Book<sup>6</sup>

**"Be a Good Citizen. Be a New Hero to our Nation"**

# Infrastructure Fund

## **Introduction**

The Infrastructure Fund (IF) was established by Law No 1/2011 on 14 February 2011. The subsidiary Decree-Law No 8/2011 of 16 March 2011 sets out the primary objective of establishing the IF, which is to finance the implementation of infrastructures that require significant investments in multi-year projects above US\$1 million, enabling resources once programmed to be expended in a more efficient, transparent and accountable way. These projects require the Government to enter into multi-year legally binding contracts for which funding over more than one fiscal year has to be assured. The Fund is also able to retain unspent funds each year which are automatically carried forward to succeeding years.

It functions as a financial vehicle for the Government to carefully target investment in major public infrastructure projects which are essential to development and a well-functioning economy. Investments in infrastructure not only reduce capacity constraints and assist in facilitating a more productive economy, but also create an enabling framework for development and growth through lowering transaction costs, job creation, income generation, stimulating domestic market integration and increasing demand in rural areas.

This process of developing the infrastructure program goes, generally, through two stages, each with multiple sub-stages. The first stage ending with physical completion of the infrastructure encompasses selection of the type and location of projects, planning, design, preliminary evaluation / studies / feasibility / impact studies and the actual construction. Stage two refers to the infrastructure services that includes not only the stream of benefits derived from physical infrastructure over time, but also the management and oversight thereof, including operation and maintenance.

## **Management of the Infrastructure Fund**

To ensure the effective implementation of the projects, the Government established the Council for Administration of the Infrastructure Fund (CAFI), which is the executive body with authority over the decision making process for all matters related to Infrastructure Fund projects and provides policy guidance to the executing agencies or line ministries.

The CAFI comprises of a Chairperson and three permanent members as follows:

- The Prime Minister, President
- The Minister of Finance, Member
- The Minister of Transport and Communication, Member
- The Minister of Public Works, Member

Other Ministers and Secretary of States are requested to attend meetings of the CAFI as and when the agenda for the meeting is of relevance to the responsibilities and activities of their agencies. The Major Project Secretariat (SGP), National Development Agency (ADN) and National Procurement Commission (NPC) provide administrative and technical support to the CAFI as specified in the workflow process of the Infrastructure Fund. The SGP is responsible to perform the functions as specified in the “Workflow Process” of the Infrastructure Fund as well as providing technical and secretariat support to the CAFI. This includes undertaking ex-ante evaluation of project proposals and reporting on the analysis as well as financing options to CAFI and execution of payments based on recommendations of ADN. SGP also performs the function of Secretariat for the Executing Agency of loan funded projects.

Regular field inspection falls under the responsibility of the National Development Agency (ADN) who are also responsible for ensuring that projects are implemented according to the approved specifications and raise recommendations for payment accordingly. ADN is also responsible for reviewing designs and studies, drawings and Bill of Quantities (BoQ), as well as reviewing tender documents before their submission to the National Procurement Commission to procure the services. The Line Ministries and Agencies, being owners of the projects, are responsible for identifying and presenting project proposals, preparation of project documents for tendering, signing contract agreements, issuing notices to proceed, monitoring the day-to-day implementation and management of the projects, approving project progress and/or final reports and raising certification for payment.

Thus far, the Infrastructure Fund covers 17 Programs, including (1) Agriculture and Fisheries infrastructure development program; (2) Water and Sanitation infrastructure development program; (3) Urban and Rural infrastructure development program; (4) Electricity infrastructure development program; (5) Roads and Bridges infrastructure development program; (6) Airports infrastructure development program; (7) Ports infrastructure development program; (8) Informatics development program; (9) Public Buildings development program; (10) Education infrastructure development program; (11) Health infrastructure development program; (12) Millennium Development Goals program; (13) Security and Defence infrastructure development program; (14) Social Solidarity infrastructure program; (15) Tasi Mane infrastructure program; (16) Design for new IF projects; and (17) Tourism infrastructure development program. These programmes are in line with the National Strategic Development Program and government priorities.

