

REPÚBLICA DEMOCRÁTICA DE TIMOR-LESTE

# State Budget 2014

## Budget Overview

# Book 1

**“Be a Good Citizen. Be a New Hero to our Nation”**

Be a good citizen, be a new hero to our nation

## **Book 1 – Budget Overview**

### **Preface**

The Organic Law of the Ministry of Finance specifies the responsibility of the National Directorate of Budget to collect and manage financial information relating to the public sector and publish the statistical results.

In accordance with this provision and to raise the transparency of the public finances, the Ministry of Finance is publishing the final version of the documents relating to the General Budget of the State 2014, promulgated by His Excellency President of the Republic, following the debate in the plenary session of the National Parliament.

The documentation for the General Budget of the State 2014 consists of the Budget Law, which is published in the *Journal of the Republic*, plus six supporting budget books:

#### **Book 1 Budget Overview**

Book 2 Annual Action Plans

Book 3 Districts

Book 4a and 4b Budget Line Items

Book 5 Development Partners

Book 6 Special Funds

Book 1 *Budget Overview* describes the overall budget strategy of the Government. It provides information on the international and domestic economic outlook, expected domestic and oil-based revenue including expected sustainable income, and overall expenditure in the medium term and the main new initiatives in the coming year.

Budget documentation is available on the website of the Ministry of the Finance, [www.mof.gov.tl](http://www.mof.gov.tl). Inquiries relating to this publication should be directed to the National Director of Budget, Mr. Salomão Yaquim on email [syaquim@mof.gov.tl](mailto:syaquim@mof.gov.tl) or telephone +670 333 9520.

I consider that this document will increase awareness and understanding of the Government's finances and help people to become good citizens and heroes to our nation by providing them with relevant information on the 2014 State Budget.

**Emília Pires**

# Part 1: Prime Minister's Speech

Your Excellency,  
The Speaker of Parliament

Your Excellencies,  
The Deputy Speakers of Parliament

Your Excellencies,  
The Members of Parliament

Fellow Government members,

Ladies and Gentlemen,

It is with the greatest respect that, for the last time as the Prime Minister, I come before this Great House to present a State General Budget.

Everyone here has been consolidating the democratic exercise in Timor-Leste for the past few years, representing citizens who are benefitting from institutional dialogue and interaction.

The creation of a sound platform for peace and stability has enabled the institutional architecture that today is maturing as a result of a fluid dynamic of debate, of checks and balances, as well as the search for consensus and joint efforts bringing everyone together around the same project.

We all have a common goal: to promote the growth of Timor-Leste in a manner that is inclusive, balanced and sustainable. I believe that this Great House should be the meeting point for positions and solutions that, first and foremost, serve the national interest.

The debate on the SGB is the one that, coming before a new tax period, requires us to set goals and objectives to be achieved, as well as a corresponding plan in terms of activities and funding. This is the debate in which we clarify the work to be undertaken over the next twelve months. As such, it should be well thought out, so that all available resources can be maximised to benefit all Timorese citizens.

It is to serve that higher goal of improving the living conditions of Timorese families that this Great House needs to find a broad and joint solution.

We want the 2014 State General Budget to reflect the various perspectives in Timor-Leste, so as to create a consensus that allows us to talk about a participative democracy.

Let us focus on the things that bring us together, which are much stronger than the things that may keep us apart. We all want our children to be able to go to school, grow into capable adults, be employed - to be able to provide healthy and happy lives for their

families. We want our elderly and our most fragile citizens to be supported by special services. We want our economy to prosper. We want every Timorese to be able to fulfil new dreams, born from the great dream of achieving independence. That was the seed that today gives birth to our entire future.

Your Excellencies,

The international context in which we dare to dream is not an auspicious one. We are witnessing a global economic framework where overspending led to a crisis in which the solutions centred on austerity are failing to work. The recession spiral faced by many developed countries today is a result of governing that neglects to look at the people. I believe that the State institutions of these developed countries have failed to meet the standards prescribed by their laws in terms of financial management and budget control over expenses and, particularly, sovereign debts. The most interesting aspect is that, as a new country, we were encouraged to learn from them, to copy their standards. Today we know that in order to prevent similar situations we must strengthen our own agencies so as to have a good practice of checks and balances.

We have learned from others and we reaffirm our commitment before Timorese families, before the men and women that contribute to a growth that should be inclusive and sustainable, before the citizens that are most vulnerable and that require special care, and before the young people who are the future and who deserve the opportunity to build their new country.

This is our ultimate commitment.

Timor-Leste has managed to grow despite the global crisis, with modest, albeit positive, signs of economic development. Although much of this growth is boosted by the enormous wealth of our energy resources, Timor-Leste must be able to make use of this favourable wind. It is urgent to seize the moment to invest in economic diversification, so as to make our economy more mature in the medium term.

However, having the wind in our sails is not of much use if we do not know our destination.

Today we know the path we want to take and the country we want to become. We have a plan that enables us to look forward to the concrete goals that we want to achieve. Twenty years from now, we want to have a medium-high income Timor-Leste with a prosperous, educated and healthy population.

In order to get there we have prepared a plan that is today the key matrix of our governing action. The Strategic Development Plan 2011-2030 is presently ongoing and this 2014 State General Budget is simply the materialisation of the current stage of the Plan.

This Plan provides for an approach that encompasses the short, medium and long terms within a shared vision for a country that seeks to grow well, and on sound foundations. The draft 2014 Budget that we present here today responds in full to the needs of the present, while preparing to sustain the future. It includes policies and projects with immediate

impacts, complemented by programs that will produce visible results in a few years, but which are still part of the country's growth as a whole.

With this plan, we want to make use of this favourable wind in order to achieve a development that is primarily inclusive and sustainable.

It must be inclusive in order to respond equally to the needs of every Timorese citizen, from the coastal communities to the mountains in the countryside.

It must be sustainable because it cannot respond only to the immediate needs of our population. Instead, it must respond to our long term vision, so as not to jeopardise resources for future generations.

It is because of the vital importance of sustainability that we also insist that public accounts must be managed in an accurate and professional manner. As such, we will continue encouraging the State institutions to increase their commitment to achieving greater efficiency and transparency.

Indeed, this commitment in relation to accuracy, accountability and transparency has been acknowledged internationally in different forums. In 2012 we moved up 30 places in the world transparency ranking, measured by the Corruption Perception Index. In 2013 the Resource Management Index report by the Revenue Watch Institute recognised the transparency of the systems adopted by Timor-Leste for managing its petroleum wealth, by putting our country in 13th place, ahead of many of our more developed neighbours, in what concerns safeguards and quality control.

Timor-Leste's exemplary compliance with the Extractive Industries Transparency Initiative has led other countries with similar resources to seek to learn from our experience so that they may replicate the good practices, transparency, and the accuracy mechanisms we have established in Timor-Leste.

Your Excellencies,

The draft SGB we present today also respects the issues of accuracy and reflection in our administrative management and financial execution.

Consequently we propose a 2014 State General Budget of \$1.5 billion. This is in line with our execution capacity, our pressing development needs and the need to control inflation.

We recognise that the economic growth of the last few years has also led to increases in inflation that affect the purchasing power of the Timorese people. As such, we have invested in better inflation monitoring and review in order to curb inflation.

We know today that the reasons for this increase include several factors, not all of which can be controlled by the State. Therefore we are creating conditions that will better prepare us to control inflation. We do not want to see inflation shoot up, but we also want to continue our vital investments in development programs.

This is the time to build the future, without losing sight of our macroeconomic goals.

This is why in 2013, for the second consecutive year, we have managed to reduce considerably the total budget amount. This is part of an ongoing effort of fiscal sustainability and resource maximisation.

Defining priorities that continue the work undertaken in previous years is essential for preventing wastefulness and disorientation in public accounts:

- Investing in the people, namely in the areas of health, education and professional training.
- Developing of basic infrastructure.
- Achieving integrated, inclusive and sustainable economic growth, based on agriculture, tourism and the petroleum industry.
- Consolidating the institutional framework, a stalwart of good governance, peace and stability. This is vital for enabling all other sectors to succeed.

If we look at the fund allocation per Ministry, it is easy to see that the Fifth Constitutional Government gives priority in this State General Budget to issues concerning social wellbeing and infrastructure. The four Ministries with the most significant financial contributions are the Ministry of Public Works, the Ministry of Social Solidarity, the Ministry of Education and the Ministry of Health.

Consequently the 2014 State General Budget reflects the attention paid to the key priority sectors for the Fifth Constitutional Government by continuing major investments made in previous years and by starting new projects and programs seeking to provide a more effective response to the short, medium and long term needs of the Timorese.

This Budget makes significant increases in health and education expenditure, within a general framework of fighting poverty.

The budget for the Ministry of Health increases from \$64.3 million in 2013 to \$67.2 million in 2014.

This increase will enable the full implementation of the health service delivery policy and the construction of 39 health clinics under the integrated suco health plan. These programs seek to strengthen primary services by expanding national coverage, while improving specialised services in areas such as trauma care, pneumology, oncology and cardiology, so as to expand national specialised health care.

