Rights and Sustainability
in Timor-Leste’s Development

Presentation by La’o Hamutuk
March 2020

What is La’o Hamutuk?

• The Timor-Leste Institute for Development Monitoring and Analysis, founded in 2000.

• Timorese and international people “walking together” on the journey to create a new Nation.

• An independent, Timorese, non-governmental organization which does research, policy analysis, public education and advocacy.

• A force for participatory, equitable, sustainable and evidence-based policies and practices.
**Topics to discuss**

1. Petroleum dependency – Timor-Leste is cursed by its (lack of diverse) resources.

2. The state budget and national economy are not sustainable.

3. If wishes were horses ... dreams should (mostly) be based on reality.

4. Justice for past crimes

---

**History in one slide**

- People have lived in Timor-Leste for at least 5,000 years.
- Portuguese colonized nearly 500 years ago.
  - They brought Catholicism but little development or education.
  - Onshore oil exploration started in 1890s.
- Australia, then Japan, invaded in 1941-45.
  - 40,000-60,000 Timorese killed in WWII, which didn’t involve them.
- Portugal’s military dictatorship resumed control in 1945.
  - Offshore oil exploration began in the 1960s.
- Portugal began decolonizing in 1974.
  - After Carnation Revolution brought down Portuguese dictatorship
  - TL declared independence 28 November 1975 ... but 10 days later
- **Indonesia invaded on 7 December 1975.**
  - Indonesia killed 100,000-200,000 Timorese in 24-year occupation.
- Referendum in 1999, then 2½ years of UN rule.
- Finally restored independence on 20 May 2002.
  - Oil income surged in 2005-2007, but is declining since 2012.
1. Petroleum Dependency

Timor-Leste has been one of the world’s most petroleum-export-dependent countries. This determines our State, our economy and our future.

Basic Statistics

- One-third of Timor-Leste’s people live in poverty, 46% in multi-dimensional poverty.
- Two-thirds of people live in rural areas, largely by subsistence farming.
- Poor sanitation and malnutrition are endemic.
- About 1,200 Timorese children under 5 years old die from preventable conditions every year ... 30 times as many people as die from homicide.
Our children are the most poorly nourished in the region.

- The majority of rural children are stunted.
- A malnourished child could be permanently damaged.
- Half of Timor-Leste’s people are less than 20 years old.
- Most under-educated children will not become productive workers or optimal parents.

Petroleum Dependency (nominal USD)

- State revenues in 2019: $3,043 million
  - $2.101 million from investing the Petroleum Fund (including $1,707m unrealized)
  - $756 million from oil and gas revenues
  - $186 million from non-petroleum sources

- Executed 2019 State Budget: $1,236 million ($1,482m appropriated)
  - $969 million transferred from the Petroleum Fund
  - $186 million from non-petroleum (domestic) revenues
  - $50 million from loans which will have to be repaid

- State activities, paid for with oil money, are nearly half of the ‘non-oil’ economy because some of this money circulates in the local economy.

- Petroleum and investment ‘income’ goes to the state, not to the people.

Only South Sudan, Libya (and Equatorial Guinea?) are more dependent on oil and gas exports than Timor-Leste was before 2014.
But we don’t have very much oil.

Our seas have been explored for half a century, and our land for longer.

There may not be any other fields.
In the 2019-2020 Bidding Round, ANPM hopes companies want to keep looking.

Nearly all these areas have already been explored.

Since 1910, oil companies have drilled 95 exploration wells here. They found eight commercially viable reserves. Kitan is the only one discovered in the last 20 years.
TL has already received 95% of the revenues it will get from Bayu-Undan and Kitan, and they will end entirely in 2024.
Bayu-Undan is nearly depleted.

Bayu-Undan Reserve and Production

Where TL’s oil income comes from

Where the Petroleum Fund gets its money

Graph by La’o Hamutuk based on Santos Annual Reports, February 2020
Figures after 2019 are La’o Hamutuk projections.
Australian companies began exploring Sunrise in the early 1970s, after Australia and Indonesia divided our maritime resources without involving Portugal. In 1989, they closed the “Timor Gap” to share illegally occupied resources in the Joint Development Area.

In January 2017, Australia accepted Timor-Leste’s request to revoke the entire CMATS Treaty. A permanent boundary treaty was signed in March 2018 and came into force in August 2019.

