonomous agencies executing 89% or more of their total budget.

Details of execution of the transitional budget for each Ministry by expenditure category are shown in the Ministry chapters. Full details are also included in the audited report on execution of the transitional budget, available on the Ministry of Finance website at www.mof.gov.tl

Execution of the 2008 budget

Execution for the 2008 budget has so far been progressed across all expenditure categories and for most ministries. *Salaries and wages* and *goods and services* are higher than in previous years and are broadly on target. Execution of *minor capital*, *capital and development* have a longer lead time and are expected to show more movement in the third and fourth quarters. Details of execution of the first quarter of the 2008 budget for all ministries and autonomous agencies are shown in the ministry chapters following.

Revision of the 2008 Budget - The Government's Priorities

The Government presented its program to the National Parliament in 2007, based around re-establishing security and focusing on the central development tenets of:

- economic growth;
- reforming the management of the State;
- development of youth and national human resources;
- provision of solidarity, health and social protection;
- improving infrastructure and living conditions;
- promoting equality and tolerance, internal security and strengthening democracy; and
- national defence and foreign policy

³ Includes autonomous agencies Transitional 2007 appropriation (a) includes virements since the budget was passed by National Parliament.

These were addressed in Budget 2008. Significant advances have already been made on many critical matters, with progress often being faster than anticipated. Areas of notable achievement include:

- Internally displaced persons are progressively returning to their homes, assisted by the Government. Large IDP camps, such as the camp at the National Hospital and Jardim Camp are now closed.
- Security has been restored, community safety has been enhanced by the implementation of legal processes and the collection of illegal weapons.
- Significant progress towards resolution of the concerns of the petitioners. This group have returned to Dili and are discussing options to either seek a civilian career with Government financial assistance or rejoin the F-FDTL.
- Faced with difficulties in food supply and high food prices, the Government has mitigated the risks to the public by ensuring that rice is available at subsidised retail prices.

The Government will continue to put Timor-Leste on a sound foundation for a prolonged phase of economic growth and development through the rectification of the State Budget for 2008. This has been formulated by:

- reviewing the Government's programme for 2008;
- assessing progress thus far;
- responding to unforeseen internal events since January; and
- moderating the impact of external economic shocks.

In light of the progress to date, the Government has identified additional priority work to commence in the second half of 2008. As a result of these emerging priorities the Government of Timor-Leste proposes a significant increase in public expenditure from \$347.8 million to \$788.3 million, which incorporates the \$240 million for The Economic Stabilisation Fund and a further \$185.6 million for various services, public investment and transfer payments such as pensions to the elderly and the veterans.

Overall actual and forecast expenditure is shown in Tables 5.2 to 5.5. All measures proposed for the second half of 2008 are shown in the measures, Table 5.6, and are described for each Ministry in detail in the following Ministry Chapters.

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Presidency of the Republic.

Medals for the International Stabilisation Force (ISF)

These funds will be used to purchase for medals for members of the International Stabilisation Force who worked to maintain peace in Timor-Leste.

Technical Assistance for the Office of the President

These funds will be used to pay the salaries of international advisers in the Presidency of the Republic

Operational Costs to assist with the President's treatment in Darwin

Funds will be used to cover the following expenses incurred during the President's medical treatment and stay in Darwin after the events of February 11.

Supplementation for increased Daily Subsistence Allowances on official work travel

Funds will be provided to cover the increased costs of overseas travel arising from higher fuel costs and the implementation of revised Daily Subsistence Allowances which reflect the rising cost of living in different cities around the world and changing exchange rates.

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Parliament

Operational Costs for the Parliament

These funds will enable staff from the Secretariat to accompany Members of Parliament in local travelling and will provide overseas travel for Members of Parliament to do comparative studies in other countries as well as fulfil obligations for overseas visits. The Parliament also requires additional fuel to run the generator and cover the increased catering costs arising from the new staff working in the Parliamentary Secretariat.

IT Equipment and Furniture for the National Parliament

These funds will be used to purchase power supply equipment, equipment to assist with filming of plenary sessions and additional furniture for the official residences of the Vice President and President of the National Parliament

Vehicles for National Parliament

These funds will be used to purchase vehicles for use of the National Parliament.

Supplementation new travel rates for official travel by Parliamentarians

Funds will be provided to cover the increased costs of overseas travel arising from higher fuel costs and the implementation of revised Daily Subsistence Allowances which reflect the rising cost of living in different cities around the world and changes in exchange rates.

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Office.

Operational Costs for the Office of the Prime Minister

These funds are to assist the Prime Minister's office with representative activities during 2008.

Rehabilitation, furnishings and security for Building 1, 2 & 3 (GPA)

Works on rehabilitation of buildings 1, 2 and 3 at the GPA complex started under the First Constitutional Government are expected to be completed by June 2008. Due to changes in organic structure of the new Government and increased cost of materials, additional funds are needed to complete these works. Funds will also cover security upgrades.

Director General of National Information Service

The Law of Information Systems was approved by the National Parliament (awaiting promulgation by the President of the Republic). This law permits creates the National Information Service, the organic law will shortly be submitted to the Council of Ministers, and thereafter a Director General will be nominated, this will ensure the means for remuneration are equivalent to a Minister.

Technical Assistance for National Information Service

These funds to finance an adviser to assist the Prime Minister in the process of structuring the National Information Services and training the Director-General.

Operational Costs for the Office of the Vice Prime Minister

The Office of the Vice Prime Minister office requires an increase in operational costs.

Further Assistance to the Petitioners

To guarantee a lasting solution to the situation of the petitioners the Council of Ministers approved a Decree Law that attributes an incentive for integration in civilian life. Those petitioners that opt for reintegration into civilian life well be paid a unique incentive payment so that they can proceed with a new civilian career. Additional funds are necessary to properly implement and coordinate this initiative with mechanisms of interaction with society and definitely finalise this process.

Funds to assist IDP's

Originally \$15 million was appropriated for Humanitarian assistance to the IDPs through the programme Hamutuk Hari Futuru (HHF). After the completion of the registration process the number of beneficiaries has increased.

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Secretariat.

Payment of Utilities for Members of Government in State Housing

All members of the Government are entitled to payment of common utilities such as water, electricity and other common services.

Rehabilitation of Housing for Members of Government and President

All members of the Government are entitled to an official residence, currently there is insufficient housing stock available for all members of the Government. These funds will be used to rehabilitate the current stock of housing which has become rundown and are unsuitable for immediate habitation.

Subsidy for rental of houses

All members of the Government are entitled to an official residence as established by decree of the previous Government. Currently there is insufficient housing stock available for all members of the Government. As a result the Government will subsidise those members who are privately renting accommodation until official houses are available.

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Secretariat .

National Celebrations

Funds are required to enhance youth participation and involvement in national celebrations in all the districts.

Support for Sporting Organisations

Support sport federations in developing financial, organisational, management and leadership skills and to train trainers, at district and sub-district level.

Regional and National sporting competitions

Support for organising sporting competitions at a regional and national level to improve team sports.

Support for Youth Initiative and Creativity Development

Funds are required for a program to support youth initiative and creativity which will develop the creative skills of youth. The funds will be allocated to support proposed youth initiatives and activities including the purchase of materials.

Establishment of representative staff in the Districts

These funds are for representative staff to implement the plan of the Secretary of State at the district level by coordinating youth, sport and art activity at district, sub-district and suco level, and to monitor activities which have already been implemented.

Preparation and implementation of the Youth Parliament

To create the conditions and prepare youth organisations and schools to elect their representatives at the district and sub-district level in order to provide exposure to and experience of the workings of a Parliamentary democracy during Parliament's recess.