The budget for the Ministry of Education increases from \$92 million in 2013 to \$106.6 million in 2014, representing more than 15% of the SGB. This is evidence that the Government considers it a priority to strengthen the education of our children and young people.

This financial package will ensure the construction of 100 new pre-schools, the refurbishing of 50 basic education schools and the construction of four new model schools for General Secondary Education. Complementing the investment in the improvement of school infrastructure, the amount allocated to the Ministry of Education will also be dedicated to curricular improvement and to the development of the pedagogic and educational capacity of teachers. In 2014 alone we expect 1500 new teachers to graduate the complementary training course and to be ready to enter teaching careers.

The two special funds – the Human Capital Development Fund and the Infrastructure Fund – also reflect the primary needs.

The Human Capital Development Fund has been allocated a total of \$40 million, which is sufficient to meet the vital need of improving our human resources. The main difference here is the reorganisation in the allocation of funds, focusing on technical and professional training, whose allocation will increase from \$4.8 million to \$10.1 million. The amount allocated to scholarships remains very significant, so as to continue enabling Timorese students to receive professional training abroad.

The amount allocated to infrastructure is reduced from \$604.4 million in 2013 to \$425.1 million in 2014, reflecting the results already achieved in the previous year and the ongoing financial management for projects underway.

Regarding the results achieved, the success of the Electricity Project, with the full operation of the power plants of Hera and Betano, will enable a more efficient national power distribution, which will have a clear impact on the living quality of our People and on the development of economic activities that depend on electricity.

The ongoing major projects, such as the Tasi Mane project, the construction and rehabilitation of roads and bridges and improvements in terms of port and airport infrastructure, will be implemented according to their respective stages. However, since the corresponding expenses will be paid gradually instead of through lump sums, the annual allocation for each will be smaller and the total amount will be smaller than the in 2013.

This does not mean that the State no longer wants to base economic growth on the development of core infrastructure. Rather, it means that the State wants to rationalise resources more efficiently, in line with our execution capacity, so as to have greater accuracy in the sustainable management of public expenditure.

Consequently this 2014 Budget will cover basic infrastructure directed in particular to our rural and remote areas, such as the installation of water systems in 25,000 rural households, the rehabilitation of 200 km of rural roads in the 13 districts and the construction of 3,000 units of solar panels and wind energy systems in Atauro and Oecusse.

In response to our market needs, we will be investing \$10.5 million in the extension and construction of the new Terminal for the President Nicolau Lobato International Airport and \$13.2 million in the new ports, including the preparation of the new Tibar Port. Together,

these initiatives will increase the confidence of foreign investors in Timor-Leste by creating the essential conditions for access to commodities and services.

\$20.9 million under the Infrastructure Fund will also be allocated to the development of Oecusse. As you know, this district will benefit from the creation in 2014 of a special Economic Zone, as a result of an initiative led by Dr Mari Alkatiri, which will transform the economic, social and cultural landscape of our enclave, so as to approximate its growth to that of the rest of the country.

Containing the investments made in infrastructure allowed us to compensate the budget in our traditional sectors, such as Agriculture and Fisheries. This is in line with the intention by the Strategic Development Plan and the Government Program of diversifying the non-petroleum economy, particularly Agriculture and Tourism. Consequently, agriculture will benefit from an allocation of \$25.25 million.

Your Excellencies,

The draft 2014 State General Budget suggests a diversified approach in the short, medium and long term for the national cause that has replaced the struggle for independence as the top priority of Timor-Leste: the fight against poverty.

In regard to this fight, the Millennium Development Goals are presently being revised for the post-2015 period. Timor-Leste has been participating in this debate and sharing the lessons we learned as a country in transition, along with the other 17 countries of the 'g7+' group.

So far we have achieved progress in the Goals related to the child mortality rate, the under-5 mortality rate and the cases of tuberculosis detected and treated.

The considerable reduction of these indicators shows the positive effect of the reforms implemented for improving the conditions of health services, namely by increasing the number of health professionals and establishing partnerships with civil society for creating information campaigns with strong impacts on the people.

In 2012 we also achieved the MDG related to the percentage of Parliamentary seats occupied by women.

Today we are well placed to improve the national results concerning two other MDGs: the net enrolment rate in primary education, which is already close to 90%, and the percentage of deliveries of babies assisted by qualified health professionals.

Although Timor-Leste continues to be dramatically affected by poverty, these modest improvements represent a collective effort and an approach by the whole of Government towards an inclusive economic growth that can improve the living conditions of every Timorese citizen both now and in the future.

This imperative is the basis for a Plan that covers the rehabilitation of roads to facilitate access by families to health clinics, the construction of schools to educate new generations, the creation of irrigation systems to improve agricultural production and training in the tourism industry to diversify our economy.

This imperative is present throughout the State Budget. No program makes sense if it is implemented in isolation. Only by implementing this whole picture can we respond to the challenges ahead responsibly and sensibly.

Your Excellency  
The Speaker of Parliament,

Your Excellencies  
The Members of Parliament,

This SGB features an increase of 11% in the three appropriation categories under recurrent expenditure. However, the national project contained in this financial document cannot be explained by simplistic calculations, which is why we must look at what is reflected in this draft budget in greater detail.

A first simplistic assessment of the increase in recurrent expenditure might be deceiving. It is essential to understand that a large part of this increase is achieved by adding social and physical investments in priority areas such as health and education. If we observe each expenditure category, we may see that the goal is not to feed a State apparatus but rather to guarantee a series of core public services for Timorese families.

If the category of 'salaries and wages' benefitted from increases it is because we consider that professionals such as health professionals are entitled to a special career regime, for which we allocated \$4.7 million. The same applies to the education sector, where it is vital to motivate the staff in order to increase national standards.

Similarly, the category of 'salaries and wages' includes staff from the Ministry of Foreign Affairs and Cooperation. In 2014, this ministry will be establishing new embassies in Laos, Cambodia, Brunei and Myanmar. These new representations abroad will help Timor-Leste increase the country's influence and reputation, which is particularly important for Timor-Leste to join ASEAN.

We should also try to understand the increases in the category of Goods and Services, which also falls under that which is called recurrent expenditure.

The investment in goods and services will cover, for instance, the operational and maintenance costs of the power plants of Hera and Betano, thus ensuring the distribution of power, which is absolutely essential for improving the living conditions of all Timorese citizens and for developing the economic.

In the sector of Education, \$26.9 million is allocated to the School Meal Program, which serves to keep our children in school and to provide them with better nutritional balance,

thereby preventing malnutrition. Also in the sector of Education, \$9.5 million is allocated to salaries for teachers in the transitional regime, which will benefit 4,220 teachers throughout the country. This will strengthen the role of the people who are the frontline educators of our children and who will shape our future.

The health sector also benefits from this category, since it receives \$3 million for purchasing good stuffs for hospital patients, thereby improving national medical care. It also receives \$13 million for purchasing medicine, so as to ensure better conditions for our patients and for people with disabilities.

Our traditional economic sectors are also covered by the budget item of “Goods and Services”, through programs by the Ministry of Agriculture for purchasing seeds in the amount of \$4.6 million (indispensable for ensuring food security) and through the continuity of the Program titled “Suku ida, Produto ida”, which will contribute \$3 million for encouraging specialised local production.

Inside recurrent expenditure we can also identify a series of basic social investments under public transfers.

One of the main recipients of public transfers is the Ministry of Social Solidarity, which is allocated \$139.4 million for vital programs such as “Bolsa de Mãe” and for financial support to our veterans.

Under public transfers, the priority sectors of Education and Health benefit from essential investments that will ensure the operation of their services. The Ministry of Education will be allocated \$25 million for rehabilitating schools in the 13 districts, including equipment, water and sanitation facilities and electricity. The Ministry of Health will receive \$9 million for subsidising health posts throughout the country.

This category also includes \$10 million allocated to SEPFOPE for developing rural roads, which will enable the Government to improve infrastructure for our rural populations and to generate employment throughout the country. Seeking to achieve rural development, public transfers also include \$11 million for the Ministry of Justice’s “Ita nia Rai” Program related to land compensation, as well as \$13.7 million for the National Suco Development Program, a large multiyear program targeting balanced development in our sucos by way of subsidies according to the specific needs of each suco.

This budget category also contributes to the development of cooperatives and small industrial groups through the MTIE, as well as to small local industries in the area of construction materials through SEPFOPE.

This detailed description leads us to conclude that this Budget is broad, covering the capital development component, which is directed at physical investment, as well as social investment for economic growth and employment creation through recurrent expenditure.

Your Excellencies,

We recognise that the budget execution rate is below what we intended, due to the obstacles we still face when implementing certain projects. Nevertheless, we have been making the necessary corrections and we want this 2014 State General Budget to reflect the importance of improving that implementation capacity.

We know that we will have to strengthen the verification and monitoring instruments of the Government Program and of the Strategic Development Plan, so as to ensure proper adequacy between plans and actual outcomes.