## **Budget Allocations and Disbursements for 2011, 2012 and 2013**

As mentioned earlier, the Infrastructure Fund has been active since mid-2011 and a total of US\$2.0 billion (including external loan programs) has been allocated to the Fund since 2011 in order to finance the 17 programs mentioned above.

The 2011 IF programme contained 71 projects with a total contract value of US\$1,056 million. During late 2011 it became evident that adjustments to the allocation by project were required to ensure that progress on projects proceeding ahead of schedule could be maintained. The additional funds for these projects were sourced from those projects which were lagging behind their implementation schedules. The overall performance of the IF programs was satisfactory during this period with US\$474.4 million, over 79%, of the total budget being disbursed and US\$124 million being carried over to 2012. Much of this is attributable to the high disbursement (over 90% of budget) towards the Electric Power program.

The 2012 budget provided additional funds of US\$875.1 million for on-going projects and for 40 new projects submitted by line ministries and agencies, and which, following appraisal by MPS, were approved by CAFI and the National Parliament, including US\$43.1 million outsourced from external loans.

The appraisal process comprised an evaluation and preliminary appraisal of the technical, social and economic viability of the proposed projects. This appraisal used a multi-criteria method, including: (i) Compatibility with the National Strategic Development Plan (SDP); (ii) Net economic contribution to the economy of Timor-Leste measured by the Economic Internal Rate of Return; (iii) Environmental and social impact and contribution to poverty alleviation; (iv) Readiness for implementation as measured by the state of project preparation; (v) Sustainability in terms of the likelihood that other requirements, e.g. funding and staffing, for the successful operation and maintenance will be forthcoming.

By including the 2011 leftover budget of US\$124.1 million, the total budget of 2012 was adjusted to US\$925.1 million. During Budget Rectification, US\$50 million was approved and transferred to the Consolidated Fund making the final approved budget US\$875.1<sup>1</sup>. The budget allocation to Electric Power program sector remained the highest allocation by sector but its share fell to 35% of the total, followed by the Tasi Mane program (18%), Transport (18%) and MDG (12%).

During 2012, the Government also signed two external loan agreements with the Asian Development Bank (ADB) and the Japan International Cooperation Agency (JICA). The ADB loan comprised of US\$30.9 million from Ordinary Capital Resources (OCR) and US\$9.2 million from Asian Development Fund (ADF). The OCR Loan has a principal repayment period of 20 years, and a grace period of 5 years, while the ADF Loan has a principal repayment period of 24 years, and a grace period of 8 years. The GoTL's has participated in financing both the road sections of Dili-Liquiça and Tibar-Gleno with total participation of 25 per cent of the total project costs. JICA has also agreed to lend the GoTL an amount of Japanese Yen 5,278 million or approximately US\$68.7 million for the implementation of the National Road No. 1 Upgrading Project from Dili-Manatuto-Baucau. The JICA loan has a principal repayment period of 20 years, and a grace period of 10 years. The Government has also contributed 25% to the total cost of these projects. Loan negotiations have been finalised with the World Bank for funding the roads connecting Aileu to Maubisse and Ainaro and with the ADB for upgrading the roads connecting Manatuto to Natarbora.

Execution of these two loan funded projects have commenced with detailed design and studies for upgrading Dili to Manatuto and Baucau roads, and construction works have also commenced for upgrading Dili to Liquiça and Tibar to Gleno roads. Overall execution for the non-loan programs was 45% of the 2012 budget with the Electric Power program remaining the highest and all other sectors showing low rates of disbursement.

The generally low rate of disbursement outside of the Electric Power Programs was, in general, attributable to a number of factors, namely: (a) Inadequate pre-construction works, planning and scheduling. Right of way and/or property acquisition processes and mobilisation of equipment and construction materials; (b) Inadequate provision of capable technical staff by the contractors and consultants to undertake construction and supervision works; (c) In some locations, heavy rainy has hampered project execution progress particularly during the period of November-March/April.