Commission to Regulate Martial Arts Organisations

These funds will be utilised to monitor martial arts practices. The regulatory commission will be composed of representatives, the Ministries of Justice and Education, the Secretary of State for Youth and Sport and martial arts associations which will orient the practice of these activities certifying that they will not induce violence in accord with the law approved by the Council of Ministers (which is awaiting approval by the National Parliament).

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Secretariat.³

Installation of Biogas systems in 4 Centres

These funds will go towards establishing fixed biogas plants in Viqueque and Ermera (142 m³ which will provide electricity for 150 houses at 40 watts for each house), one in Suai (84 m³ which will provide electricity for 50 families in this district) and a small pilot project in Oecusse (with a capacity of 20m³). These plants are expected to be completed by November 2008 which will provide continuity with this Government project. The Government has successfully completed installations in Los Palos and Suai. It is expected that this will be extended to other sucos

Extension of the Energy Farming Programme

These funds are to complement funds provided in the 2008 budget for an original 39 hectares, which are currently unproductive for crops which can be used for the production of biodiesel and briquettes to be used by communities. This will increase the area to 100 hectares, for use by cooperative groups.

Production of Energy Efficient Stoves

These funds are for the production of 100 energy efficient stoves to be distributed amongst rural communities participating in the use of alternative energy sources.

Technical Assistance and Operational Costs for Research

These funds are for technical assistance to assist staff in the Secretariat of State to undertake research in Electrical Data System Analysis. Additionally, funds will also be provided for the recruitment of young Timorese to learn how to build the bio-gas centres and produce energy. It is envisaged that these young people will expand their knowledge when the programme is extended into more remote areas. There will be a Centre for Training established in Titilari for the production of mobile bio generators.

First Phase of Alternative Energy Studies

The Government will undertake a study to assess availability of long term alternative and renewable energy sources within the nation. The study will provide the Government with a comprehensive data set by which to plan future initiatives. The study is expected to be completed in 2009.

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Ministry.

Operational Costs for the new location of the Forces in the western sector

This funding will cover the expenses incurred during the operation of the Joint Command such as catering, transport and other equipment as well as installing the F-FDTL in the Western sector of the country, essentially in the districts of Bobonaro, Suai and Ermera, amongst others.

Funding for Equipment and Training for State Parade Bands

These funds are to provide equipment, uniforms and training to the Defence and Security Forces Parade Bands for State Parades.

Integrated Centre for Crisis Management

These funds will permit the creation of an Integrated Center for Crisis Management, the multidisciplinary core will be cross across the Institutions of State in order to provide a coordinated response at a national level to risks and threats which could transform into crises, including natural calamities and disasters. This Center was foreseen in the Organic Law of the Ministry of the Defense and the Security and will be integrated, also, in the Internal Security Law.

New Measures

Payment of new salaries entitlements and 13th Month of Salary to Employees of the State

In accordance with the Decree law 01/2008 of February which alters the extraordinary subsidies and creates other subsidies for the members of the PNTL and the FDTL, the military will receive supplementary remuneration. The percentages paid to members of the FDTL in regard to the extraordinary subsidy were adjusted in accordance with their military post.

In addition, public sector employees will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Secretariat.

Spare Parts for HICOM Military Vehicles

Funds are to repair and maintain of 32 HICOM military vehicles which have not been adequately maintained for some years

Multi-year Maritime Protection Program and Prevention of Illegal Fishing

The first phase will involve the construction of two coastal patrol boats and training of staff to monitor Timorese territorial waters to prevent illegal fishing.

To monitor illegal fishing in Timorese waters, the Government will invest in two boats with total cost of \$28m. The \$4m in 2008 is for initial construction of the two boats, including training Timorese personnel. The remaining \$24m is expected to be paid in 2009 upon delivery of the boats.

Counterpart funds for Construction of Portuguese Language Centre in Metinaro

These funds will provide the Government's contribution to the construction of a Portuguese training centre in Metinaro

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Secretariat.

PNTL Ranking Adjustment Costs

As per decree law 01/2008 of February 2008, the PNTL have undergone rank adjustment and reform. These funds in accordance with the Decree law 01/2008 of February which alters the extraordinary subsidies and creates other subsidies for the members of the PNTL and the FDTL, the police will receive supplementary remuneration. The PNTL posts are actually being revised. These funds will cover the subsidies until the adjustment of PNTL posts, and subsequently salary rates will be adjusted instead of having subsidies.

PNTL Screening and Retraining Evaluation Panel

To ensure that the PNTL remains professional and non-political and to prevent similar problems to the 2006 crisis, funds are required to design a screening and a retraining process for former members of the PNTL seeking to re-enter the force.

Reimbursement of Catering Expenditure Incurred during State of Siege Operations

Funds are required to reimburse catering expenses incurred while undertaking increased operational activities during the State of Siege and the State of Emergency.

Additional staff for the Fire department

Funds will enable the employment of 50 new staff in Dili and the districts.

Completion of the Fire Station in Oecussi

The fire station in Oecussi was originally costed at \$100,000 but subsequent design work has revised the costing up by \$70,000 to a total of \$170,000. Letting of tenders and construction of the building is awaiting approval of the full amount of the Fire Station.

Reimbursement of operational allowances from the Joint Taskforce paid from PNTL

Operational allowances for the members of the Joint Taskforce were funded from the PNTL operational budget. These funds must now be reimbursed to enable the PNTL to complete their planned and budgeted activities for 2008.

Payment of debts from the previous Government

Funds are required to pay outstanding bills from the previous Government which have now been verified as a legitimate debt. These bills cover EDTL charges, vehicle maintenance and purchase of uniforms.

Cancellation of the Liquica Firing Range Project

The proposed location of the Liquica Firing Range in the 2008 Budget is not suitable for safety reasons.

Additional funding for UNIMOG to the border areas

Funds of \$264,000 were provided in the 2008 budget to purchase vehicles for use in the western border areas of Suai and Maliana and in Oe-cussi. Following a tender process, it has been determined that additional funding is required.

Additional funding for water cannon vehicle

Funds of \$304,000 were provided in the 2008 budget to purchase this vehicle for the use of Rapid Response Unit in Baucau and Dili. Following a tender process, it has been determined that additional funding is required.

Construction of the Headquarters for the Special Police Unit

It is proposed that the Rapid Response Unit, the Border Control Unit, Maritime Unit and Reserve Unit be combined into one special police unit. This measure provides funds to build a single office for them.

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Ministry.

Network Management System MNE Headquarters

This is the first phase of the installation of the diplomatic communication network in central headquarters, which will allow for the Ministry to communicate with missions in Indonesia (Jakarta, Kupang and Denpasar).

Living Allowances

Increased living allowances are required for additional diplomats and for the new missions being opened by the Government of Timor-Leste, taking into consideration exchange rate changes.

Increased Rental for Overseas Missions

Increased rental is required for the additional diplomats required for the new missions being opened by the Government of Timor-Leste, taking into account exchange rate changes.

Operational Costs

These costs are to pay local staff salaries in the new missions to be opened in 2008.

International Commitments (Official State visits to/from Timor-Leste)

These funds are for anticipated state and official Visits to Timor-Leste and for visits by the heads of State and of Government of Timor-Leste abroad, the President and the Prime Minister. Funds were provided as a result of the necessity by staff of the Ministry to prepare for these numerous meetings meetings (in Timor-Leste and overseas), examples of these meetings are: Commission for Truth and Friendship, Joint Ministerial Commission with Brazil, Cuba and Indonesia and the Trilateral Dialogue between Timor-Leste, Australia and Indonesia, etc.

Open New Embassy in Brasilia

These funds are to open a new mission in Brasilia which is expected to come into operation by the end of the year.

Open New Embassy in Seoul

These funds are to open a new mission in Seoul which is expected to come into operation by the end of the year.

Open Embassy in Lisbon for CPLP/UNESCO Issues

These funds are for a separate mission to CPLP and UNESCO located in Lisbon to cover issues associated with those organizations.

