**Chart 2 - CPI Timor-Leste: % change December 2011 to December quarter 2012, by Consumption Group**

## EXPLANATORY NOTES

### BRIEF DESCRIPTION OF THE CPI:

The Consumer Price Index (CPI) measures changes over time in the price of a 'basket' of goods and services which account for a high proportion of expenditure by resident households. This 'basket' covers a wide range of goods and services, arranged in the following eight groups:  
 1. Food; 2. Alcohol and tobacco; 3. Clothing and footwear; 4. Housing; 5. Household furnishings, supplies and services; 6. Health; 7. Recreation and education; 8. Transports and communication.

### PRICE COLLECTION - CPI Timor-Leste:

Each month prices are collected at regular intervals for all items in the Dili region. Prices are also collected at regular quarterly intervals for all items from a representative selection of others regions throughout Timor-Leste. The measure of the interim monthly price movements for each item outside Dili region is then estimated using corresponding Dili region item price movement as an indicator series.

### WEIGHTING PATTERN:

There are 30 sub-groups (that is, categories of like items) in the first series CPI and each sub-group has its own weight, or measure of relative importance. In calculating the index, price changes for the various sub-groups are combined using these weights.

For further explanations please refer to the National Statistics Directorate website [www.dne.mof.gov.tl](http://www.dne.mof.gov.tl)