In 2013, the project evaluation process was carried out, as in previous years, by conducting an initial review of Project Briefs from Line Ministries, followed by more detailed appraisal using multi-criteria comparative evaluation. A total of 53 new projects were evaluated with total implementation costs of US\$331 million. Of these, 27 new projects with an initial year budget value of US\$46.8 million were approved into the IF portfolio for 2013. The remaining proposals were recommended for inclusion as from 2014 and in some cases for further review following the completion of further project preparation.

The estimated disbursement was US\$430.8 million with a total rollover budget of US\$444.4 million and new appropriations of US\$160 million giving the Fund a total approved budget for 2013 of US\$604 million. This figure has been adjusted with the final audited accounts for 2012 and the total carryover balance from 2012 to 2013 was US\$499 million<sup>1</sup>. This adjustment brought the total 2013 budget to US\$659 million.

---

<sup>1</sup> (FMIS Report, 20 Sept 2013).

Concurrently, with the splitting of the Ministry of Infrastructure into the new Ministries of Transport and Communications and Public Works, the Transport Program was split into Roads, Bridges, Ports and Airports. Also, a new program, Design and Supervision Services, was added with the aim of assisting line ministries to expedite engineering design and improve works supervision. The largest programs were Tasi Mane program with total adjusted budget of US\$151.3 million, followed the Electric Power program (US\$131.6 million) and the Roads program with US\$106.7 million. The CAFI meeting of 17 June, 2013 determined that a number of changes in program definition and virements were required. The virements reduced the allocations for programs that proceeded at a slower pace than expected namely: Roads, Public buildings and Information Communication systems. The transfer of funds was to enable the funding of the new Comoro Bridge for west-bound traffic to be adequately financed.

In total, as of 20 September 2013, 16% of the IF budget allocation in 2013 has been disbursed. However, there are indications that the rate of disbursement per month will increase such that the overall final outturn for 2013 will be about 37% of total initial budget allocation. Disbursements to the largest program, Electric Power, are again expected to be higher than for other programs at US\$88 million but lower than in previous years as a proportion (71%) of the budget allocation to the program. Disbursement on the road program is expected to be about US\$53 million (67%) of the budget allocation and that on the bridge program over US\$19 million (72%) of the budget allocation. While no disbursements are expected in the Airports program, the Ports program will likely see disbursement of over US\$5.5 million with progress on the dredging of the present Dili Port getting underway.

The Public Building program is expected to realize disbursements of over US\$14 million (35% of budget allocation) with over 50% dominated by the good progress on construction of the new office building for the Ministry fo Finance in Aitarak Laran. Construction of facilities for the Defence and Security program are also on-going and disbursements by end of 2013 are expected to approach US\$7.5 million or 42% of the allocation. The Millenium Development Goals program may require disbursements totaling to about US\$13 million (30%). Progress of the Tasi Mane program, particularly the construction of the Suai Supply Base, the Suai-Betano- Beaco Highway and rehabilitation and upgrading of the Suai Airport has been a time consuming process. Several major contracts are expected to be awarded by end of 2013 and advance payment is anticipated by end of the year allowing the contractors to mobilise. Disbursements from the borrowing portion of the loan assisted programs have also commenced and are expected to exceed US\$10 million or 25% of their budget allocation by end of 2013.

Table 1 summarises, by program, the budget allocations, disbursements and end-year balances for the period 2011 to 2012 and the revised budget and provisional disbursement expectations for 2013.

## Budget 2014

On the basis of the programs and projects performance evaluation, the total budget allocated for financing ongoing and new projects in 2014 amounts US\$425.1 million. The total final roll-over of funds from 2013 was estimated to be \$221.0 million. For projects requiring funds to meet contractual commitments during the year an amount of US\$109.8 million has been allocated and 72 projects to be newly introduced into the Infrastructure Fund portfolio during 2014 require funding in the amount of US\$94.3 million.