Technical Assistance

Several technical advisors are being sought and are to be engaged by the Ministry to provide technical assistance in areas critical to the functioning of the Ministry of Foreign Affairs.

Technical Support for the Border Office

With respect to the border between Indonesia and Timor-Leste, the treaty on border demarcation is to be finalized by 2009. These funds will go towards providing the Ministry with technical assistance on the remaining three segments of the border which require negotiation between the two countries.

International travel for official work, including increased Daily Subsistence Allowances

Funds will be provided to cover the increased costs of overseas travel arising from higher fuel costs and the implementation of revised Daily Subsistence Allowances which reflect the rising cost of living in different cities around the world.

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Ministry.

Taskforce on telecommunications

The Government will be developing a new telecommunications policy to move towards a more competitive structure. The taskforce, which has been established with representatives from the Ministries of Finance and Infrastructure, including international experts with professional negotiating experience in the telecommunications sector, which will evaluate the current monopoly service and engage the incumbent operator in discussions. It is envisaged that the taskforce will eventually renegotiate the contract awarded to Timor Telecom, with a view to removing the exclusive rights and ensure free competition where new enterprises will be able to enter a liberalized market.

Administration of Millennium Challenge Account Bid

The Ministry of Finance will require extra funds to administer the processes surrounding the preparation of a formal submission to the Millennium Challenge Corporation, for funding of substantial infrastructure projects. Total funding required will be approximately \$3,000,000 with \$750,000 appropriated in 2008 and the remainder in 2009. The bid to the MCC is expected to be submitted in early 2009.

Printing costs for Ministry of Finance Documentation

Funds are provided to cover the printing and dissemination of critical ministry documentation to the public, including the Budget.

Preparation of 2009 Census

Funds have been allocated to support the preparation of activities necessary to conduct the 2009 Census.

Integrated Border Control Facilities - Phase One of a Multi Year Program

This will fund the initial phase (design and planning) of the integrated border control facilities. These will cover all border functions, namely Immigration, Customs, Quarantine, Transport and Police. The co-location of services will improve efficiency and working conditions.

Rehabilitation and Furnishings for Building 5 and temporary Customs Accommodation

As a result of the previous crisis, Customs lost its building and this has not been replaced. The new Government structure required the movement of a large number of tax staff from the Ministry of Justice to Building 5. As a result, refurbishment of the derelict Kobe houses is required to provide more space. New training and HR development has also required the construction of the new Kobe houses. Funds will be provided for the rehabilitation and purchase of furniture for Building 5 (Palacio do Governo), and other accommodation of the Ministry of Finance and the provision of temporary accommodation for Customs and Tax.

Records management and Accountability Systems – Phase One of a Multi Year program

As part of the ongoing reform of financial processes within the Ministry of Finance, funds are required to purchase an archival management system (to protect from fire) to ensure high levels of probity and information on file.

New Measures

Economic Stabilisation Fund

Global commodity price have increased dramatically during the past few months. At the recent international summit on the global food situation in Rome, over 180 nations agreed that food prices would remain around their current levels over the medium term. So far in 2008 higher prices have had a negative impact in many countries, producing social unrest and instability in some. As a developing economy that still has high levels of food insecurity, higher prices for essential food commodities could have a serious impact on lives and health of the people of Timor-Leste. Rising prices for construction material are also a cause for concern as this could delay or impede the development plans of the Government and deter the investment by the private sector. To reduce the potential impact of large price shocks for food and essential construction materials on the economy and people of Timor-Leste, the Government is requesting additional funds to establish the Economic Stabilisation Fund (ESF). The fund has three aims:

- Ensure security of food supply;
- Price stabilisation via market intervention; and
- Ensure the supply of materials for construction

This will enable the supply of critical commodities at affordable prices and to ensure the continuing development process.

Contingency Fund

A large amount of the original appropriation for the Contingency Fund was utilised due to the unforeseen security situation which arose in February 2008 – for example the operations of the joint PNTL / F-FDTL task force in the months of February to May. As a result, the Contingency Fund for 2008 requires replenishment.

Local and Overseas Travel expenses, including increased Daily Subsistence Allowance.

These funds are to cover of necessary overseas travel by both Government Ministers and civil servants. This includes an adjustment for the increased costs of overseas travel arising from higher fuel costs and the implementation of revised Daily Subsistence Allowances which reflect the rising cost of living in different cities around the world and changes to exchange rates.

Fuel for the Comoro Generator

These funds are required due to the increase in oil prices to ensure ongoing supply of electricity to Dili.

Fuel for Districts (excluding Dili)

These funds are required due to the increase in oil prices to ensure ongoing supply of electricity to the Districts.

Taxes on Rice Imports

As one of the activities of the Economic Stabilisation Fund (discussed below), the Government will support the supply of critical commodities such as rice to the domestic market in Timor-Leste. These funds will cover the Government's legal obligation to pay tax when it imports rice and other commodities.

Assistance to the people of Myanmar

The Government wishes to demonstrate solidarity with Myanmar by offering this support to the people of Myanmar whose lives have been affected by the recent natural disasters.

Assistance to the people of China

The Government wishes to demonstrate solidarity with China by offering this support to the people of China whose lives have been affected by the recent natural disasters.

Pensions for the Combatants of the National Liberation

The rate of the pensions foreseen for the Combatants of the National Liberation in the 2008 State Budget was understated, being below of foreseen in the Law n.º3/2006 “Statute of the Combatants of the National Liberation “, which establishes the criteria of financial support. After a meeting between the veterans and former leaders of the resistance with the Deputies from Commission A of the National Parliament, at the beginning of this year, it was determined that the values established in the cited Law would apply. There will also be in Díli, two national meeting of former-leaders of the resistance with the objective to proceed to the finally confer on the data and the selection of the beneficiaries which will result in a decrease of beneficiaries The Government allocated funds to complete the payment of these pensions, in accordance with these developments.

Support for Professional Employees in the Public Sector

These funds will be used to support key professionals in the public sector, including magistrates in the judicial sector, health professionals, university lecturers and other senior officials.

Outstanding Debts from Previous Governments

The Government has been promoting dialogue with the private sector so that they are part of the National Development. As a consequence of these meetings a list of outstanding debts from previous Governments was provided, which within the the current financial reform ambit will require review. The Government will identify, analyse and validate invoices and where justified pay the debts.

Support for transport and burial of the remains currently of former guerrillas

In 2003 the armed forces dug up the remains of former FALANTIL guerrillas and brought them to the Nicolau Lobato Instruction Centre, awaiting a decent burial. As part of the Government's commitment to recognising the needs of the security sector and the dignity of the veterans of independence, the Government wishes to bring this unsatisfactory situation to an end. The Government will allocate funds to enable families to transport and re-bury their dead in a suitable new location, including the Heroes' Cemetery in Metinaro. This measure was further increased by the National Parliament during the plenary by a total of \$20 million.

Transfer Centralised funds to APORTIL to operate the Berlin-Nakroma Ferry

The 2008 Budget centralised all funding for fuel, including that required for the operation of the Berlin-Nakroma ferry. These funds will now be located within APORTIL, which has responsibility for managing the operation of the service.

Supplementation for pensions to ex-title holders

Ex-title holders are entitled to receive a pension from the State. Expenditure has been higher than expected and this is to cover an anticipated shortfall in 2008.

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Ministry .

Passport Production Services

Funds will be used for equipment purchase and installation and other requirements for issuance of the new digital passports.

Repairs to the external security wall at Becora Prison

The current wall at Becora Prison is not secure. This funding will build a new secure perimeter wall around the prison, including guard posts at each corner.