As such, this year we decided to create an instrument that will enable us to monitor the implementation of the Strategic Development Plan more closely. Thus we established the Development Policy Coordination Mechanism, which looks at the Strategic Development Plan in an integrated manner, so as to interlink sectors and economic initiatives.

Ultimately, this mechanism seeks to make the implementation of the Strategic Development Plan more effective every year, favouring better inter-ministerial coordination. It seeks to achieve a whole-of-Government approach to future challenges.

As a whole, this draft 2014 State General Budget benefits at this time from the possibility of using the enormous wealth of our natural resources to support economic growth and, in turn, stimulate the private sector.

Here the Strategic Development Plan is also very clear: in the absence of a dynamic private sector that can drive the economy on its own, it is the State that must lead this growth by creating the necessary conditions in terms of infrastructure, human capital development, institutional strengthening, etc., so that private companies will take on a greater role.

I believe that we are seeing the first signs that suggest we are on the right path. We have carried out several initiatives in order to boost the Timorese business sector and to encourage foreign private investment in our country.

PDD I and PDD II had already allowed us to nurture the private sector throughout the country by implementing local projects for constructing small infrastructure works. Subsequently the Integrated District Development Plan (PDID) made it possible to extend those projects, leading to the creation of the National Suco Development Plan, which has already implemented projects in 30 sucos. In addition to boosting the local private sector, this also promotes decentralised decision-making that takes into consideration the specific needs of each local community.

Along with these major Programs, there are several other initiatives nurturing the national market.

As you know, in June 2013 the Registry and Verification of Enterprises Service (SERVE) became operational. This service facilitates the administrative aspects for enhancing the national business environment. The figures presented by SERVE show that this initiative has indeed accelerated the development of the private sector, with 1,470 companies created in the first three quarters of 2013. Most of these companies are national companies.

These figures show that we are starting to see some of the minimum conditions required to give confidence to Timorese professionals to start their own businesses. Starting a business requires significant effort and investment, technical capacity and, more importantly, confidence that personal and financial investments will be rewarded.

This confidence, your Excellencies, is one of the most important signs that the country is looking to the future and starting to overcome the fear of a painful and uncertain past that has previously hindered Timorese citizens from starting their own businesses. Still, I must say that it is vital and urgent to promote a broad debate in 2014 on mechanisms for providing credit to national businesspeople, with rigorous rules in terms of compliance with obligations.

The greater strength of the private sector will allow us to gradually increase tax revenues. Indeed, tax revenues are already increasing, with the Government expecting a 13.5% increase from 2013 to 2014.

Your Excellency

The Speaker of Parliament,

Your Excellencies

The Deputy Speakers of Parliament,

Your Excellencies

The Members of Parliament,

Ladies and Gentlemen,

This domestic confidence is also starting to reconfigure Timor-Leste's role in the world.

The country's profile abroad has been changing. While we were once the beneficiaries of intensive international assistance, today we are a resilient country finding its own place in the region and in the world.

It is almost a year since the United Nations International Mission in Timor-Leste and the ISF departed, and in many ways we are exceeding our expectations.

Until very recently we were mostly the recipients of development aid and seen as a fragile State. Specialists did not believe in our national project, thinking that we would need longer international intervention before we could become the masters of our fate.

In a short time, that vision changed radically. Today Timor-Leste is seen as a reliable and committed partner. The good results we have been presenting and our pragmatic vision of our future have earned the confidence of our international partners.

This dialogue with our partners has been facilitated by the fact that we created the Strategic Development Plan 2011-2030. Timor-Leste has a plan and knows the path it wants to take.

Many thought that we had not yet built a solid base to stand on our own. A year later, I believe that we have proved otherwise. The economy did not suffer as had been foreseen, and we continue to have security and stability. I believe that everyone is committed to this non-partisan effort of building the country into what we want it to become.

This Budget reflects this gradual autonomy that we have achieved as a result of reduced dependence on our development partners during the last few years. In 2014 the contribution by development partners to the expenditure by the State will be 10.6%, against 11.0% in 2013.

This is another promising fact within a broader context of Timor-Leste's position in the world and in the region.

Today we are starting to become attractive to international investment, as can be seen by Japan's RICOH PENTAX's decision to settle in Timor-Leste. The gradual replacement of international development aid with international private investment shows that, in addition to having a national impact, the ongoing efforts to establish the basic conditions for developing the private sector are having an impact on our international partners.

Timor-Leste is one of the most fiscally competitive countries in the CPLP, as was stated in the recent report titled "Paying Taxes 2014". This validates this Government's political option of keeping the total tax rate low. It presently stands at 11%.

The confidence of the global market also reflects the responsibilities that we have been given in several international forums and that we have been meeting with great accuracy and commitment.

Just last year we were invited to assume the Presidency of UNESCAP and in 2014 we will assume the Presidency of the CPLP. The active presence of Timor-Leste in these arenas has enabled the development of key bridges to some of the regional areas in the world where we have privileged partnerships.

As an island country, we only have land connection with our Indonesian brothers and sisters, with whom we are developing an exceptional relationship. Nevertheless, we have a series of connections that go much beyond our land border and that may be capitalized by membership in ASEAN.

While we already have stable bilateral relations with Indonesia, we are now establishing a tripartite relationship, having Australia as the third member of this strategic partnership. The tripartite growth initiative between Timor-Leste, the neighbouring provinces of Indonesia and Australia's Northern Territory seek the integrated development of the three States in this sub-region, by strengthening sectors as varied as tourism, energy, agriculture

and R&D. We also want to have social and cultural initiatives that will strengthen the ties of friendship with our closest neighbours.

We are also continuing to lead a new paradigm with the g7+ for the development of the so-called fragile States, which exist in situations of conflict or transition. This leadership has also enabled Timor-Leste to assume a different standing in the world.

We are now a model for fragile States and for nation-building in post-conflict areas worldwide. Timor-Leste stands at the cutting edge of the aid effectiveness movement.

As a result of this framework we have created the Timor-Leste Cooperation Agency, through which we have been providing assistance to several countries.

The last case was that of Guinea-Bissau, in November of the last year. We offered \$6 million and we sent a technical team for supporting the electoral registration process, with a spirit of interagency cooperation and of sharing the valuable experience that the Timorese Technical Secretariat for Electoral Administration has already acquired.

In all these areas we are creating a renewed country that is attentive to what takes place both internationally and domestically, as well as a country that takes care of the people who live in it.

Your Excellencies,

The draft 2014 State General Budget that we present here today reflects in full the national project that we have for Timor-Leste.

In compliance with our commitment in terms of accuracy, reflection and transparency, this Budget responds to the present and future needs, while taking into consideration the issues of fiscal sustainability and proper management of public accounts.

The challenges ahead of us are enormous, but today we know the path we want to take so that Timor-Leste's Government reflects the aspirations of all its citizens, both now and in the future.

Today we begin a new stage on this path!

This is a stage that should be supported by constructive dialogue, within a spirit of common commitment towards our core national interest which is the wellbeing of every Timorese citizen.

Thank you very much.

Kay Rala Xanana Gusmão

Dili, 9 January 2014

## Part 2: Description and Analysis of the 2014 State Budget

### 2.1: Executive Summary

#### 2.1.1: The Government's Goals and Policies

The Annual State Budget lays out the Government of Timor-Leste's policies for the coming year in order to meet its priorities: namely a higher standard of living for all citizens achieved via economic growth that is inclusive, balanced and sustainable. This means prioritizing the health, education and security sectors in the country, while developing infrastructure on a large and small scale and ensuring sustained public transfers to the most vulnerable sectors of the population. Budget Book 1 for 2014 will lay out how the Government intends to pursue these policies in the coming year.

**Table 2.1.1.1: Combined Sources Budget 2012-2018, \$ millions<sup>1</sup>**

Sources: National Directorate of the Budget and Development Partnership Management Unit

Table 2.1.1.1 lays out the two sources of expenditure in Timor-Leste in 2014: the Government and Development Partners. The total expenditure is \$1,684.9 million; \$1,500.0 million from the Government and \$184.9 million from Development Partners. This represents a continued decline in reliance on Development Partners; both in absolute terms and as a proportion of overall spending (11.0%, down from 12.9% in 2013). It should be noted that the steep decline in outer years is due to partners not yet knowing how much they will allocate in those years (see Budget Book 5 for more details).

<sup>1</sup> A note regarding data in tables and figures: Throughout the Budget book, numbers are generally given to one decimal place in tables and graphs, usually either in millions of US Dollars or as percentages. Occasionally on close inspection it may seem that minor errors have been made in the decimal place when adding up the figures in order to get to a 'total'. This is a result of rounding error, which is inevitable when displaying such large figures in a readable manner. A rounding error is not really an error it is just the way arithmetic works when long figures are displayed to a few decimal places.