**Figure 1: Composition of the 2014 Infrastructure Fund Budget**

Summaries of the budget by category in terms of expected final carry over, adjustments to carry over, additional funding for on-going projects and for new projects are shown in Table 2.

Source: MPS analysis, 2013

Figure 2 presents budget allocation by programs. The IF programs with highest allocation of budget are the Roads program with US\$57.0 million or 13% of the total budget followed by Electricity with total allocation of US\$56.4 million (13%), Loans US\$51.0 million (12%) closely followed by Tasi Mane program with total allocation of US\$46.3 million or 11%. Total allocation for the Millennium Development Goals program remains high at US\$27.0 million (6%), while the Public Buildings program and the Ministry of Finance programs are allocated US\$21.5 million (5%) and US\$19.8 million (5%) respectively.

**Figure 2. Budget Allocation by Program, 2014**

Defence and Security (5%) and the Bridges (5%) programs have also been allocated US\$20.4 million and US\$19.9 million respectively. Of the remaining programs, three are allocated over \$10 million for 2014. These are: Ports, US\$13.2 million (3%), Airports US\$10.5 million (2%), and Education US\$9.5 million (2%). The remaining programs are allocated less than US\$10 million each for 2014. Provision of funds to assist with concept design, detailed engineering design and supervision where line ministries have not budgeted for these project components has been retained and is US\$15.0 (4%) million.

## The Importance of Infrastructure Fund Programs

The implementation of the Infrastructure Fund programs is resulting in the provision of core physical infrastructure to the most needed parts of the country. This has positive impacts, directly and indirectly, on the social and economic development of the country. Road rehabilitation projects, apart from creating short-term employment opportunities, also provide and help maintain access to places that would otherwise be isolated; better roads and bridges also expedite people's access to basic services such as health care and education services, enhancing agricultural productivity, reducing transportation cost and generating more jobs and income.

In the short term during project construction, many jobs are created directly and the spending of incomes by those employed by the contractors and works supervisors provides indirect employment and income for the wider public. Most importantly, the creation of modern infrastructure supports sustainable stability for social and economic development. The country wide

programs to provide reliable electricity supply and improved roads are already beginning to show longer term economic and social benefits.

The countrywide road and bridge improvements are still in their initial stages and were much needed after years of neglect as the result, inter alia, of limited funding combined with limited skilled human resources. As the programs unfold and the road network improves the benefits of more secure, more comfortable, faster and cheaper travel will benefit all. The costs of farm inputs such as seeds, fertilizers, pesticides and fuel will fall and the cost of delivering farm outputs to markets will also fall, benefiting farmers and consumers alike. The tourism industry will also benefit the local economy by encouraging tourists to reach tourism destination areas.

The national electrification program has already benefited many as the result of families, service industries and productive industries being able to rely on a reliable power supply. This has resulted in improvements in security, communications, and the application of modern tools in service and production industries and in social services such as health facilities and schools. Lack of electricity inhibits access to information from the outside world and limits the use of modern educational tools, such as computers and radios. The aim of the electricity program is to provide reliable electricity generation, transmission and distribution of electrical power throughout Timor-Leste.

Agriculture is a strategic sector for development and economic growth with about 63% of households in Timor-Leste being engaged in the sector. Public investment in the rehabilitation and expansion of existing irrigation schemes are regarded as a key component for resuscitation of the sector and achieve targets of self-sufficiency in staple food crops, principally rice and maize. Infrastructure development in agriculture will also increase food production and availability, improving distribution and improving food security directly through enhancing nutrition and indirectly by increasing incomes.

Improvements in sanitation and water supply are necessary throughout the country to provide safe water and better sanitation facilities will reduce illness and raise the quality of life. The Government has also focused its attention to the strategic economic development of the southern coast area which is endowed with a wide variety of resources to spearhead development. This will create employment, improve the living condition of the people, generate various industries and stimulate the economy as well as attracting investment.