Becussi Cemetery Relocation Related Expenses

Funds are required to prepare the land for use as a cemetery. It may also be necessary to relocate people who are currently occupying the land

Technical Assistance for Land Laws

Funds are required to engage legal advisers to assist to preparing legislation on land issues.

Second Phase Demographic Information Management System

Additional funding is required to complete the installation of a Demographic Information Management System.

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Ministry.

Continued Employment of Temporary Staff

This will enable the continued employment of 400 temporary staff including nurses, midwives, medical physicians and other allied professionals to assist in the provision of basic services to communities in all districts. These staff will be employed in local health centres and clinics across the country.

Staff for the New Referral Hospitals

Funds will be used to recruit 85 temporary staff including nurses, midwives, physicians and other related professionals to assist with the increasing workload at the new referral hospitals in Baucau, Maliana, Maubisse, Oecussi and Suai.

Purchase of drugs for hospitals

Funds will be used to purchase drugs for hospitals to replenish depleted stocks. Supplies have been depleted due to higher than anticipated sickness during the extended rainy season as well as delays in the combined sources allocation for the SAMES project.

Increased Fuel

Funds will be used to purchase generator fuel for the new referral hospitals and doctors' accommodation quarters. Funds will also be used to buy fuel for the additional multipurpose vehicles and cover the increases in fuel costs.

Maternal and Infant Health programme

This program will focus on delivery of five policies to improve child and maternal health. These include the safe motherhood program, family planning services, Integrated Management of Childhood Infection (IMCI), youth reproduction services and immunization.

Nutritional support for Mothers and Infants

The Government is taking on responsibility for the continuation of Nutritional support for mothers and infants, formally a World Food Program initiative. Funding will provide milk, plan-peanut and fortified local produce.

Replacement of IT equipment

These funds will purchase new IT equipment to replace old equipment in 65 sub District community health centres and 5 referral hospitals. The equipment will be used to record data for the Health Information System.

Construction of Health Post in Suco Mauchiga

Currently the health facilities in Suco Mauchiga are being provided in non-purpose built facilities. These funds will build a specific health clinic within the Suco Mauchiga.

Construction of Health Post in Suco Ailico

Currently the health facilities in Suco Ailico are being provided in non-purpose built facilities. These funds will build a specific health clinic within the Suco Ailico

Construction of CT Scanning room at Dili National Hospital

This will provide for the construction of a CT scanning room. CT scanning equipment has been provided by the Government of South Korea. The room will also accommodate two renal dialysis units.

Purchase of 26 multifunction vehicles for health centres

Funds will be used to buy 26 multifunction vehicles to replace out-dated vehicles in the districts.

Catering for hospital patients

These funds are to supplement the insufficient funds for catering, cleaning, printing and security services for the major referral hospitals in Dili and Baucau as well as community health centres with inpatient facilities

Rehabilitation of 2 classrooms of Nursing School in Lahane

Funds will be used to rehabilitate two classrooms to improve the training opportunities for nursing students.

Health Boat Ambulance for Atauro

A new boat is required as the previous one is in poor condition.

Motorbikes for Rural Access to Health Services (ten)

Ten motorbikes will be purchased to facilitate rural access to health services in Manatuto, Viqueque and Maliana.

Purchase of Additional Horses for Access to Remote Areas

These funds are to purchase horses to facilitate rural access to health services in the remote areas of Viqueque, Aileu, Ainaro and Maliana.

Increased Vehicle Operation Costs

Additional funds are required to meet the increased cost of fuel as well as additional maintenance for existing and new acquired vehicles operating in the districts.

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Ministry.

Repairs to Schools Damaged by Storms

Funds urgent repairs for approximately 30 schools damaged by unexpected bad weather during the wet season. These repairs are expected to be completed within 3 months. Repairs will be undertaken within local communities and where possible sourcing local labour and local materials.

Expansion of School Feeding Programme

Funds are required to expand school feeding program in primary schools to all districts with the aim of improving nutrition, attendance and academic achievement. Currently the Government is responsible for 6 districts (Liquica, Ainaro, Ailieu, Viqueque, Lautem, Manufahi). Until March the WFP was providing food for the remaining districts. In April the Government assumed responsibility for 4 (Baucau, Bobonaro, Oecusse, Suai). These funds will cover the 4 additional districts. The WFP will still conduct logistics. The regional offices will become responsible for implementation of the programme

Counterpart funds for teachers from Government of Portugal

These funds are to cover the costs of bringing Portuguese teachers to provide intensive teacher training to Timorese teachers.

Counterpart funds for teachers from Government of Brazil

These funds are to cover the costs of bringing Brazilian teachers to provide intensive teacher training to Timorese teachers.

Increased Funds for UNTL Research Activities

Increased funds are required to enable UNTL lecturers to undertake research in their field of expertise.

Intensive Teacher Training Pilot Programme

Funds are required to pilot an intensive 90 day teacher training program to commence July and finish in September to enable the curriculum to be taught effectively in the official languages of Timor-Leste. 3000 teachers will require training, plus another 1,500 will complete their bachelor degrees. Costs will include accommodation, food allowances, teaching materials, transport and car rentals for teachers. Both teachers and trainees will be accommodated in the districts and all districts will be covered.

Decentralisation of Operations to Regional Offices

Funds are required to decentralise to the newly created five regional offices, including recruitment of some additional staff. It is intended that that the central agency will continue to deal with policy issues while regional offices will have responsibility for implementation. District inspectors will be in charge of 5-6 inspectors who will be in charge to up to 10 schools. Staff will be regionally located.

Vehicles for Regional Inspection Offices

Funds are required to purchase 50 motorcycles for regional inspection offices to enable them to inspect and ensure quality of teaching is being maintained across the country.

Funds for Cultural Activities

These funds are for cultural activities at National, regional, district and sub-district level.

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Ministry.

Increased expenditure for Suco elections in 2008

Additional funds are required to administer those suco elections in which are expected to be held around November 2008 assuming approval of the new Suco election law by National Parliament.

Municipality Preparatory Teams

Funds are required to pilot municipality preparatory teams in districts as part of the initial phase of the decentralisation process.

Suco festivals on National Days

Funds to support sucos in running festivals (sporting competitions, cultural activities) as part of the celebration of national days.

District festivals on National Days

Funds to support districts in running festivals (sporting competitions, cultural activities) as part of the celebration of national days.

Incentives and Subsidies for Suco Members

In 2006-07 \$15 was allocated for all suco members per month. However sucos in the districts of Lautem, Manatuto and Baucau did not receive the payment that was due to them for this period. These funds are just to complete these payments. Suco members now receive \$25 per month and Chefes de Suco receive \$35 per month.

Construction of Sanitation Facilities at Comoro Market

Comoro Markets was built as part of the SEP II 2006-07 project but did not include sanitation facilities. Additional funds are required to complete this work.

Annual Suco Exemplary Performance Awards

The Government will provide an annual prize to the suco who has contributed most towards the development of their community. This can include activities in areas of security, public health, education, environment management, local administration and development.

Funding Rubbish Collection Dili

These funds are required to allow the Dili administration to ensure rubbish collection services in Dili.

Rubbish Management for districts

These funds are required to allow the districts administration to ensure waste management services are delivered in all districts.

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Ministry.

Local technical assistance to the Ministry

There are currently twenty staff who working within the Secretariat of State for Rural development. These staff were previously financed via the World Bank SEPII programme which finished in December 2007. These people will be employed by the Ministry to continue to provide support on rural development issues at the District level and to also incorporate people in rural areas in the development of future programmes in the Secretariat. The Ministry will also have an additional 59 employees to assist it to achieve its overall objectives

Counterpart Funds for Environmental Programme with GTZ

These funds will be counterpart funds to GTZ

Construction of Three Rural Markets in Ermera

Ermera has been an area which has suffered from the recent security problems. Funds will be provided to commence activities which will bring the district back to normality. The construction of the three rural markets will provide employment opportunities for people and community participation in market activities.