Table 2.1.1.2 lays out Government expenditure in more detail. The total budget is being cut for a second consecutive year, by \$147.5 million<sup>2</sup>. This is in line with the Government's policy of ensuring fiscal sustainability. Recurrent expenditure has increased, but much of this increase can be classified as human capital or social investment. Human capital

<sup>2</sup> Budgeted expenditure in 2011 was \$1,806.5 million.

investment will allow more people to be productively employed in the formal sector; this will contribute to higher and more balanced economic growth. Social investment will ensure that vulnerable and deserving members of our society share in the benefits of economic growth, thus making it more inclusive.

## 2.1.2: Economic Overview

Timor-Leste's economy grew by 7.3% in 2011 in real terms. The petroleum sector of GDP grew by 6.0%, half the rate of growth of the non-petroleum sector (12.0%)<sup>3</sup>. Nevertheless, the petroleum sector maintains its dominance of Timor-Leste's economy, representing 76.9% of the country's total GDP.

The very high growth rate of non-oil GDP in 2011 can be traced back to the strong increase in Government expenditures during that year, in particular capital and development expenditures. Some of this increased expenditure reflected the Government's "frontloading" policy intended to build the conditions necessary for the country's medium and long-term economic development via the short-term improvement of key infrastructure and human capital. This is in line with the Strategic Development Plan (SDP).

However, with this high rate of economic growth, inflation has increased substantially. At the end of December 2011, prices, as measured by the Consumer Price Index (CPI), were 15.4% higher than at the same period of the previous year, and thus inflation was well above the SDP target range of 4-6%.

With actual Government Capital and Development expenditures declining in nominal terms in 2012, mostly due to low execution rates, key economic sectors that had fostered growth in 2011, such as construction, are expected to have reduced. The rate of growth of the non-petroleum sector of GDP, which is forecasted at 8.2% for 2012, is still strong but substantially below the 2011 rate. The rate of inflation decreased throughout 2012 and stood at 10.9% in December 2012.

In the medium term, the Government expects that the frontloading policy, along with various reforms (e.g. passing of a Land Law, SERVE-One Stop Shop, Public Private Partnerships, etc.) to create an environment for a strong private sector to emerge as the dominant source of growth and thus maintain high overall rates of economic growth and increased domestic revenue. The Government is therefore focused on high quality expenditures to support on one hand the private sector and on the other hand the country's social development. This will be achieved by targeted higher recurrent expenditures on education and public transfers, which will provide a better and more productive workforce as well as ensure greater inclusiveness. The 2014 budget was thus prepared within a

---

<sup>3</sup> Timor-Leste National Accounts 2000-2011, DGE (2013). In the text, when referring to 'Oil' both oil and gas are considered.

framework of high quality expenditures consistent with curtailing inflation and returning to a fiscally sustainable spending path.

### 2.1.3: Expenditure

Total Government expenditure in 2014 is \$1,500.0 million, a 9.0% decrease from 2013. This reduction shows the Government's determination to ensure fiscal sustainability. The decline in expenditure is mostly driven by reductions in Capital and Development, particularly in the Infrastructure Fund which has been allocated \$368.6 million (39.0% less than last year).

The Government has reduced the Infrastructure Fund's budget for two reasons. First, the Government wishes to concentrate on the institutional capacity on the most important projects for Timor-Leste's development. This should improve project implementation, efficiency and value for money. Second, the amount allocated for 2014 is more realistic than in previous years and should lead to a higher execution rate.

Recurrent expenditure has increased by 18.0%, mostly driven by increases in Public Transfers and Goods and Services. Much of this increase in recurrent expenditure is, however, for either social or human capital investment. The Government regards expenditures on human capital as essential in order to help increase the capacity and productivity of the workforce (which will promote future growth). Moreover increased social investment will contribute to inclusive, balanced economic growth; as greater support will be given to poorer and more marginalized sectors of the population who would otherwise not benefit as much from economic growth.

### 2.1.4: Revenue

The Estimated Sustainable Income (ESI) for 2014 is calculated at \$632.3 million, which is \$165.6 million lower than the 2014 ESI estimate in last year's budget. This downward revision is due to an expected decrease in production levels in Bayu-Undan compared to previous years. The 2014 ESI calculations started using Brent crude oil instead of WTI crude oil as price benchmark, due to its better tracking of Bayu-Undan products. There are no other changes to the methodology of the ESI calculation.

Overall petroleum production peaked in 2012, but revenues remained strong in 2013 due to high oil prices. The Petroleum Fund balance is estimated to be \$14.1 billion by the end of the year. Petroleum revenues are then forecasted to decline quite sharply to \$1,443.1 million in 2014, before temporarily levelling off until 2016. The Petroleum Fund balance is estimated to reach \$15.4 billion by the end of 2014, assuming \$270.6 million of withdrawals in excess of the ESI.

In terms of domestic revenue, 2014 is set to continue its upward trend in terms of taxes and other charges, increasing to \$166.1 million, or 13.6% more than the forecast for 2013 in last year's budget. This projected increase is mostly driven by increases in taxes, particularly

indirect taxes such as Excise and Import tax. The Government is committed to increasing domestic revenues in order to move to a less petroleum-dependent economy.

### 2.1.5: Financing

The financing section of this Budget Book outlines and explains how the non-oil fiscal deficit (which is defined as domestic revenue minus total expenditure) is funded in 2014 and the outer years. The major financing items in the 2014 State Budget are the ESI, excess withdrawals from the Petroleum Fund, loans and the use of the cash balance.

## 2.2: A Review of Recent Reforms

The Public Financial Management (PFM) system consists of the institutions, laws and information technology infrastructure through which the Government spends, collects and manages money. A strong and effective PFM system is essential for Timor-Leste to maintain strong economic growth, control corruption and efficiently deliver Government services.

In Timor-Leste, an effective PFM system is critical to transforming mineral resources into public wealth. The Government has implemented a broad-based and sustained PFM reform program. This reform program is complex and covers many different aspects of PFM and therefore only selected key aspects of it are described here. Other publicly available documents, such as the Ministry of Finance's Strategic Plan, describe the entire reform program in more detail.

Among the above mentioned PFM reforms, the recent reforms include three major items: Firstly a new and unique paradigm for the "Annual General State Budget" introduced in 2013. This consists of a consensus between the Government and the opposition. As the result, a commission that comprised representatives of committees from the National Parliament was established to discuss the proposed budget with the Government and the proposed 2013 General State Budget was unanimously approved by the National Parliament. This unique situation is representative of Timor-Leste's style and culture of democracy for development, as the country is still in the initial stage of development. The paradigm is not contradictory to the nature of "checks and balances" between the Government and the Parliament, because there remains debate at the committee level. Secondly maintaining the culture of "consensus for the national development program." For the first time the Government invited members of National Parliament, including members of the Opposition, to participate in the "2013 Yellow Road Workshop" to discuss challenges and opportunities, and define national priorities and the fiscal envelope for 2014. The "2013 Yellow Road Workshop" was also expanded to development partners and other relevant entities. Thirdly the establishment of an "Audit Court" for Government projects with contract values exceeding \$5.0 million.

## 2.3: Economic Overview

### 2.3.1: International Economy

#### 2.3.1.1: Trends in International Growth

After growing by 5.2% and 3.9% in 2010 and 2011 respectively, global growth in 2012 continued to slow, increasing by 3.1% (Figure 2.3.1.1.1). This was due mainly to a reduction in growth from the countries that had been leading the global recovery from the financial crisis; i.e. the ‘emerging and developing economies’. Growth in emerging and developing economies fell below 5% in 2012, the lowest rate since 2001, if one excludes the year of the global recession (2009). This reduction was due mainly to lower demand from key importing advanced economies and to domestic policy tightening (e.g. credit tightening in China due to fears of a real estate bubble and interest rate hikes to control rising inflation in India and Brazil).

Global growth is projected to remain sluggish in 2013 and 2014, at 3.1% and 3.8% respectively. These low rates reflect continued expected underperformance of emerging and developing economies due to both external (e.g. low demand from advanced economies, low commodity prices) and internal (e.g. policy tightening) factors as well as the prolonged Eurozone recession and weaker than expected growth in the US.

**Figure 2.3.1.1.1: Real Economic Growth 2010 – 2014**

Source: National Directorate of Economic Policy and IMF WEO July 2013

Table 2.3.1.1.1 illustrates GDP growth rates of the major economies in Asia and Timor-Leste. This area includes economies that are growing at very high rates and Timor-Leste is no exception. Indeed Timor-Leste had the highest growth rate in the region in 2011. For most of these countries, projections for 2013-2014 are in line with 2011-2012 and thus below the rates in 2010 and before the financial crisis. The main reasons are similar to those reported

above for the emerging and developing region; that is a combination of domestic factors (policy tightening) and external ones (lower demand from importers; lower commodity prices).