Based on UNCLOS, TL owns fields north of the median line, and lateral boundaries should move outward.

Sunrise and maritime boundary dispute

- Australian companies began exploring Sunrise in the early 1970s, after Australia and Indonesia divided our maritime resources without involving Portugal. In 1989, they closed the “Timor Gap” to share illegally occupied resources in the Joint Development Area.

- The 2006 CMATS treaty banned maritime boundaries discussion for 50 years. It divided Sunrise upstream revenues 50-50.

- Australia put its greed for oil before respect for its sovereign neighbors or international law.

- Based on UNCLOS, TL owns fields north of the median line, and lateral boundaries should move outward.

- In January 2017, Australia accepted Timor-Leste’s request to revoke the entire CMATS Treaty. A permanent boundary treaty was signed in March 2018 and came into force in August 2019.

Timor Sea.

Australia and Timor-Leste have agreed on a boundary and on Sunrise revenue sharing – but the gas pipeline is still unresolved.
The Greater Sunrise stalemate

- The project has been stalled because Timor-Leste and the companies do not agree on how it should be developed.
- Woodside and its partners Shell, ConocoPhillips and Osaka Gas believe that a pipeline to the Darwin LNG plant (used for Bayu-Undan) is more profitable.
- Timor-Leste wants a pipeline from Sunrise to Beaçu, to get more tax revenues and anchor the Tasi Mane project.
- Under contracts and treaties, the companies propose the path, but both governments need to approve it.
- Because of Australian spying, TL persuaded Australia to invalidate CMATS in 2017.
- The negotiations for the 2018 Boundary Treaty could not agree on where the pipeline will go.
- Timor-Leste bought ConocoPhillips’ 30% and Shell’s 27% shares of Sunrise to control the decision. They are seeking financing to develop the project.

Petroleum revenue peaked in 2012, and this is how it flowed in and out of the Petroleum Fund.

The basic structure hasn’t changed, but details have.

From 2005 thru 2019:
- $22.7 bn oil revenues
- $6.6 bn invest. returns
- -$11.6 bn withdrawn
- $17.7 bn balance
The Petroleum Fund reached $17.1 billion in mid-2015 and fell to $15.8 bn by the end of 2018, the lowest balance in 5 years. It recovered in 2019, but the future is uncertain.

The Fund’s balance stopped rising in 2014. It dropped a billion dollars in the fourth quarter of 2018. Although it recovered in 2019, it lost another billion during the last two weeks of February 2020.

We’re spending down our birthright.

We’ve moved from oil dependence to relying on our declining savings.
If current plans continue, TL may be unable to finance its budget in 11 years. The Boundary Treaty and Sunrise help a little, but not enough.

With Tasi Mane, the Fund crashes in 5 years.
Acting as if the oil money will last forever
Kitan is finished; Bayu-Undan will be dry by 2022.

Dreaming of riches from the earth
which are received without doing hard work.

Borrowing today, to repay tomorrow
TL may borrow billions for projects with little chance of return.

Lack of realistic long-term planning
The Strategic Development Plan 2011-2030 is but a dream;
Tasi Mane and ZEESM may have greater costs than benefits.

Using money to ‘solve’ every problem
It’s easier to buy a scholarship than to manage a university.
Signs of the ‘resource curse’ (2)

- **Spending without thinking**
- **Import dependency**
  TL’s non-oil trade deficit is about a billion dollars every year.
- **Ignoring non-oil development and revenues**
  Farming is too hard to envision, even if oil may not last very long.
- **Benefits flow to the urban and political elite.**
  Most people won’t use highways, airports and oil facilities … but will share the costs of paying for them.
- **Petroleum captures decision-making.**
  Agriculture, tourism, small industries, etc. don’t get a ‘fair go.’

2. Unsustainable budget and economy

Timor-Leste has almost no industry and a tiny private sector.

From 2008 through 2016, state spending grew faster than nearly every country in the world.
Budgeted & executed spending

State Budgets 2002-2020
The money doesn’t match the promises.

Appropriations in the promulgated 2019 State Budget

The Government says its priorities are education, health, agriculture, and water.

All together they will get less than 1/5 of state expenditures.

Graph by La’o Hamutuk based on 2019 State Budget. March 2019

Income in state budgets

Graph by La’o Hamutuk based on revised 2020 State Budget proposal. December 2019
Since 2008, donors have spent between $170 and $300 million each year, but most of this money doesn’t come into the local economy. The donor percentage dropped because Timor-Leste is spending more of its own money.