Building Complex for Recycling Used Oil (First Phase)

These funds are for a complex to collect used oil which is dumped or stored inappropriately. Approximately 10,000 litres of used oil is discarded in Timor-Leste. This complex will either be situated in Tibar or the Industrial Zone of Colmera. \$300,000 will pay for the initial design and foundations the remaining \$300,000 in 2009 will pay for the completion of the construction which is scheduled for 2009.

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Ministry.

Old Age Pensions

The original estimate of 32,000 beneficiaries was based on the 2004 census. Since then a verification has been undertaken, including fieldwork, which has led to a doubling of the number of beneficiaries to 70,000, each receiving \$20 per month.

Support to final year University Students

The Ministry of Solidarity has received requests through the Office of the PM for assistance from students who are unable to complete their final year of studies. These funds will enable them to complete their need for financial support to finish their studies.

Material for Construction of Houses which have been destroyed due to Natural Disasters

During the rainy season, stormy weather destroyed a number of houses. These funds are to provide materials to the households which suffered loss of their home due to the natural disaster.

Purchase of Motorbikes

Funds are required to purchase 13 motorbikes to supplement the logistics of those responsible for data collection and verification and pension administration.

Administration of Veterans Payments

Funds are required for additional staff and technical assistance to administer the increased number of veteran pensions.

Operational Funds to Manage Old Age Pension Database

Funds are required to recruit 13 staff to manage data relating to old age pensions.

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Ministry.

Flood Control Designs

To reduce the impact of flooding during the rainy season, flood control designs will be undertaken for the Lacro, Maumeta, Lauhata, Laleia, Karau Ulun, Cassa, Loumea and Sahen rivers.

Controlling River Flow

To reduce the impact of flooding during the rainy season, work leading to control of river flows will be undertaken for the Lacro, Maumeta, Lauhata, Laleia, Karau Ulun, Cassa, Loumea and Sahen rivers.

Rehabilitation of three bridges in the districts

These funds are required to rehabilitate bridges across the Mota-Ain and Aidabaleten (both in Bobonaro) and the bridge across Dai-Soli (in Aileu).

Comoro Bridge Project Design

Traffic in Dili is increasing daily and to reduce congestion on Comoro road, the Government will build 2 additional bridges: one beside actual Comoro Bridge and one in Aimutin, connecting to Aimutin main road.

Road Rehabilitation in Dili

These funds are required for rehabilitation of major identified streets in Dili.

Rural Road Rehabilitation

Funds are required to continue the first phase of rural road rehabilitation.

Project Design

Funds for design and supervision of new Building construction for Secretary of State for Security (13 units), Ministry of Justice (1 unit), Ministry of State Administration (8 units), Ministry of Finance (3 units) and Ministry of Agriculture (1 unit).

First Phase Infrastructure Study

These funds are to cover a strategic infrastructure study which will be undertaken over two years, costing a total of \$5m. The first instalment of \$1m will be paid this year.

Pedestrian Walkways and Improving the Gardens at Colmera

Improvement of Dili city pedestrian traffic by building better walkways and the renovation of Colmera garden.

Emergency Road Funding

Recent storms caused extensive damage to roads and emergency repairs cost \$2.8m. These unanticipated costs need to be covered and a contingency fund provided for the months of November and December.

First phase of power generation and transmission infrastructure

Funds are required to cover the initial phase of design and construction for power plants to meet the power needs of the whole country in the medium term.

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Ministry.

Purchase and promotion of Agricultural Produce

The Government will offer farmers incentives to increase productivity which will then increase food security, reduce reliance on imports as well as help to develop exports. This will also include an intensive effort to promote local production for market, eventually leading to exports.

Funding for Construction of Border Traditional Markets

Funds to construct traditional markets in Bobonaro and Oecussi. A bilateral accord between Indonesia and Timor-Leste was signed in 2004 to enable traders in both countries living in near proximity to the border and with appropriate identification be able to trade freely. This construction is expected to stimulate economic activity in Timor-Leste.

Support for Institutions for Industrial Development

Funds to allow students to develop skills in small scale industries.

First phase of the construction of silos for Warehousing food supplies

Funds are required to enable the Government to increase its own storage capacity for future purchases of essential commodities.

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Ministry.

Employment of Additional Extension Officers

These funds are for the recruitment of an additional 300 staff including 188 extension officers, 15 senior extension officers and 97 support staff. They will initially be employed for the last 6 months of 2008 and will be based in Sucos to disseminate information on improved agricultural practices including improved health of livestock.

Motorcycles and Vehicle for Extension Officers

These funds are for the purchase of 77 motorbikes to assist the newly employed extension officers throughout the sucos and for one one pickup truck.

Purchase of Inputs (Seeds, tools, pesticides, fertilizers)

These funds will be used as agricultural inputs for farmers. Inputs such as fertiliser, pesticides and seeds of high yielding strains of rice, wheat, soy beans, long beans and corn will be purchased to ensure increased agricultural output in the future.

Maintenance and repair of Irrigation Systems

Funding to repair and maintain 28 irrigation systems in 11 districts to improve agricultural sustainability and productivity.

Purchase of Tractors and Equipment, Phase One of a Multiyear Program

Funds to purchase 200 tractors, 2,000 hand tractors and accessory equipment totalling \$17m. The Government will purchase 50 big tractors and 750 hand tractors in 2008 totaling \$5m in the first phase to contribute to increased productivity in the agricultural sector.

Construction of Eight Regional Agricultural Facilities Maintenance Centres

The construction of agricultural facilities and maintenance centres will ensure services are provided close to the farmers.

Animal Traction Equipment

Funds are required to purchase 100 head of cattle to plough the land as part of the strategy of using local farming methods.

Funding to Control Illegal Logging and Deforestation

Funds to support operational activities in order to control illegal logging.

Operational Costs of the Eight Regional Agricultural Facilities and Maintenance Centres

Funds to pay mechanics and tractor drivers to operate and provide the services to the farmers in the regional agricultural facilities and maintenance centres.

Technical Irrigation Studies

Funds to undertake a comprehensive national study on all available irrigation schemes and areas requiring irrigation.

Heavy Equipment Purchase

Purchase heavy equipment such as excavating and loaders to assist in large scale agricultural development.

Irrigation Operational Costs

To ensure optimal irrigation, funds are required to pay salary for excavator or equipment operators, assistant operators and mechanics. The funds are also to be used to pay the cost of equipment maintenance, to buy fuel and allow payment of per diems to staff.

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Prosecutor Generals Office.

Funds to establish a Forensic Unit

Funds will be used to purchase specialised forensic equipment to enable the Prosecutor General to conduct forensic investigations, including for narcotics, ballistics and autopsies. Some of these services are currently provided by Australia and the USA but not all are available internationally. This funding will enable Timor-Leste to conduct the full range of forensic investigations independently.

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Office of the Provedor.

Construction of two Kobe Houses

The Provedor has insufficient space for its current staff. The additional Kobe houses will improve the functioning of this Office. Space will be provided for meetings rooms to ensure confidentiality and privacy for victims, witnesses and complainants.

Technical assistance on Engineering, Rights and Economics

Technical assistance will be engaged to provide advice to the Office of the Provedor over the next six months to assist in conducting investigations into governance issues and quality control.

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Public Broadcaster.

Additional funds for security of RTTL facilities

Funds will provide for security services at the RTTL Dili office and District centres. This will enable 24 hour security of RTTL's equipment and transmission centres. RTTL has previously had no budget for this service.

Construction of two Kobe Houses

RTTL currently has no room to store its archival material. These funds are required to build new Kobe houses in the RTTL Dili Office to ensure archive material is safely stored and accessible to staff.

New Measures

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Electricity of Timor-Leste.