The public building program is also an important component of infrastructure development. Many public buildings suffered greatly during, and following, the restoration of independence and none had ever been originally designed to standards appropriate for a national government. The program for public buildings will rectify the situation by providing working environments appropriate to the needs of the civil service from national government level through district administration to sub-district and suco level as necessary for the efficient and effective administration of the country.

The efficient development of the country requires coordinated planning between sectors and across geographical and administrative boundaries. Good master planning and spatial planning is therefore important. Nowhere is this more so than in the southern coast region which is strategically important, because it is endowed with rich mineral and other resources. The aim of which is to create an environment that is attractive to foreign and domestic investors in mineral related downstream industries, agriculture based activities and other activities, such as new towns to service these developments. Such master planning and more detailed planning of urban and rural areas are required in other areas of the country also to enable consistency. A comprehensive database for physical and non-physical features of Timor-Leste in Geographic Information System

(GIS) format will be required. To this end, acquisition of this type of data and training in its usage will be pursued in 2014 based on Light Detection and Ranging (LiDAR) technology.

Investment in health and education are considered as key components in developing human resources. Various empirical studies have shown a clear link between education and productivity. The accumulation of human capital is crucial to avoid the poverty trap and for the efficient adoption of technologies. Therefore, the improvement of education facilities and communication systems are imperative for the government in terms improving the quality of human resources and coordination between agencies at central and regional levels. Through the Informatics Program, the government began the process of developing a national communication platform of data, voice and video services to all district capitals. Investment in information systems will enable management to be more efficiently devolved to the districts and government agencies who work there. The government recognises the importance of the need to provide community housing and other support facilities to the selected beneficiaries and locations across the country. Although the Government is investing a substantial amount of State capital for the development of infrastructure, other financing options are being considered and some already adopted. To date, concessional loan arrangements with low risk have been entered into with the Japanese International Cooperation Agency (JICA) and with the Asian Development Bank (ADB), both for large-scale road improvement projects. Additional, similar loans are currently under negotiation or under consideration but within the context of there being an upper limit to the total amount of such borrowing above which would risk placing an unsustainable burden of repayment in future years. Another financing modality arrangement under serious consideration is through Public Private Partnerships (PPP), where government enters into a shared ownership and/or management of a facility with a privately owned organization. Development and management of Tibar Bay Port is currently being developed under the PPP arrangement and possible PPP arrangement for Dili drinking water supply is being studied.

## Human Capital Development Fund

## **Introduction**

Human resource development has multiple effects on the social and economic development of the country. The provision of education will increase literacy which in turn will improve human resources and better contribute to the national development. Realizing the importance of human resources for the development, the Government has marked Human Resources Development as one of the key priority programs.

A fund for human capital development was established through Law No. 1 approving the State Budget 2011 and regulated by Decree-Law No.12/2011. Its purpose is to finance multi-year training and human resource development programs and projects. The primary objective of the Fund is to develop human resources to support national development in various fields, improving the planning, management and implementation of programs, while simultaneously ensuring greater transparency in government spending in relation to costs of training and human resource development programs.

In ensuring the main objective of promoting transparency and accountability for the implementation of programs and projects, the Fund is governed by a Board of Directors who is responsible for policy guidance and operations of the Fund, whilst the management and operation of the Fund is vested in a Technical Secretariat from the Ministry of Education.

The program was started with the provision of scholarships and training programs to nine government institutions, including the ministries for Health, Education, Finance, Justice, State Administration and Territorial Management, Natural Resources, Vocational Training and Employment, Youth and Sports, PNTL and F-FDTL. Details of the programs and budget allocations and disbursements are presented in the following sections.