Hasty end-of-year spending is neither effective nor efficient, but spending was slow in Jan-Sep 2018 with no budget, and is likely to be again for the first part of 2020.
Real Threats to Real Security

- Human security is health care, food, education, employment, housing, etc.
- 20 times as many Timorese children under five die from avoidable conditions as people are killed by violence.
- These children will not be helped by police, soldiers or judges, but many donors prioritize the “security sector,” seeing everything through a conflict lens.
- We must diversify our economy and strengthen our people and workers to prepare for the day our oil runs out and we can no longer pay for imports.

Import Dependency

The graph shows legal goods trade only. Three-fourths of donor spending and two-thirds of state spending leaves the country.
Since 2015, more money has gone out than came in.

Timor-Leste’s External Balance of Payments

Most people live in rural areas by subsistence agriculture.

Agriculture will get 1.5% of state expenditures in 2020, although it is the livelihood of 65% of the population.
Rights and Sustainability - La'o Hamutuk

8 March 2020

Timor-Leste's working age population is increasing by about 24,000 people every year.

In 2018, total private sector employment was 53,000, 9,200 less than it had been in 2014.
The potential workforce grows by more than 20,000 people every year, but private sector employment dropped 15% from 2014 to 2018. Half the population is under 20 years old.

Timor-Leste lost 9,200 private sector jobs during the last four years. About 90,000 more people reached working age during that time. The VIII Government promised to create 60,000 new jobs each year. The Beacu LNG plant will employ only 350 workers.

The potential workforce grows by more than 20,000 people every year, but private sector employment dropped 15% from 2014 to 2018. Half the population is under 20 years old.
Dili is very different from the districts.

3. Unrealistic dreams

Current plans for development will not sustainably improve people’s lives.

They rely on Greater Sunrise gas, which is limited and may never come to TL’s land or treasury.
The Strategic Development Plan

- Issued in 2011, hopes to make Timor-Leste an Upper Middle Income Country by 2030.
- A vision and dream, not a realistic plan.
- Focuses on physical infrastructure, not sustainable or human development.
- Will require spending far beyond TL’s means.
- Promised reviews are not being done.

Tasi Mane petroleum infrastructure project

- In 2010, TL began the South Coast Petroleum Corridor.
- During 2011-2018, Timor-Leste spent more than $400 million on it.
- The 2019 budget anticipates $1.46 billion more in 2019-2023, but leaves out the most costly items.
- Timor-Leste just bought ConocoPhillips’ and Shell’s shares of Greater Sunrise for $650 million ... and will now have to pay 57% of offshore development costs.
- Total project costs could be $15-20 billion (more if Timor-Leste pays for the refinery, pipeline or LNG plant). No investors have demonstrated interest.
- TL signed its largest contract ever with Hyundai in 2015: $719 million to build the Suai Supply Base.
- A court rejected it in 2015 but was reversed in 2017. Hyundai has lost interest.
Tasi Mane project will include:

- **Suai**: Supply base area, Industrial estates, Nova Suai, Suai Airport, Crocodile farm
- **Betano**: Refinery and Petrochemical complex, Petroleum city (Nova Betano), pipelines from & to Suai
- **Beaçu**: LNG Plant complex, Nova Beaçu, Nova Viqueque, Viqueque airport
- **Highway** from Suai to Beaçu

The Tasi Mane Project includes the Suai supply base, Betano refinery, Beaçu LNG plant, a 156-km highway, onshore and offshore pipelines, 2 airports and 2 seaports.
Buying into Greater Sunrise

- Timor-Leste used $650 million from the Petroleum Fund to pay for 57% of the Sunrise Joint Venture.
- The other partners do not want to build a pipeline to Beaçu and an LNG plant there, but might go along if TL pays all the costs.
- This will eat up billions of dollars and reduce TL’s share of Sunrise upstream revenues from 80% to 70%.
- Spinoff benefits may be a mirage, and environmental, social and financial costs and risks have not been fully analyzed.
- The deal is being done with little accountability and weakened oversight.
- Few consider lost opportunity costs, more realistic and sustainable options, or what else the money is needed for.

What will Tasi Mane really cost?