Transport of generator fuel in the Districts (excluding Dili)

Funds to transport generator fuel for generators in Comoro, Baucau, and other districts and sub districts

Transport of fuel for the Central Comoro Generator

Transport to deliver fuel to Comoro Power Station

Overhaul of the Comoro Generator

Overhaul of 5 CUMMINS Generators in Comoro.

Generator Parts and Tools

To provide parts and tools in EDTL warehouse for Nigata, Caterpillar and Cummins generators.

Overhaul of District Generator

These funds are to overhaul 14 generators in the districts of Baucau, Manatuto, Gleno, Suai, Los Palos and Bobonaro

Overtime for Staff

Overtime for Comoro power station staffs and for crews available at off-hours to handle trouble calls from districts and sub districts.

Routine Maintenance of District Generators

Funds are required for routine maintenance to improve and maintain sustainable electricity services to consumers.

Clearance of Distribution Cables in Dili

These funds are to maintain and clear the vegetation growing into contact with MV distribution lines causes several problems within the system that range from line losses to reduced power quality and public safety.

Security at Central Comoro Station

This requirement has been identified as a high priority because of the ease with which fuel was stolen in January 2008, the lack of security infrastructure to prevent unauthorized access to the facility, and the exposure of this critical infrastructure.

Changing the Electricity Posts on Comoro Rd

Comoro road was widened to improve traffic flow. As a result 32 poles are now situated on the roadway. These poles are a hazard to the public and are susceptible to being hit by a vehicle which in turn could cause a lengthy feeder outage. These funds are required to relocate them.

Purchase of Various Electrical Equipment

EDTL will purchase and stock of 3,000 new meters to complete the meter replacement program scheduled for this year. Equipment such as medium voltage and low voltage equipment and materials (poles, transformers, assemblies, etc), safety equipment, an low voltage distribution board locks will also be acquired.

EDTL Communication Equipment

The additional funding is required to purchase radios for vehicles to support distribution and commercial operations. Communication is a fundamental necessity in the operations of an electricity utility. Failure to provide work crews with adequate communication will result in inefficient operation and may lead to accidents involving both staff and the general public.

Payment of 13th Month of Salary to Employees of the State in 2008

All employees of the State will receive a bonus payment equivalent to one month of salary including any regular allowances which are received. This is scheduled to be paid in December 2008. These funds will cover all temporary and permanent employees in the Ports Authority.

Funds for Fuel for Berlin-Nakroma

Additional funds for fuel costs for the Berlin-Nakroma are required to maintain the service. These funds were transferred from the Ministry of Finance to APORTIL.

Costs for the operation of the Berlin-Nakroma

Currently the Berlin-Nakroma operates a regular service between Oecussi the island of Atauro and Dili. Currently the operation does not recover enough revenue to cover the costs of providing a regular service. These funds will cover costs such as fuel and other goods and services such as personnel hired to operate the craft.

Annex 6 Budget Law

DEMOCRATIC REPUBLIC OF TIMOR-LESTE

PROPOSAL OF LAW N.º /2008

of June 2008

First amendment to Law No 10/2007, of 31 of December, which approves the General Budget of the State for 2008

The present Law aims to complement and bring up to date the General Budget of State for 2008.

The Budget Rectification encapsulates an update of revenue and expenditures of the State of Timor-Leste.

Annex I establishes the estimated total of state revenues from January to December 2008 derived from all sources: petroleum, non petroleum, funds from development partners, autonomous agency charges and other revenue. The total estimated revenue from all of these sources is now US\$2,025.6 millions.

The Annex modifies the budgetary appropriations for each Agency of the State systemised in the following form:

1. \$58.884 Million for Salaries and Wages;
2. \$447.409 Million for Goods and Services;
3. \$39.249 Million for Minor Capital;
4. \$115.553 Million for Capital and Development;
5. \$ 112.217 Million for Public Transfer Payments.

The total budget appropriations are \$773.312 million.

Excluding the autonomous agencies, the total budget appropriations for the GBS is \$750.996 million.

The Treasury Account of the State includes all the revenue and expenditure of the “Autonomous Agencies” which are self financed, nominally, Electricity of Timor-Leste (EDTL), the Aeroports and Air Navigation Administration of Timor Leste, the Ports Authority of Timor-Leste and the Institute of Equipment Management. The revenue from those categories is included in the appropriations for “Revenue Collections for Autonomous Agencies” at Annex I, whilst proposed budget expenditure is shown at Annex III.

Total estimated expenditure for the self financed “Autonomous Agencies” in 2008 is \$22.346 million (including an additional amount transferred of \$15.358 million which is transferred from the Central Government, with an end to subsidising expenditures which are superior to estimated revenue).

The total estimate of expenditure for the GBS is \$773.3 million, estimated non petroleum revenue is \$86.5 million. The non petroleum fiscal deficit is \$686.8 million.

The Government presents to the National Parliament under the cover of line c) of No 1 of Article 97 and No 1 of Article 145 of the Constitution of the Republic the following proposal of law:

Article 1.º

Alteration of the General Budget of the State 2008

- 1- The GBS for 2008 approved by the Law No10/2007, of 31 December is altered in relation to the tables contained at Annexes I,II and III, to this law, the terms of following articles shall be included.

- 2- The Alteration referred to in the previous number, constant with the tables of Annex I, II and III the present law substitutes those tables in Annexes I, II and III of Law no 10/2007 of 31 December
- 3- Articles No 4 and 8 of Law No 10/2007, of 31 December, will now have the following wording:

“Article 4.º

[...]

In terms and for the effect of the use in Article No 7. of the Law n.º 9/2005, of 3 of August, the sum of transfers from the Petroleum Fund for 2008 shall not exceed the 686.8 million US dollars.

Article 2.º

Amendment to the General Budget of State for 2008

É aditado um novo artigo 2.º-A, com a seguinte redacção:

“Article 2.º-A

Budget for Pluri-Annual Investments

1. The budget for multi-year investment projects applies to projects with a horizon superior to one year in duration.
2. The multi year investment plan lists all the projects of this nature, and discriminates the annual budget impact during the life of the project.
3. The elaboration of the annual multi-year plan must take into account the budget execution of the previous year.

4. The total expenditure for multi-year projects constant with Annex IV of the present diploma is approved, of which it is an integral part.

Article 3.º

Entered into Force

The present law will enter into force immediately after the publication in the Journal of the Republic, with effect from 1 July 2008.

Approved by the Council of Ministers 18 of June of 2008,

The Prime Minister,

(Kay Rala Xanana Gusmao)

Annex I

Estimate of Revenue Collected in the Rectified Budget of State for 2008⁴

(US\$ million)

1.	Total Revenue	2,025.6
1.1.	Petroleum Revenue	1,939.1
1.1.1.	Petroleum Profits Tax	976.7
1.1.2.	Timor Sea Royalties	143.2
1.1.3.	Income Tax	266.5
1.1.4.	Additional Profits Tax	441.6
1.1.5.	Other Taxes and Petroleum Revenue	17.9
1.1.6	Interest from the Petroleum Fund	93.3
1.2.	Non Petroleum Revenue	79.5
1.2.1.	Direct Taxes	12.8
1.2.2.	Indirect Taxes	17.5
1.2.3.	Other Fees and Charges	45.9
1.2.4.	Interest from the Treasury Account	3.4
2.	Grants from Development Partners	0.0
3.	Autonomous Agency Revenue	7.0

The totals presented may not sum exactly as they are unrounded.