## **Human Resource Development Programs Funded by HCDF**

The main programs funded by the HCDF are as follows:

- 1) The Scholarship Program was designed for the general public, public servants and children of veterans and is based on a merit system.
- 2) The Professional Program was designed for public servants in the following areas: criminal lawyers, auditors, judges, notaries, private lawyers, translators and inspectors. It also supports the training of manpower to work abroad, particularly in construction, provides training for trainers in the Tibar Centre and other centres, and supports basic training in languages and math skills.
- 3) Technical Training programs are comprised of training activities for public administration and technical training delivered by higher education institutions and polytechnics.
- 4) Other Types of Training programs cover training programs for young teachers in higher education and polytechnic education, in health, formation of National Police officers and training officers of the F-FDTL.

## **Priority Program Areas**

Following the Decree-Law 12/2011, the nature and objective of the Fund is intended to finance multi-year programs and projects for training and human resources development, including programs to increase the training of Timorese professionals in the strategic sectors of development such as justice, health, education, infrastructure, agriculture, tourism, oil management and financial

management, among others, which include activities and actions held in Timor-Leste and other countries, including scholarships for undergraduate and graduate levels.

### **Scholarship Program**

The priority programs for scholarships cover a number of disciplines determined by the needs identified by the line ministries. Thus far, the Scholarships covers several programs General Medicine, Economics and Management, Public Administration Science, Engineering, Health Science, Accounting, Natural Sciences, Information Technology, Science of Education, Law, Environmental Science (Agronomy), Telecommunications, Geology, Petroleum Engineering/Sciences, Air-Navigation, Tourism, Statistics, Architecture, Urban and Rural Planning, Art and Culture and other relevant courses.

### **Priority Courses for Professional and Technical Formations**

The priority programs for professional and technical formations focuses on skills development in the areas of Auditing, Finance Management, Advocacy and Judicial Services, Management of Customs (Immigration), Administration Management, Engineering course, IT Course, Research Methods, Hotels Services, Database Management and Administration, Professional Course in the Field of Gender and Equality, Basic Formation for national police, and other relevant courses.

## **Budget Allocation and Expenditures of 2011, 2012 and 2013**

The program began with the provision of scholarships and training programs for ten government institutions, including the Ministries of Health, Education, Finance, Justice, and State Administration Planning, Secretary of State of Natural Resources, Vocational Training and Employment, Youth and Sports, PNTL and F - FDTL.

The total budget allocated for the HCDF in 2011 was \$25.0 million, with an execution rate of 67%. Table 1 presents a summary of the 2011.

**Table 1. Budget and Expenditure for 2011**

Program	2011		
	Orçamento Final \$ 000	Despesas \$ 000	Saldo \$ 000
<b>Total</b>	<b>25,000</b>	<b>16,802</b>	<b>8,198</b>
810–Formação profissional	4,810	3,968	842
811–Formação Técnica	3,371	286	3,085
812–Bolsas de Estudo	12,952	11,650	1,302
813–Outros Tipos de Formação	3,867	899	2,968

As can be seen in the above table, the total budget carried over from 2011 to 2012 was based on the figures of the audited account report for 2011. This is somewhat different from the figure of 7.448 million dollars, which was the estimation, in the rectified budget presented in 2012. The Government has used the figures of rectified budget for internal control. This ensures total expenditure cannot exceed the indicated rectified budget for 2012. The difference between the budget carried over from 2011 to 2012 is that the ratified budget and audited accounts will only be added to government system for internal financial control, after this amount was approved by

**Draft 2014 State Budget Book 6 - Special Funds**

Parliament. However, in order to simplify, table 1 and for clarity, the budget amount carried over from 2011 to 2012 were based on the audited accounts.