This estimates capital expenditures only, not operational costs. Most have never appeared in state budget forecasts.

*Table by La'o Hamutuk from 2018, 2019 and 2020 budget books, TimorGAP proposal, transparency portal and our estimates. November 2019*
Problems with the Tasi Mane project

- It prolongs TL’s dependency on oil and gas.
- Dubious concepts and planning; it is unlikely to provide a reasonable return on investment.
- It neglects sustainable development (agriculture, tourism, small industries etc.), exemplifying the obsession with oil.
- Nearly all the billions spent will go to foreign companies, providing hardly any local livelihoods or subcontracts. The petroleum industry creates fewer jobs than any other option.
- It will create social conflict, take up land, displace people, worsen health and degrade and endanger the environment.
- Cost projections leave out 90% of investment obligations.
- We can be brave, but we should also be smart.

The Government has made many unrealistic promises about revenues, profit-sharing, jobs and other benefits.

Special Market Zone in Oecusse

- In 2014-18, RDTL spent $572 million on ZEESM with no accountability. Oecusse has 6% of Timor-Leste’s population.
- What are Oecusse’s competitive advantages?
- Can ZEESM justify a $4 billion investment?

Who benefits: residents of Oecusse or political leaders?
• Timor-Leste intends to build a port and airport far beyond realistic traffic expectations.

• Airfares have escalated and airlines are cancelling routes.

• How will the country pay for a $6 billion annual trade deficit after the oil is gone?

Laws in 2009 opened the door to foreign loans.

• Since 2012, TL has signed contracts to borrow $448 million:
  o $270 million from the Asian Development Bank (ADB) for roads
  o $ 75 million from the World Bank for roads
  o $ 53 million from Japan (JICA) for roads
  o $ 50 million from China (Ex-Im Bank) for Dili drainage (this loan was rejected by Timor-Leste’s Audit Court).

• From these contracts, $169 million has been disbursed so far.

• Future borrowing is unclear, although Sunrise and the Tasi Mane Project may be financed by borrowing billions of dollars.

• The proposed 2020 Budget will authorize $750 million in new loan contracts.

• By 2023, Timor-Leste will be paying $27 million each year in debt service, which will rise to $78 million/year after new contracts are signed and money is borrowed.
Most loans have paid for roads.

Projects to be financed with borrowed money, 2012–2016

Loans will have to be paid back.
This graph only includes loan contracts which have already been signed.

Annual loan repayments (million USD)
Implementing the SDP will require borrowing billions, probably at commercial rates.

Even at concessional rates, repaying loans depletes the assets in the Petroleum Fund.

TL’s oil and gas reserves are limited, non-renewable, and 95% exhausted already.

TL will have to prioritize repaying loans above spending on people’s needs or developing other sectors.

Our children and grandchildren will inherit the debt after the oil wells have run dry.
4. Impunity and accountability

Impunity for past crimes undermines future stability, security and rule of law.

Impunity and accountability for crimes against humanity

- 1975-1999: Indonesian invasion and occupation killed about 180,000 people in a systematic and planned policy executed throughout Timor-Leste.
- The US, UK and Australia and others armed, trained and provided diplomatic cover for the Suharto military dictatorship until the 1990s.
- 2000: Indonesian Commission on Human Rights Abuses in TL (KPP HAM) reported on 1999 crimes and recommended an international mechanism.
- 2001-2004: UN-supported Serious Crimes Unit indicted 391 people for 1999 crimes. All Indonesian and most Timorese indictees live free in Indonesia.
- 2001-2005: TL’s Commission for Reception, Truth and Reconciliation (CAVR) researched history and encouraged reconciliation among Timorese. Its extensive report made 200 recommendations, including that if other processes fail, the UN should create an international tribunal.
Impunity continues to this day

- 2005: UN Commission of Experts (COE) reviewed legal processes to date and recommended creating an international mechanism.
- 2005: TL and Indonesian governments created the Commission of Truth and Friendship (CTF) using diplomacy to avoid individual accountability.
- 2014: Prabowo, former commander of Kopassus, ran for President of Indonesia, losing to Jokowi.
- 2016: Jokowi appointed ex-general Wiranto as Coordinating Minister for Political, Legal and Security Affairs.
- 2019: Prabowo was again a leading candidate for President. After he lost, Jokowi appointed him as Minister for Defense.