Annexo III

Autonomous Agencies which are partially self funded by own revenue collections for 2008

Annex 8 – Report from Deloitte Touche Tohmatsu

Ministry of Finance
Democratic Republic of Timor-Leste
Edificio No. 5, Res-do-Cao
Palacio do Governo, Dili, Timor-Leste

For the attention of: Ms. Emilia Pires, Finance Minister

Dear Madam

Report on Factual Findings relating to the estimated reduction in the Estimated Sustainable Income (Article 9)

In accordance with Amendment #03, Contract No. RDTL 06-08-184-C-0448 dated 16 May 2008 we have performed certain agreed upon-procedures solely for the purpose of providing a report to the Government of the Democratic Republic of Timor-Leste in accordance with Article 9 (c) of the Petroleum Fund Law 9/2005. Our engagement was performed in accordance with the International Standard on Related Services (ISRS) 4400 *Engagements to Perform Agreed-upon Procedures Regarding Financial Information*. This report should be read in conjunction with our contract which sets out the basis on which our work was performed.

Scope of work and statement of responsibility

At your request and agreement, we performed the procedures set out in the table below. The scope of our work was limited solely to those procedures. You are responsible for determining whether the scope of our work is sufficient for your purposes and we make no representations regarding the sufficiency of these procedures for your purposes. If we were to perform additional procedures, other matters might have come to our attention that would be reported to you.

This report should not be taken to supplant any other enquiries and procedures that may be necessary to satisfy the requirements of the recipients of the report.

The procedures we performed did not constitute a review or an audit of any kind and we have not expressed any opinion or drawn any conclusions on the procedures we have performed. We did not subject the information contained in this report or given to us by the Ministry of Finance to checking or verification procedures except to the extent expressly stated below. This is normal practice when carrying out such limited scope procedures, but contrasts significantly with, for example, an audit. The procedures we performed were not designed to and are not likely to have revealed fraud or misrepresentation by

the Ministry of Finance. Accordingly, we cannot accept responsibility for detecting fraud (whether by management or by external parties) or misrepresentation by the management of the Ministry of Finance.

This report is provided solely for your exclusive use and solely for the purpose of satisfying the requirements Article 9 (c) of the Petroleum Fund Law 9/2005. Our report is not to be used for any other purpose, recited or referred to in any document, copied or made available (in whole or in part) to any other person without our prior written express consent. We accept no duty, responsibility or liability to any other party in connection with the report or this engagement.

Procedures and Findings

Procedures	Findings
<ol style="list-style-type: none"> 1. Obtain the underlying calculations which support the report of Government that is to be provided to Parliament pursuant to Article 9(b); 2. Agree the calculation methodology to the Estimated Sustainable Income calculation for the Mid Year Budget 2008 as previously obtained by the Deloitte; 3. Obtain the value of the proposed Government transfer being an amount in excess of the Estimated Sustainable Income calculated by the Government for purposes of the Mid Year Budget 2008 and agree the value to the updated underlying calculation, which incorporates the proposed Government transfer; 4. Reperform the calculation of the estimated reduction in the Estimated Sustainable Income for the Fiscal Years commencing 1 January 2009 that results from the proposed Government transfer from the Petroleum Fund in Fiscal Year 2008; 5. Provide a report to Government in accordance with Article 9(c) of the Petroleum Fund Law 9/2005. 	<ol style="list-style-type: none"> 1. The underlying calculations which support the report of Government to be provided to Parliament pursuant to Article 9(b) were obtained from the Ministry of Finance on 27 May 2008. 2. The calculation methodology was agreed to that of the Estimated Sustainable Income calculation used for the Mid Year Budget 2008 as previously obtained by Deloitte. 3. A proposed Government transfer of US\$686.8 million was advised by the Macroeconomics Department of the Ministry of Finance to Deloitte and is noted to exceed the Estimated Sustainable Income of US\$396.1 million as previously calculated by the Government for purposes of the Mid Year Budget 2008, by US\$290.7 million. The US\$686.8 million was incorporated into the updated underlying calculation. 4. The calculation of the estimated reduction in the Estimated Sustainable Income for future Fiscal Years commencing 1 January 2009 was reperformed without exception. The estimated reduction in the Estimated Sustainable Income in each future year from 2009 to 2025 ranged from US\$8.9 million to US\$9.5 million over the period as set out in Appendix A. 5. Report herewith.

Annex 9 – Letter to the National Parliament from the Prime Minister

REPÚBLICA DEMOCRÁTICA DE TIMOR-LESTE

GABINETE DO PRIMEIRO-MINISTRO

(Translation of the letter to HE President of the National Parliament)

Your Excellency
President of the National Parliament
Mr. Fernando Lasama de Araujo
National Parliament
Díli

Excellency,

I would like to present to Your Excellency the reasons upon **Transfer of Funds from the Petroleum Fund**. As You know the Government's review of the 2008 Budget has determined that an amount of funding greater than Estimated Sustainable Income is required to respond to existing and emerging issues. Accordingly, in line with Article 9 of the Petroleum Law, this letter outlines the justification of why these funds are required for the long term interests of Timor-Leste and its citizens, as well as a detailed report on the impact of the larger transfer on calculations of ESI in future years (Annex A).

The Government believes that locking all of the fund up in an overseas account, when there are so many social, economic and infrastructure challenges here in Timor-Leste is probably not the best investment it can make. However, the Government fully accepts that it remains important to ensure that the economic value of the asset is preserved for all future generations. The Government recognizes the need to maintain a responsive and prudent management of the asset to ensure that future generations can have the benefit of the petroleum resource. It is possible to achieve both the need to invest now with the need to maintain a valuable asset for the future. This can be done through a strategy that maximizes the revenues from the petroleum sector with greater efficiency and by embarking on a new mixture of save and spend options. Our core aims remain as before, namely:

- Save sufficient resources, and invest it wisely (and probably less conservatively) to ensure that the recurrent needs of the country can be met into perpetuity.
- Spend part, but in a disciplined and accountable manner in the national interest, on investments such as health, rural development, education and training. These investments cover social, physical and economic infrastructure that have economic returns in future years.

The pre-requisites for development include social stability and the provision of core infrastructure. In the years immediately after independence Timor-Leste has a period of apparent social stability. During that time the need for a very conservative policy on the Petroleum Fund seemed to make sense. However, the crisis in 2006 showed that the country still faced many social challenges, the reasons for the crisis were complex with political, institutional, historical, social and economic dimensions.

The crisis had a deep impact on the economy. Supplies of goods into the country slowed down, prices rose and many people suffered. The economy shrunk by 5.8%. It has taken nearly two years to recover from the effects of the crisis, however although we have seen a significant recovery Timor-Leste, remains extremely fragile especially if we consider the root causes of the crisis were also social and institutional.

Just how sensitive Timor-Leste is to these issues was demonstrated in February this year. These events combined with the sudden and rapid rise in food prices means that the Government of today faces significant challenges – more significant than it has faced at any time since independence.

In addition to these inherent problems we also face a new external global threats that are also damaging national development. The Government is committed to listen and reply to the needs of its people. These needs demand a more flexible approach. This is why if we to maintain social stability, build our institutions and continue to develop the country we need a more flexible approach in terms of the management of our resources. We need to be able to react to crisis quickly so that our economy does not collapse like it did in 2006. We cannot afford for our economy to shrink by another 5.8% and then wait another two years for it to recover. We need to increase investment in both social and physical capital now. We need to rapidly build our institutions and core infrastructure and to do this will require immediate investment. We cannot repeat the mistakes of the past by failing to react to the wide range of social, institutional and economic needs of our people. We need to invest the revenue from the resources which belong to the people for the benefit of the nation. We need to do this now if we are to continue with the nation building process we began after independence.

The Government has already outlined its strategic direction for the country, based around re-establishing security and social stability and building the core economic infrastructure required for development. Our strategy focuses on the following:

- economic growth;
- reforming the management of the State;
- development of youth and national human resources;
- provision of solidarity, health and social protection;
- improving infrastructures and living conditions;
- promoting equality and tolerance, internal security and strengthening democracy; and
- national defence and foreign policy.