**Table 2.3.1.1.1: Real Regional GDP Growth Rates (%)**

Country	Actual			Projection	
	2010	2011	2012	2013	2014
China	10.4%	9.3%	7.8%	8.0%	8.2%
Australia	2.6%	2.4%	3.6%	3.0%	3.3%

\*\* Preliminary forecast

\*\*\* Target

### 2.3.1.2: Trends in International Prices

Global inflation has been subdued during 2012 and is expected to remain below 4% throughout 2013 and 2014. In 2012, the rate of increase of consumer prices in advanced and emerging and developing economies has decreased to 2.0% and 6.1% respectively, from 2.7% and 7.1% in 2011. IMF projections<sup>4</sup> indicate that this rate is expected to further decline in emerging and developing economies in 2013 and 2014, reaching 5.5% in 2014, mainly because of decreases in both food and energy prices. However, consumer prices are expected to start increasing in 2014 in advanced economies, pulled up by the expected rise in prices in Japan due to increases in the consumption tax.

### Oil Prices<sup>5</sup>

After increasing by 31.6% in 2011, international oil prices rose by only 1.0% in 2012. Nevertheless, prices remained high, at \$105.0, mostly because of geopolitical instability in the Middle East and Northern Africa region as well as embargoes and sanctions from Western countries towards Iran and Syria. Prices in 2013 and 2014 are expected to moderate due to increased production in non-OPEC countries and a reduction in demand from advanced economies. Futures markets indicate reductions of almost 5% for both 2013 and 2014. By 2014, oil prices should therefore fall back below the \$100 mark to \$95.36.

<sup>4</sup> IMF WEO April and July 2013

<sup>5</sup> For a description of how petroleum prices affect revenues in Timor-Leste see section 2.5.3 'Petroleum Revenues and Investments'

### **Agricultural Commodity Prices**

After the June 2012 dip and the subsequent rise in July 2012 of international agricultural commodity prices, which alerted markets worldwide to the possibility of a food price crisis, prices stabilized at the end of 2012 and at the start of 2013. After increasing in the months of March and April 2013 because of increased dairy prices due to low production in New Zealand, the FAO food price index declined in May and June 2013 (Figure 2.3.1.1.2), reflecting lower prices of cereals such as maize and wheat. Global production of these commodities is forecast to be strong this year. Rice prices have been stable overall since the beginning of the year, though prices have varied depending on the origin. By the end of 2013, global production, spurred by favourable weather conditions in key producing countries in Asia, is forecasted to rise by 2.0%. This should exert downward pressure on prices.

**Figure 2.3.1.1.2: Food Price Index June 2009-June 2013**

Source: Food and Agriculture Organization (FAO)

### **2.3.2: Domestic Economy**

In May 2013, the 2000-2011 National Accounts for Timor-Leste were published<sup>6</sup>. This publication reflects the strong effort by the Government, through the Ministry of Finance and the General Directorate of Statistics (DGE), to provide a consistent time series of data from 2000-2011. The 2000-2011 National Accounts present three important additions to the previous publication in 2012. First, they extend the 2004-2010 series back to 2000, thus offering to the public four additional years of data for the three approaches to GDP measurement (production, expenditure and income). Second, the availability of new source statistics enabled DGE to update the 2004-2010 series and thus provide a more accurate depiction of the economy during these years. Finally, the publication offers the first official

<sup>6</sup> General Directorate of Statistics (DGE), 2013.

national accounts data for the year 2011. This section therefore provides information based primarily on the 2000-2011 National Accounts release.

### 2.3.2.1: Total Gross Domestic Product

The National Accounts 2000-2011 reinforce the fact that Timor-Leste's economy remains very reliant on the petroleum sector. Table 2.3.2.1.1 shows that more than 75% of Gross Domestic Product (GDP) originated from the petroleum sector in 2011.

**Table 2.3.2.1.1: GDP by Sector, Timor-Leste 2011**

	GDP, \$ millions	Percent of Whole
<b>Whole Economy</b>	<b>4,525.1</b>	<b>100.0%</b>
Petroleum Sector	3,478.4	76.9%
Non-petroleum Sector	1,046.7	23.1%

Source: National Directorate of Economic Policy and Petroleum Fund Administration Unit

This is further depicted in Figure 2.3.2.1.1., which shows the evolution of GDP at constant prices by overall sectors (petroleum and non-petroleum) between 2003 and 2011. During 2004, the year in which production in the petroleum sector came on-stream, the petroleum sector overtook the non-petroleum sector in terms of contribution to total GDP. The dominance of the petroleum sector became more marked in 2005 and reached its peak in 2006. The contraction of non-petroleum GDP during that year and the further expansion of the petroleum sector made the latter reach a share of 87.4% of total GDP. Since then it has stabilized at around 80% of total GDP.

**Figure 2.3.2.1.1: Real GDP 2003 – 2011, \$ millions**

Source: National Directorate of Economic Policy and Petroleum Fund Administration Unit

### 2.3.2.2: Non-Oil GDP

Figure 2.3.2.2.1 illustrates the evolution of actual GDP (non-petroleum sector) from 2005 to 2011 and the preliminary projections for 2012. As seen in the chart, the growth rate of GDP (non-petroleum) has been impressive, averaging 12.1% between 2007 and 2011.

The latest actual data available reveal that the non-petroleum sector of GDP reached \$1.1 billion, having grown 12.0% in real terms since 2010. This growth compares positively to the preliminary estimates for non-petroleum GDP growth in 2011 published in Budget Book 1 2013, which projected a 10.8% real growth rate. The revision was mainly due to an increase in the level of capital expenditures from the Government which had previously been underestimated and, to a lesser extent, a reduction in the trade deficit.

2012 saw a substantial reduction in the growth rate of Government expenditures, and in particular negative growth in capital and development expenditures because of low execution rates. This has consequently exerted downward pressure on economic growth (via a decline in construction activities in the production side of the economy). Moreover, other activities within the formal private sector have not been especially strong, with low growth rates expected for manufacturing, retail and wholesale trade. The strong rebound in the agriculture sector seen in 2012 after a dramatic decrease in 2011, however, along with the continued high growth of Government recurrent expenditures and of consumption of fixed capital are expected to have led to a high rate of growth in 2012 of just over 8%.

**Figure 2.3.2.2.1: GDP, Non-Petroleum 2005-2012**

Sources: General Directorate of Statistics (DGE) and National Directorate of Economic Policy (DNPE)  
2012 Preliminary forecast

The three broad sectors presented in Table 2.3.2.2.1. are the primary sector, which comprises the activities related to the goods obtained from the earth (e.g. subsistence and commercial agriculture, forestry, fishing, mining and quarrying), the secondary sector, which includes construction activities and the production of manufactured goods, and the tertiary sector, which is composed of the service industry (both private and public).

**Table 2.3.2.2.1: Real GDP, Sector Shares in Non-Petroleum Economy (%), 2005-2011**

	2005	2006	2007	2008	2009	2010	2011
<b>Real Non-Petroleum GDP</b>	<b>100.0%</b>	<b>100.0%</b>	<b>100.0%</b>	<b>100.0%</b>	<b>100.0%</b>	<b>100.0%</b>	<b>100.0%</b>
Primary	30.0%	32.5%	28.5%	25.1%	24.1%	21.6%	15.9%
Secondary	8.2%	6.5%	9.2%	15.5%	19.9%	19.5%	23.3%
Tertiary	60.7%	62.5%	61.3%	58.4%	58.8%	59.6%	59.4%
Plus Taxes less Subsidies on Products	1.1%	-1.5%	1.0%	1.0%	-2.8%	-0.7%	1.4%

Sources: National Directorate of Economic Police and Statistics Directorate, Ministry of Finance.

This table shows that the tertiary sector still dominates the non-petroleum economy, with a share of about 60%. The primary sector's share of GDP (non-petroleum) has declined during the past five years to the benefit of the secondary sector, which has seen its share increase from 6.5% in 2006 to over 23% in 2011. Although declining slightly in 2010, the secondary sector's share of GDP (non-petroleum) rebounded spectacularly in 2011 and surpassed the primary sector's share for the first time. This is a potentially positive development for Timor-Leste's economy, as a move away from the primary to the secondary sector is a common characteristic of economies on the pathway to higher-income status. However, two caveats must be made concerning this evolution in Timor-Leste's context.

The first concerns the reasons underlying the decline of the primary sector's share and the second regards the nature of the increase of the secondary sector's share in GDP (non-petroleum). In Timor-Leste, the primary sector is dominated by agriculture, which represents over 90% of this sector. The usual way a decline in the *share* of the primary sector to the benefit of secondary or tertiary sectors can be seen as a positive development is if there has been an *increase* in the *levels* of the secondary or tertiary sectors above the *increase* in the *levels* of the primary sector. This does not seem to have occurred in Timor-Leste: there has indeed been a buoyant expansion of the *levels* of the secondary sector in the last five years but this has been accompanied by a poor performance of agriculture activity. Between 2006 and 2011, agriculture (which also encompasses forestry and fishery activities) declined in absolute terms (and at constant prices – or volumes) by more than 18%, with only one year in this time period registering significant growth (2009 with approximately 8% growth). Moreover, this decline has been due to bad weather conditions. Therefore, the relative growth of the secondary sector in 2011 seems to be due in large part to the poor agriculture activity over the past five years. In other words, had agriculture growth kept pace with the growth of GDP (non-petroleum), the primary sector would have maintained its previous dominance over the secondary sector.

