

EXPRESSION OF INTEREST FOR ENVIROMENTAL IMPACT STATEMENT AND ENVIROMENTAL MANAGEMENT PLAN SCOPE OF SERVICES – KTJ OIL DEVELOPMENT

BACKGROUND

Finder Timor-Leste B.V. (**Finder**) is an oil and gas company with an office located in Dili with its operating company, Finder Operations Pty Ltd, located in Perth, Australia. Finder is Operator of PSC-TL-SO-T 19-11 (**PSC 19-11**) and holds the PSC together with its joint venture partner TIMOR GAP PSC 11-106, Unipessoal, Limitada.

Recognising the requirements, Finder is seeking expressions of interest for reputable, capable and experienced service providers for the provision of the Environmental Impact Statement (**EIS**) and Environmental Management Plan (**EMP**) for the KTJ Development Project in accordance with the relevant Decree Law/s set out by the Ministério do Pétrolio e Recursos Minerais (**MPRM**).

This Expression of Interest (**EOI**) does not constitute a commitment, implied or otherwise, that Finder will proceed to further contracting any of the scope of work/services outlined below.

KTJ PROJECT OVERVIEW

The KTJ Project comprised the development of the previously discovered and appraised Kuda Tasi and Jahal oil fields within PSC 19-11 (the **KTJ Project**). The KTJ Project lies approximately 150 km SSE of Suai in Timor-Leste maritime waters (Figure 1). The development is located in approximately 400 m water depth and will comprise the drilling of 3 production oil wells with subsea tieback to a moored Floating Production, Storage and Offtake facility (**FPSO**). The field life is currently estimated to be 7 years. A simple concept development plan is shown in Figure 2.

SCOPE OF SERVICES

The scope of services include the following, but are not limited to:

- Geotechnical and Geophysical Surveys
 - Prepare the Simplified EMP
 - Prepare methodology and parameters of environmental baseline data collection for regulatory approval
- Scoping and Term of Reference (ToR)
 - Prepare and submit ToR for the EIS, defining:
 - Project description, scope and boundaries
 - Environmental and social receptors likely to be affected (marine biodiversity, fisheries, coastal communities)
 - Study methodologies (baseline surveys, modelling)
 - Stakeholder engagement plan
- Baseline studies
 - Collection of data on:
 - Physical environment (oceanography, water quality, sediments)
 - Biological environment (fish, corals, marine mammals, sensitive habitats)
 - Socioeconomic environment (fisheries, shipping, local community use of marine resources)
- Impact Identification and Risk Assessment including
 - Drilling discharges, cuttings, muds
 - Oil spill risks
 - Produced water discharge
 - Greenhouse gas emissions
 - Vessel traffic and anchoring

EXPRESSION OF INTEREST FOR ENVIRONMENTAL IMPACT STATEMENT (EIS) AND ENVIRONMENTAL MANAGEMENT PLAN (EMP) SCOPE OF SERVICES

- Mitigation Measure
 - Adoption of Best International Petroleum Industry Practices
 - Measures must include:
 - Use of low-toxicity drilling fluids
 - Zero discharge policy for hazardous materials to marine environment
 - Spill prevention and control system
- Environmental Management Plan (**EMP**)
 - Mitigation plans, monitoring program and compliance indicators
 - Waste management plan
 - Emergency preparedness and response plan
 - Oil spill contingency plan (Tier 1, 2 and 3 response capacity)
 - Roles, responsibilities and obligations
- Public Consultation with required stakeholders
- Decommissioning and Site Rehabilitation Plan

CONSULTATION

Should your company require further technical details, please kindly contact Luis Pereira, our Timor-Leste Country Representative, at email EOI@finderenergy.com.

Submission of Application

Interested service providers should submit their EOI for the specified services by email to EOI@finderenergy.com, **by no later than 21/10/2025**.