**Table 2. Budget and Expenditure for 2012**

Program	2012		
	Orçamento Final \$ 000	Despesas em Dinheiro \$ 000	Balanco \$ 000
<b>Total</b>	<b>37,448</b>	<b>32,188</b>	<b>5,260</b>
810–Formação profissional	10,256	8,328	1,928
811–Formação Técnica	4,116	710	3,406
812–Bolsas de Estudo	13,126	16,088	(2,962)
813–Outros Tipos de Formação	9,950	7,062	2,888

In 2012, a sum of US\$37.4 million was allocated to the Human Capital Development Fund, while the number of institutions increased to 14 members. In terms of program implementation, it is expected that 86% of the budget will be disbursed by end of the year with a rollover budget of US\$ 5.3 million dollars from 2012 to 2013.

For the Fiscal Year 2013, 21 government institutions submitted proposals for inclusion in the Fund, a total of US\$ 42.448 million was allocated to the Fund inclusive of the leftover budget carried over from 2012. There was also an expansion of the program coverage and has increased to 16 or an increase of 2 additional institutions including the Ministry of Justice, Ministry of Finance, Ministry of Petroleum and Mineral Resources, Ministry of Education, Ministry of Health, INAP, Office of the Presidency of the Republic, Office of the Prime Minister/State Inspector General, Secretary of State Policy Formation and Professional Employment, Secretary of State for Defence, F-FDTL, State Secretary for Security, PNTL, Secretary of State for Promotion and Equality, State Secretary for Youth and Sport, Institute of Teachers' Training and Educational Professions (INFORENDEPE) and the National University of Timor-Leste/UNTL.

Program	2013			
	Orçamento Original \$ 000	Orçamento revisto após auditoria \$ 000	Despesas em Dinheiro \$ 000	Saldo \$ 000
<b>Total</b>	<b>42,448</b>	<b>39,159</b>	<b>23,196</b>	<b>15,963</b>
810–Formação profissional	4,843	6,178	4,726	1,452
811–Formação Técnica	3,100	6,506	500	6,005
812–Bolsas de Estudo	23,260	13,900	12,175	1,725
813–Outros Tipos de Formação	11,245	12,575	5,794	6,781

## Program Achievements in 2013

### Scholarship programs

The scholarship program is open for the public servants and public in general, including children of veterans and selected through a merit system.

The main objectives of the scholarships program are three fold:

- (1) The scholarship is offered for all Timorese students in higher education to ensure adequate and qualified human resources in responding to the needs of the country.
- (2) The scholarship is to improve human resources in various areas to enhance both scientific knowledge and technical skills that are expected to contribute to the social and economic development of the nation.
- (3) The scholarship is also to prepare young people with a tertiary qualification contributing to the improvement of services offered to citizens which will eventually contribute to social development so as reducing poverty.

<b>Total (for 5 institutions)</b>		<b>3,064</b>	<b>2,172</b>	<b>912</b>	<b>53</b>

*Source: Secretariat for Human Capital Fund, 2013*

Of the 16 accredited institutions approved for the Human Capital Development Fund for 2013, there were eight institutions which provided scholarship programs, including Ministry of Justice, Ministry of Finance, Ministry of Petroleum and Mineral Resources, Ministry of Education, Ministry of Health, and INAP.

As can be seen in the above table, the estimated total scholars from the 5 Institutions (starting from 2011,) are 3,064 students and the total students who have graduated up to year 2013 are estimated to be 912 students. The different course length also explains various levels of education namely Diploma 3, Bachelor, Masters and Doctorate. It should be noted from the table that students sent overseas are also granted 6 months to one year of bridging courses or University

Foundation Programs which are aimed at preparing our students to be accustomed to new educational systems, to adapt to new cultures, to reinforce our students' basic knowledge and other important factors required.

***Technical, Professional and Other Types of Trainings***

- Professional Programs are offered for public servants in the following areas: criminal lawyers, auditors, judges, notaries, private lawyers, translators and inspectors. It also supports the training of manpower to work abroad, particularly in construction, provides training for trainers in the Tibar Centre and other centres, and supports basic training in languages and math skills;
- Technical Training programs in areas such as public administration and technical training on higher education and polytechnics;
- Other Types of Programs such as training programs for young teachers in higher education and polytechnic education, in health, formation of National Police officers and training officers of the F-FDTL.