The problems Timor-Leste is facing are not simple – many sectors have a critical need for better infrastructure, improved programs and further training and skills development. Our public service is new and faces many technical and managerial challenges.

In the case of education for example, there are villages with no school buildings and villages that have school buildings but not enough teachers, or not enough books. The Government is working to build and repair schools, supply books and equipment, provide school lunches to students, train and supply teachers –

Liability limited by a scheme approved under Professional Standards Legislation.

while at the same time completing the national curriculum and accreditation progress that will govern the whole education sector. All these elements are important if children are to receive a proper education – the Government cannot wait to provide items one by one.

The different sectors of the country also impact on each other. There are overarching issues such as roads and bridges which will effect the success of many other programs. Even when there are schools, books and teachers, the people must be able to access them. A good hospital with doctors and nurses will not help a patient who cannot cross a flooded bridge.

Complex problems require new solutions

The Government has realised that some of these complex problems cannot be addressed piece by piece – school by school, bridge by bridge. In some cases, there is not enough time. If it takes five years to build the schools, set the curriculum and train the teachers – many children will be disadvantaged. Also, in some cases, unless all the different elements are addressed at the same time, there can be no successful solution.

For example, one of the main priorities of the Government upon assuming office was to improve the security environment. This single issue was the most significant problem for the country –impacting on the lives of the citizens of Timor-Leste and on the opportunities for development. The security situation was preventing some students from attending school and people from attending their place of work. Some schools and businesses were closed, transport did not run, crops were not planted and people could not rebuild damaged houses or infrastructure.

In 2007, the greatest concern and the highest priority for the people of the Timor-Leste was security. The lack of stability was interfering with people's quality of life and slowing the development of the country. There was no simple solution to these problems, but the Government committed itself to resolving the underlying issues – listening to the concerns and needs of the petitioners, resolving the issue surrounding the IDPs, consulting widely and seeking to create a harmonised process that would heal the wounds of the past and allow people to move on with their lives. The situation today is not yet perfect, but it demonstrates what can be achieved with such an approach.

The petitioners are engaged in a dialogue with the Government to find a solution for their problems. Those citizens who left the barracks are working with the security and justice sector. The armed rebels who committed crimes against the sovereignty of the state have already surrendered and are now being processed through the judicial system. The IDPs camps are now closing and people are returning to their communities. The closure of the IDP camps not only allows people who were living in the camps to rebuild their lives, it

Liability limited by a scheme approved under Professional Standards Legislation.

also improves opportunities for all people. For example, the closure of the IDP camp at the National Hospital not only ended unsafe and unhealthy living arrangements for IDPs, it improved the quality and availability of medical care to all citizens of Timor-Leste and allowed the completion of capital works to improve the national hospital and expand the services it provides to the community.

This outcome, difficult to imagine even one year ago, has far reaching consequences. There is a renewed confidence in the country. The private sector is recovering, the Government's development program is being implemented and there are visible signs of investment and development throughout Dili and the districts.

Better systems, better results

These visible signs of development are just the beginning. Behind the movement of goods and services, the repair of roads and bridges, the delivery of grants and payments lies the successful reform of the Government financial systems. Red-tape and redundancy are being removed, controls are being decentralised, improvements in planning and design are all speeding the ability of the Government to execute its plans to bring benefits to the citizens of Timor-Leste. As at 26 June, budget execution across all ministries, including commitments, stood at 53 per cent. Over \$90 million has already been spent, almost \$40 million has been contracted with activity underway and a further \$55 million has been committed for specific projects. In addition, in 2008 alone, the Government has also successfully expended over \$54 million in projects from previous budgets previously committed but not completed. Recent amendments to the procurement decree law passed earlier in June are expected to increase budget execution still further. As a result, at this early point in the financial year, the Government has found itself ahead of its schedule and able to take on more responsibility.

New Pressures

However, while the Government is moving ahead addressing the national priorities, there are new external economic pressures confronting the country which could not be foreseen when the 2008 Budget was prepared. While the high price of oil is adding to Timor-Leste's total wealth, other higher commodity prices are hurting the poor. Higher fuel costs are affecting industry and individuals. The increased price of rice, and difficulties obtaining it have created conditions of food insecurity within the country, which imports almost 60 per cent of its total rice needs. Likewise, development and construction have been threatened by the difficulties in securing critical construction materials such as cement.

Food security has always been a priority of the Government. Now there is an added urgency, the citizens of Timor-Leste cannot wait for a long-term solution. The Government must act immediately to secure the supply of critical staple foods such as rice, while simultaneously working to improve domestic agricultural production and improving economic opportunities for the many people living a subsistence lifestyle.

A time to turn plans into action

Since 1999, the citizens of Timor-Leste have waited patiently for the fruits of their long struggle for independence to come. However, building the mechanisms of Government is a slow process. It is necessary to have a national development plan, Government Ministries to implement it as well as clear and transparent mechanisms of administration. These plans and processes have taken a long time to build and in that time, there has been little improvement in the quality of life of the population. In fact for many people it has worsened due to challenges of the slow pace of infrastructure development and repairs, ongoing problems with the reliability of electricity supply and phone services and the lack of jobs or opportunities. Now, the people of Timor-Leste, who have so little, must also deal with the further damage arising from the recent security issues, the loss of crops and infrastructure caused by floods, mudslides, earthquakes and locusts, and now the global pressures of rising prices of food and construction materials.

However, these challenges coincide with high oil prices which has boosted Petroleum Fund projections to unprecedented levels, enabling a more comprehensive response to the complex problems that Timor-Leste is facing.

It is well known that money alone cannot solve all problems. Money must be matched with a strategic plan and appropriate operational processes. This is the situation in Timor-Leste. The Government has a national strategy, Organs of Government and systems and processes have been improved and progress is being achieved faster than ever before. Timor-Leste has reached a stage where an increase in funding can bring forward national development. Further, an increase in funding is required to enable the type of wide reaching, interconnected complex programs that are the key to real national development. Problems such as the lack of reliable electricity or an inadequate road system slow the progress of many significant areas of the country's development. These are not the types of problems to be solved by piecemeal approaches – bridge by bridge, generator by generator. Such national issues require national solutions.

As a result, following the successful implementation of current Government policies under the 2008 Year of Administrative Reform, the Government is proposing to supplement the existing budget to enable holistic solutions to some of the complex problems which are holding back the development of Timor-Leste. This will require 2008 spending levels to exceed the Estimate of Sustainable Income as set out in Annex A.

Please accept Your Excellency my highest consideration.

Díli, 4th July 2008

Kay Rala Xanana Gusmão

Primeiro-Ministro da República Democrática de Timor-Leste

Annex 10 – User Guide

The purpose of the 2008 Budget Adjustment is primarily to inform the National Parliament and other interested parties of the Government's adjustments to the 2008 General Budget of the State. It provides an update of the medium-term fiscal position of Timor-Leste and the Government's fiscal strategy.

Styles and Conventions Used

The following notations are used:

-	(nil)
\$m	(\$ million)
\$'000s	(\$ thousand)

All currency figures are in US dollars. Current prices are used for 2006-07, 2007 transition period and 2008 and constant 2004-05 prices are used for all other years. Budget year refers to 1 January 2008 to 31 December 2008. Figures in tables and in the text may be rounded. Discrepancies in tables between totals and sums of components are due to rounding.

Classification of the Public Sector in Timor-Leste

For budgetary purposes Timor-Leste adopts the IMF principles for classifying the activities of the public sector, the Government Finance Statistics (GFS) of Classifying the activities of Government. The public sector Timor-Leste is made up of categories: General Government; Public non financial corporations; and Public Financial Corporations. The General Budget of the State covers the financing of activities on a Whole of Government basis which includes General Government and Public Non Financial Corporations.