The second caveat pertains to the nature of the growth within the secondary sector. As mentioned above, this sector groups both manufacturing and construction activities. Many developing countries, and notably several Asian developing countries in recent decades, have seen an increase in their GDP with the expansion of manufacturing activities. In Timor-Leste, however, manufacturing represents a small portion of economic activity which has actually decreased in real terms between 2009 and 2011. The growth of the secondary sector is therefore the result of the increase in construction activities. This distinction is important because, on the one hand, growth originating from manufacturing can be sustained in the medium to long run (as long as the industries remain competitive, or as long as new industries emerge), while on the other hand growth from construction activity, particularly in a small country such as Timor-Leste and if financed largely by Government expenditures, will eventually slow down. This implies that for growth to remain strong in the future, a transition to other growth drivers is necessary. In particular, the private sector will need to become the leading force behind economic activity.

**Figure 2.3.2.2.2: Sectoral Contribution to Real GDP growth rates (Non-Oil Sector) 2001-2011**

Sources: National Directorate of Economic Police and Statistics Directorate, Ministry of Finance.

Figure 2.3.2.2.2 shows that the two main drivers of growth in the last five years have in fact been 'Public Administration' and 'Construction', both bolstered by Government expenditures. Other categories have been inconsistent in their contribution to economic growth. Though 'Agriculture' provided a boost to growth in 2009, it was a negative contributor in the two subsequent years. Similarly, 'Wholesale and Retail trade' contributed positively in 2008, 2010 and 2011 but negatively in 2007 and 2009. The only other category with a consistent positive record in the last five years has been 'Information and

Communication’, which is expected to continue on a positive path in the medium term due to the liberalization of the telecommunications sector in 2012.

Figure 2.3.2.2.3 presents the contribution of the main categories in 2010 and 2011 GDP (non-petroleum). In 2011, ‘Construction’ overtook ‘Agriculture’ as the leading category with a share rising from 16.6% to close to 21% of GDP (non-petroleum). In fact, due to bad weather leading to a dramatic decrease in production during 2011 (notably of maize), agriculture was only the third largest category in 2011 with its share declining to 14.6%. The other categories appear to have remained relatively in line with the previous year, with only the ‘Information and Communication’ category increasing its share and ‘Transportation and Storage’ declining sharply, mostly because of high inflation leading to higher transport costs during 2011.

**Figure 2.3.2.2.3: 2010 & 2011 GDP, Non-Petroleum Sector by Category (%)**

Sources: General Directorate of Statistics (DGE) and National Directorate of Economic Policy (DNPE)

In conclusion, in recent years Timor-Leste has achieved one of the world’s highest economic growth rates. The year 2011 was no exception with a 12.0% growth rate (in the non-petroleum sector). However, most of this growth was due to Government expenditure. This is justifiable given the need to kick-start the economy and is in line with the Government’s frontloading policy, reflected in investments for infrastructure improvements and human capital development, both fundamental conditions for long-term development. However, very high rates of economic growth cannot be sustainably upheld by Government expenditures alone, as this would impair on one hand long-term fiscal sustainability and, on the other hand, rates of inflation in line with the SDP target range (i.e. 4-6 percent).

### 2.3.2.3: Domestic Inflation

Recently, Inflation in Timor-Leste has consistently been above the 4-6% target range set in the Strategic Development Plan. For the last two years, inflation has always been double

digits, even though the inflation rate now is considerably lower than it was at its peak. December 2012 year-on-year inflation in Timor-Leste was 10.9% compared to an inflation rate of 15.4% in December 2011 (Figure 2.3.2.3.1). High inflation rates negatively impact the competitiveness of the country as well as the purchasing power of the population of the country. Hence, low inflation is likely to be in line with sustained, inclusive growth.

**Figure 2.3.2.3.1: Change in CPI Dili Year-on-Year by Category (%)**

Sources: National Directorate of Economic Policy and Statistics Directorate

The overall increase from December 2011 to December 2012 was in double digits in both the districts and Dili, though slightly higher in Dili. However, not all categories which contribute to the overall inflation rate have grown at the same rate. The fact that “food and non-alcoholic beverages” category has witnessed a disproportionately high 33.5% increase between December 2010-2012 is worrying, as this is composed of a number of essential goods and is likely to have a broad impact on average consumers.

Sub-categories within the “food and non-alcoholic beverages” that have witnessed substantial increases in their price levels have been the subcategories “rice”, “non-alcoholic beverages”, “fruits” and “vegetables”.

Apart from food, other categories that have witnessed increases include the “transport” and “clothing and footwear” categories. The former, over the course of 2012, witnessed an increase of 10.6% for the whole of Timor-Leste which nevertheless reflects a slowdown of the rate of increase compared to 15.5% increase between December 2010 and December 2011. With regards to the “clothing and footwear” category, there are substantial differences in the rate of increase of prices between Dili and the Districts. While the overall

inflation rate in this category has been moderate (6.0% from December 2011 to December 2012), it has been much higher in Dili (16.3% over the same period), largely driven by the increase in prices in garments for men. However, this also represents a lower rate of increase than that witnessed from December 2010 to December 2011 (19.8%).

Therefore, in general, while most categories have witnessed a slowdown in the rate of inflation compared to that witnessed over the course of 2011, the fact that high food inflation persists is worrying, especially given that, despite efforts to control inflation in the prices of some of these goods, they continue to increase at very high rates. It would perhaps be advisable to further investigate factors underlying this increase.

These trends are likely to be explained by the joint effects of domestic and international factors, although it is likely that inflation in 2012 was mostly caused by domestic factors as international factors have, overall, been reasonably favorable (compared to 2011), such as the (mostly) appreciating dollar and declining international food prices.

In the course of 2012, while international food prices were quite volatile, they remained by and large below their 2011 or 2010 peaks, which should imply lower food price increases in 2012 (even though some of the high price levels from 2011 may have fed into 2012).

Additionally, overall, the dollar appreciated over the course of 2012, especially in the first six months, which would also be expected to relieve the inflationary pressure, especially for imported goods.

International oil prices spiked in the first quarter of 2012 but on the whole remained below their 2011 levels.

It is thus very likely that domestic supply and domestic demand have driven inflation in 2012. High Government expenditure in 2011 and throughout 2012, especially in recurrent expenditures, may explain part of the inflation by stimulating domestic demand.

Year-on-year inflation has consistently remained in double digits. Moreover, a number of items have continued to increase. For instance, in June the price of the “food and non-alcoholic beverages” has increased 5.6% since December 2012. It is also noteworthy that the CPI was revised at the start of 2013, in terms of changing some of the weights and classification of certain goods. These alterations are likely to lead to a more accurate consumption basket, thus portraying inflation better.

#### 2.3.2.4: Employment

Together, the 2004 and 2010 Censuses and the 2010 Labour Force Survey suggest an interesting pattern in terms of agricultural employment. In 2004, the census estimated that 76.2% of the population was dependent on agriculture. However, in 2010, the estimates ranged from 51.2% (2010 Labour Force Survey) to 63.1% (2010 Census). This implies that, despite diverging estimates, both studies seem to agree that there has been a shift out of

the “traditional” sector without a loss in the production of most major crops, suggesting an increase in productivity in the agricultural sector.

In terms of Government employment, the 2010 Census suggests that 15% of the population is now employed by Government<sup>7</sup> as opposed to 6% in 2004 which also seems to highlight the increasing importance of the Public Sector in the Economy. The 2010 Census also estimates an increase in the proportion of the population employed by privately owned firms at 11.5% (vs. 3% in 2004) and decreases in the proportion of self-employed non-agriculture at 6.1% (vs. 10% in 2004). Finally, the Labour Force Survey suggests that 5.2% and 17.7% of the labour force are employed in the ‘Construction’ and ‘Wholesale and Retail’ sectors respectively. These studies suggest two important trends. First, the public sector has become more prominent in terms of employment since 2004. Secondly, the private sector seems to be increasing in importance as the share of employment (as % of the labour force) in the private sector is estimated to almost have quadrupled in six years. Therefore, these studies also seem to corroborate the fact that Timor-Leste has witnessed a diversification in terms of the sectoral composition of its employment between 2004 and 2010 and that the private sector is becoming an increasingly important sector of employment in Timor-Leste.

In terms of the private sector, the recent publications of the General Directorate of Statistics, namely the “Business Activity Survey 2010” and the “Business Activity Survey 2011” enable us to further investigate the current structure of the private sector in Timor-Leste. These studies suggested the creation of almost 10,000 jobs in non-petroleum businesses between 2010 and 2011. However, employment in the private sector is still skewed towards the Construction and Wholesale and Retail sectors which, in 2010 together employed 42.1% of the population working in businesses. This was further reinforced in 2011 due to a marked increase in employment in construction. In 2011, the Construction sector alone employed 31.9% of all the people employed in non-petroleum producing businesses, whereas the percentage employed in the Retail and Wholesale sector remained fairly constant (approximately 23%). Therefore, while the number of jobs created is encouraging, employment in the private sector seems to be driven by two sectors and fuelled by Government spending.