Technical and professional programs include the following:

- The Ministry of Justice focuses on the areas of advocacy and judicial services,
- The Ministry of Finance provides courses in Finance Management, IT, Statistics, Accounting to its employees ,
- The Ministry of Education, through INFORDEPE, also conducts training to a total of 7624 teachers,
- The SEJD offers training program for football Coaches and massagers, in the country and in Spain,
- The SEPFOPE provides training programs for employments to be sent to Korea through the Korean language education, vocational training and also employment in 14 training centres and strengthening of accredited training centres,
- The PNTL conducts basic training courses for the young police,
- The SEPI provides professional courses in the area of gender and equality ,
- General Inspector/IGE offers auditing Courses in Indonesia,
- The UNTL caters training program to develop its lecturers and students.

All the accredited institutions design their programs and undertaking training activities in their respective specialised areas. These institutions have also provided technical and professional trainings for either their own staff or the public.

**Table 5. Progress Data from Various Institutions**

Courses	Total	%
Formação Basico da Policia	280	32%
Curso Ingles	175	20%
Auditoria e Gestao Financeira	113	13%
Advogados e Servicos Judiciario	97	11%

Administracao e Gestao Base de Dados	15	2%
Hotelaria	9	1%
Curso Profissional na área de Igualdade de Género	5	1%
<b>Grand Total</b>	<b>884</b>	<b>100%</b>

The SEPFOPE also provides training for Timorese workers to be dispatched to the South Korea. This training focusing on the Korean language education and other vocational training programs were delivered through 14 accredited training centres.

## 2014 Budget

As part of the HCDF program budget preparation, all new project proposals for the 2014 budget submitted by the line ministries/agencies were preliminarily evaluated using the following “Guidelines and Procedures”:

- a. Institution that can apply to be a member of Human Capital Development Fund must be government institutions and will have to be invited by the Board of Directors of Human Capital Development Fund.
- b. Eligible institutions will have to submit a proposal of programs which are categorized as strategic and priorities for the human capacity building programs according to the very needs of the respective institution or the demands of the country in general.
- c. The proposals will be verified and recommended to the Board of Directors and Budget Review Committee based on the valid and rational/sensible plans of the respective institutions.
- d. The proposals submitted will also be evaluated and recommended based on the capacity of execution of the respective institution.
- e. Any MoU or agreement made between a government institution and other working partner for Human Capacity Building should be overseen by and submitted to the Secretariat of Human Capital Development Fund.

Guidelines for the execution of the Human Capital Development Fund have also been established, which are strictly applied for the implementation of the HCDF programs. These guidelines include the following:

The Fund is strictly to finance Human Capacity Development Programs,

- a. Budget Execution will have to follow the programs that have been approved and written in this Book 6.

- b. Secretariat is tasked to verify and certify all submitted programs whether the submitted programs are approved as strategic programs related to Human Capacity Building and classified in the Book 6 to be funded by HCDF or not.
- c. For the existing programs, the fund will be executed after the Secretariat of HCDF receives a report from the owner of the program.
- d. The fund will not be executed for short term programs which have low costs.
- e. For simple programs which can be provided in Timor-Leste, the Secretariat recommends highly the delivery be held in the country.
- f. The Human Capital Fund will be executed following the principle, "less costs, high inputs/qualities".

For the 2014 fiscal year, the Secretariat of Human Capital Development Fund has received proposals from 11 new institutions and this brings the number of accredited institutions to 27 with access to the Fund. US\$40 million was approved for program implementation in 2014 and this includes US\$3 million rollover budget from 2013. This comprises of US\$29 million or 73% allocated for Scholarships Program, US\$6.5 million or 16% allocated for Other Types of Training Program, US\$2.4 million or 6 % for Professional Training Program and US\$1.4 million or 3.5% allocated for Technical Training Programs.