Until today, not one legitimate process in Indonesia or Timor-Leste has held major criminals accountable.

Indonesia’s occupation included many massacres.

Above: 1983 massacre in Kraras, Viqueque
Right: Commemorating the 10th anniversary of the 1999 Suai Church massacre. Indicted ringleader Maternus Bere was illegally freed due to Indonesian pressure on TL’s leaders.
UN Serious Crimes Unit Special Panel

The UN-supported Serious Crimes Unit indicted 391 people for 1999 crimes, tried 87 Timorese and convicted 84.

All Indonesian indictees and most Timorese are living free in Indonesia, and efforts to prosecute were blocked by political interference.

2004: President Xanana Gusmão and indicted ex-General Wiranto

The Serious Crimes Unit issued an arrest warrant for former Indonesian military chief Wiranto for Crimes Against Humanity weeks before this photo was taken in Bali.

Wiranto later ran twice for President of Indonesia.
Human rights groups against Wiranto’s cabinet appointment

Indonesia: Gen. Wiranto’s appointment shows contempt for human rights

Press Gaggle by Secretary Mattis En Route to Indonesia
Press Operations

Secretary Of Defense James N. Mattis
Jan. 22, 2018

SECRETARY OF DEFENSE JAMES N. MATTIS: So first of all, thank you. I know you had to wake up mighty early to do this one. And — but that’s good. It builds character, I find, after a few decades, you know? But thanks for coming out. It’s a very, very long airplane flight, so I appreciate you taking the time. And we’ll go into Indonesia and Vietnam. And with Indonesia, we’re dealing with a country that we have very — very good military to military relations.

We probably engage with the Indonesian military more than any other nation anywhere in terms of mil-to-mil engagements.

The US Should Not Be Rehabilitating Indonesia’s Abusive Special Forces

The Indonesian military’s past abuses should not be forgotten.

By Andrea Harsono
January 26, 2018

U.S. Defense Secretary Jim Mattis was seen laughing and smiling this week as he watched a military exercise in Jakarta in which Indonesian troops drank snake blood, rolled in glass, broke bricks with their heads, and walked on fire. The spectacle would hardly be amusing, however, to anyone familiar with the Indonesian military’s human rights violations, especially the record of its special forces unit, Kopassus.

Matth’s visit was part of U.S. efforts to improve military cooperation with Indonesia. During his stay he discussed with Indonesian Defense Minister Ryamizard Ryacudu plans to resume U.S. assistance to Kopassus. Assistance to the unit had been halted in large part because of the U.S. “Leaky Law,” which bars US assistance and training to foreign military units known to have committed gross human rights abuses, unless the government has taken steps to remediate, address the abuses, and hold those responsible to account.

The U.S. military first announced plans to re-engage with Kopassus in 2016, hoping to train newer “unblemished” soldiers, but in subsequent years remained reluctant to proceed, in part because Indonesia had largely failed to address past abuses.
Ongoing impunity creates insecurity.

- Today, all the main perpetrators of crimes against humanity during the Indonesian occupation are free in Indonesia, including everyone responsible for the 99% of occupation-related killings committed between 1975 and 1998.
- They are all protected by the Indonesian government, and many hold high Indonesian political and military positions.
- This ongoing impunity greatly threatens peace, security, democracy, rule of law and moral values in both Timor-Leste and Indonesia.

UN Special Rapporteur on Extreme Poverty

“Ending impunity is an essential prerequisite to ensuring stability, peace and sustainability. The Special Rapporteur encourages the State to take measures to ensure that post-conflict justice and reconciliation is prioritized and that a legal framework is put in place to ensure that those responsible for serious crimes during the conflict are called to account for their deeds, and the victims of those crimes are able to access reparations. She also reminds the Government of Indonesia, the United Nations and the international community of the role they must play in ensuring that the perpetrators of crimes during the Indonesian occupation are brought to justice.”

June 2012 report to Human Rights Council
Today, neither Indonesia, Timor-Leste nor the international community has the political will to bring these criminals to justice.

The Commission of Experts report has never been discussed in the Security Council.

UNMIT left Timor-Leste at the end of 2012, having failed to achieve justice.

Recent executive interference in the court system further weakens the rule of law.

UN policy and global consensus says that there can never be impunity for crimes against humanity. Chega!

A luta continua. We continue to demand that people who violate the law be held accountable for their crimes.
Thank you.