Moreover, while data seems to suggest that employment in Timor-Leste has improved both in terms of size and structure, an estimated 175,000 people remain in “vulnerable employment” (Labour Force Survey 2010). This was largely driven by individuals employed in agriculture and is likely to decrease as the country’s employment moves away from agriculture-dependency.

Regarding the medium and long-term prospects in terms of employment in Timor-Leste, a number of challenges are apparent. Firstly, according to the Labour Force Survey 2010, there are currently 366,000 individuals over 15 years of age who are considered “inactive”;

---

<sup>7</sup> These figures include public administration, education, health, social services, community services and defence.

a large portion of them being students. Secondly, according to the same document, there are 458,000 people below the age of 14 years of age, implying that within the next 10-20 years, Timor-Leste will have a very substantial inflow of jobseekers

The stimulation of economic activity through Government expenditures will translate to job creation in Timor-Leste. The 2014 State budget guarantees sufficient funding for the financing of the Government wage bill. This includes a number of additional civil servants that will be hired and/or become permanent staff in 2014, as detailed in the expenditure section.

The State budget also contains a substantial amount for infrastructure development throughout the country. These projects have the potential to create, overall, an estimated 16,000 direct jobs in 2014<sup>8</sup>. In addition, a number of indirect jobs will be created, although estimating these becomes very complicated given the unpredictable nature of the results of new infrastructure and a scarcity of data available at this point.

#### 2.3.2.5: Millennium Development Goals

The Millennium Development Goals (MDGs) consist of several broad goals measured by a series of economic and social indicators, which roughly track a given country's development path. This section will provide an overview, using the latest available data of each of the MDGs and related statistics.

##### **Eradicate Extreme Poverty and Hunger**

In terms of poverty, the 2007 Timor-Leste Living Standards Survey indicated that 49.9% of Timorese people lived under the national poverty line of \$0.88 per day. The incidence of poverty, as measured by the World Bank in 2010, decreased to around 41%. This decrease was largely attributed to post-2007 growth. Efforts are underway to obtain a more recent estimation of poverty in Timor-Leste which can be directly compared to the figure derived from the 2007 TLSLS.

With regards to hunger, the Government's objective was to achieve food security and sustainability by 2014. A pronounced increase in both the production and productivity of both rice and maize occurred in 2012 compared to 2011. This number, however, remained below the production and productivity levels of 2010.

Regarding the prevalence of hunger (not enough food) and malnutrition (deficiency of appropriate nutrients) in Timor-Leste, the 2009-2010 Demographic Health Survey indicated that 53% of all the children under 5 were stunted and 33% were severely stunted. It also stated that 52% of the children under five were underweight. More recent data is not available. This is likely to be highly correlated with the production, distribution and price of food - all issues that the Government views as high-priority. Other likely contributing factors

---

<sup>8</sup> NDPE Estimation (based on both country case studies and preliminary figures from Timor-Leste Data Collection Survey on Pragmatic Framework Study of Labour Force Plan – JICA).

are poor education regarding the benefits of nutrition, as well as cultural attitudes, such as the overemphasis on staples.

### **Universal Primary Enrolment**

In terms of the goal of universal primary school enrolment, there has been a marked improvement in primary enrolment rates. In 2007, the Timor-Leste Standard of Living Survey estimated a net enrolment rate of 65.6%. In 2009, the Ministry of Education estimated a net primary enrolment rate of 82.7% with a girls-to-boys ratio of 0.92. The 2011 Household Income and Expenditure Survey gave the net enrolment rate to be 84.7%. Additionally, it is noteworthy that, according to the Household Income and Expenditure Survey 2011, the net enrolment rates are higher for female than for male in both primary and (especially) secondary education.

### **Promote Gender Equality and Empower Women**

Furthermore, in terms of gender equality, the percentage of seats occupied by women in Parliament now exceeds the Government's target of 35% (at 38.5%) and currently ranks 16th in the world. In terms of domestic violence, the trends from the PNTL's Vulnerable Unit show a decrease in *reported* domestic violence cases, decreasing from 629 cases in 2010 to 530 in 2012.

### **Reduce Child Mortality**

Timor-Leste has already achieved its goal of reducing the under-five mortality rate by two thirds. According to the DHS 2009-2010, the infant mortality rate decreased to 64 per 1000 live births, below the target of 96 per 1000 live births.

### **Improve Maternal Health**

Maternal health, however, remains a serious issue with the DHS 2009-2010 indicating 557 deaths per 100,000 live births (vs. the goal of 252 deaths per 100,000 live births). More worryingly, the DHS highlighted that roughly 40% of all women aged 15-49 that had died in the seven years preceding the survey died from pregnancy or pregnancy-related complications. Nevertheless the current scenario is a slight improvement compared to the estimates in 2000, which had maternal mortality at 660 deaths per 100,000 live births.

### **Combat HIV/AIDS, Malaria and other diseases**

Malaria is the one of the chief public health concerns as more than 80% of the population is at high risk and a high percentage of the cases concern children.

In terms of HIV/AIDS while the infection rate is still quite low, there has been a substantial increase in the number of HIV reported cases, from 1 case in 2001 to 317 in 2012.

### **Ensure Environmental Sustainability**

With regards to environmental sustainability, according to a WHO–UNICEF JMP study in 2011, 69% of the population had access to an improved drinking source.

Also, according to the JMP update, only 39% of the population has access to an improved sanitation facility.

The 2010 Census suggests that close to 96% of households use wood as source of energy for cooking which might be contributing to the slight loss of forest cover witnessed between 2001 and 2009, from 51% to 50%. This implies that it is unlikely that Timor-Leste will reach the 55% land covered by forest by 2015.

### **Develop a Global Partnership for Development**

In terms of access to new information and communication technology, Timor-Leste has witnessed dramatic improvements with approximately half of the population now enjoying access to a mobile phone. There are also similar improvements in terms of internet access where currently approximately 25% of the population are able to get online.

### **2.3.3: Short to Medium-Term Prospects (2013-2018)**

The rates of economic growth presented in Table 2.3.3.1 reveal the Government's economic growth targets for the medium term.

**Table 2.3.3.1: Economic Targets and Forecasts 2013-2018**

	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>2018</b>
Real Economic Growth, Non-Petroleum Sector (%)	8.0%	8.8%	9.4%	10.0%	10.2%	10.3%
Inflation (rolling year, %)	7.6%	7.7%	7.7%	7.7%	7.7%	6.0%
Domestic Revenues (\$ millions)	146.3	166.1	181.0	196.1	211.2	226.4

Source: National Directorate of Economic Policy, Petroleum Fund Administration Unit and Statistics Directorate

Strong growth is targeted in the next five years, averaging 9.3% per year. The milder rates reported for 2013 and 2014 are a consequence of the Government's intention to increase the effectiveness and efficiency of public spending, to budget expenditures more effectively, and to return to a sustainable fiscal path. The higher growth rates of 2015-2018 reflect the planned scenario where strong policy reforms and effective investments in both human and physical capital by the Government would foster private sector led growth.

### **Focus Box: Household Income and Expenditure Survey 2011**

This focus box will highlight some of the most important aspects of the Household Income and Expenditure Survey 2011 recently made available by the General Directorate of Statistics. This publication sheds some light on important consumption, income and expenditure decisions and patterns in Timor-Leste.

The survey highlights a number of expenditure patterns, some of which seem to stress a non-negligible “cultural” economic cost. This is illustrated by the proportion of expenditures (excluding rent) allocated to festivities and other ceremonies which amounts to an estimated 21.2% in urban areas and 25.9% in rural areas. These numbers indicate a sizeable economic cost which is induced by socio-cultural phenomena and the implicit social rules underpinning them. It is also noteworthy that about 46% of this expenditure is spent on funerals, the timing of which are usually uncertain and unpredictable, leaving the household in a vulnerable position. Moreover, since this expenditure is an average, it is therefore likely that this amount is much higher in the households that have actually suffered a recent bereavement.

Apart from this, the survey also provides an idea of the food basket of the average Timorese citizen, which is by far the largest recurrent expenditure undergone by Timorese households. It shows that the main expenditure categories for the average household are cereals and vegetables and also highlights that, even in rural areas, the main expenditure is on foreign rice, possibly as a result of the high price of local rice. However, surprisingly, Timorese people seem to spend very little on maize, in comparison to rice,

despite large parts of the country being suited to maize production.

In terms of education, the household survey also shows quite a high correlation between income and education. Those with a university education earn, on average, close to twice that of those who have only attended primary school, suggesting that there might be a wage premium arising from education.

Another interesting factor highlighted by the report is that if the head of a household speaks Portuguese or English, they earn substantially more on average than households that do not. This is likely to reflect the high demand for individuals having these language skills relative to the (relatively) scarce supply.

Finally, the survey also indicates a large disparity between urban and rural areas in terms of expenditure on certain items. The value of the durable goods owned by average urban household is more than seven times higher than that held by rural households. This is notable in all the categories used in the study but is particularly salient in terms of “transport”, “information and entertainment” and “appliances for cooking, laundry and sewing” where the value of the durable goods held by the urban household is at least six times higher than the value of that held by the rural household.

The Government has actively attempted to reduce the urban-rural disparities as well as the development of rural areas through programs including, but not limited to, the PNDS, the PDID, the rice subsidy program and the PDD which aim to support the targets of sustainable and inclusive growth.

## 2.4: Expenditure and Development Partners' Commitments

### 2.4.1 Expenditures by Fund

Table 2.4.1.1 shows expenditure by fund; The CFTL, Infrastructure Fund and HCDF will account for 72.8%, 24.6% and 2.7% of total Government expenditure in 2014, respectively. Overall expenditure is set to fall, driven primarily by reductions in the Infrastructure Fund. This corresponds to the selection of the best projects and their spacing out across years, in order to make sure projects are carried out at the highest standard and responding to low execution capacity in past years. This will thus promote high quality execution at a reasonable cost. By means of these adjustments, the Government pursues policies which will lead to high quality economic growth that is inclusive, balanced and sustainable. The downward trend in development partner commitments is set to continue.

**Table 2.4.1.1: Expenditure by Fund, \$ millions**

	2012 Actual	2013 BB1	2014 Budget	2015	2016	2017	2018
<b>Combined Sources Budget</b>	<b>1,451.2</b>	<b>1,892.3</b>	<b>1,684.9</b>	<b>1,969.1</b>	<b>2,060.7</b>	<b>1,715.8</b>	<b>1,576.8</b>
<b>Government Expenditures by Fund</b>	<b>1,197.6</b>	<b>1,647.5</b>	<b>1,500.0</b>	<b>1,893.5</b>	<b>2,009.9</b>	<b>1,714.2</b>	<b>1,575.2</b>

### 2.4.2 CFTL Expenditures

The CFTL provides the funding for the running of the Government of Timor-Leste. All line ministries' budgets are included in this fund, in five different appropriation categories divided between recurrent and capital expenditure. This is laid out in Table 2.4.2.1. Although overall CFTL expenditure has increased from 2013 to 2014 (by 9.1%), the individual categories are more variable, with recurrent expenditure increasing by 19.3% and capital expenditure decreasing by 31.3%. Individual appropriation categories will be discussed in the following sections.

The Government recognizes that increased CFTL expenditure, especially the recurrent part, could be seen as irreversible increases to the size of the civil service and Government, contrary to the policy of fiscal sustainability. However the Government considers that a significant amount of this expenditure can be classified as investment, with either social and physical characteristics. This investment is in line with the goal of high, balanced, inclusive and sustainable growth; as it will contribute to increased productivity and help those sectors

of the population which are more marginalized. This is discussed in detail in the following sections.

**Table 2.4.2.1: CFTL Expenditure by Appropriation Category, \$ millions**

	2012 Actual	2013 BB1	2014 Budget	2015	2016	2017	2018
<b>Total CFTL Expenditure</b>	<b>789.3</b>	<b>1,000.7</b>	<b>1,091.4</b>	<b>1,135.1</b>	<b>1,180.5</b>	<b>1,227.7</b>	<b>1,276.8</b>
<b>Recurrent</b>	<b>659.0</b>	<b>798.6</b>	<b>952.5</b>	<b>990.6</b>	<b>1,030.3</b>	<b>1,071.5</b>	<b>1,114.3</b>
Salary and Wages	130.9	160.5	176.8	183.8	191.2	198.8	206.8
Goods and Services	309.7	399.1	440.3	457.9	476.2	495.3	515.1

Capital and Development	88.3	152.5	86.8	90.3	93.9	97.6	101.5

Source: National Directorate of the Budget

#### 2.4.2.1: Salaries and Wages

Salaries and Wages are set to grow modestly to \$176.8 million in 2014, an increase of 10.1% compared to the 2013 Budget. This is in line with the Government's policy of developing a dynamic, effective and efficient civil service, without letting the Salaries and Wages bill become unsustainable. The main measures are outlined below.

- \$9.5 million to the Ministry of Education to pay salaries to 4,220 voluntary teachers throughout the entire country. A well compensated workforce in the education sector will help to encourage and motivate teachers to create an educated population who can help Timor-Leste grow and develop in future generations.
- \$4.7 million to the Ministry of Health for the special career regime for medical professionals. As in the education sector, the Government considers it is important to motivate staff in this crucial sector in order to rapidly develop healthcare standards in the country.
- \$1.0 million to the Ministry of Foreign Affairs to staff new embassies in Laos, Cambodia, Brunei and Myanmar. The Government considers that the establishment of these embassies is essential to increase Timor-Leste's reputation and influence in the region, especially at a time where it is considering joining ASEAN.

#### 2.4.2.2: Goods and Services

Goods and Services expenditure is set to increase to \$440.3 million in 2014, a 10.3% increase on 2013's total of \$399.1 million. It remains by far the largest category in CFTL. The main measures and investment details are laid out below.

##### **Policy Measures**

- \$100.8 million to the Ministry of Public Works and EDTL for the power plants in Hera and Betano, which was recently opened. This expenditure will be on operational and maintenance costs, as well as to provide fuel for the generators. The Government prioritizes consistent electrical power as a key component in the development of the country, in terms of raising the standard of living of citizens and attracting foreign investment.
- \$25.8 million to the Ministry of Education for the school-feeding program. This is a reflection of the fact that malnutrition is a serious problem in Timor-Leste, especially for younger citizens. As such, the amount spent on this program is increasing from \$0.15 to \$0.25 per student per day.
- \$19.0 million for the Contingency Fund, which is used by the Government if urgent expenditures occur during the year.
- \$13.0 million to the Ministry of Health in order to purchase essential medicine and drugs. The Government sees this as essential expenditure in order to improve healthcare and improve conditions for its sick and disabled citizens.
- \$11.0 million to the Ministry of Justice for land compensation and the 'Ita nia Rai' ('Our Land') program.
- \$10.0 million for the General Government towards legal services.
- \$8.5 million to the Ministry of Commerce, Industry and Environment in order to import rice and buy local produce from domestic sources. This expenditure contributes to the food security of Timor-Leste, as well as providing an essential link between local farmers and sellers. This will encourage agricultural development and the growth of a domestic private sector.
- \$5.0 million for the Counterpart Fund. This expenditure will help make work with the Government and Donors smoother and more effective.
- \$3.9 million to fund a high level summit for the working group and for Ministerial Programs for the CPLP (Comunidade dos Países de Língua Portuguesa/Community of Portuguese Language Countries). This is a prestigious honour for Timor-Leste and will give it the opportunity to promote itself on the international stage.

- \$3.5 million in the Ministry of Justice for the Prison Farm Working Scheme. This scheme will allow prisoners to support their families and gain useful skills which will assist their social reintegration.
- \$3.5 million to the Ministry of Agriculture in order to purchase seeds. This is essential for the development of the agricultural sector, to provide nutrition and for food security.
- \$3.0 million to the Ministry of Agriculture for the 'Suku Ida Produto Ida' ('One Village-One Product) program. This seeks to encourage villages to specialise in the production of a particular good, which the Government will then purchase.
- \$3.0 million to the Ministry of Health in order to provide food for patients in hospitals. This is important in terms of providing adequate nutrition to sick citizens as well as improving standards of care in hospitals.
- \$2.5 million towards Timor-Leste's membership of institutions and international organizations. This expenditure will help Timor-Leste promote itself internationally and to continue working closely with international organizations to promote economic development.
- \$1.8 million to the Prime Minister's Office for operational costs of the SNI. Through these expenses the Government is reacting to face growing threats relating to terrorism, sabotage, organized crime and espionage.
- \$1.0 million in order to conduct statistical surveys as part of a pilot scheme for the 2015 census.
- \$1.0 million in the Ministry of State Administration for the celebration of National Independence and Heroes in Aileu. The Government wishes to commemorate this important day in Timor-Leste's history and honour those who fought for independence.
- \$1.0 million in the Ministry of Justice for Biometric Passports. This expenditure will ensure Timor-Leste passports meet international standards and will make it easier for our citizens to travel abroad.

### **Investments**

The Government considers that it is important to provide context to the large figures being presented in the CFTL, and considers that a significant amount can be classified as investment, rather than increases in the size of the civil service or Government sector. In terms of Goods and Services, \$179.6 million, or 40.8% of total Goods and Services spending can be classified as either human capital investment, social investment or physical investment. Broadly speaking, the former refers to programs designed to improve the

quality of education both directly and indirectly; the second item refers to projects which directly improve citizens' standards of living and the latter refers to essential investment in tangible objects which are essential for the smooth running of the country on large and small scales.

#### *Human Capital Investments*

\$761,000 (or 0.2% of total Goods and Services expenditure) can be considered human capital investments. As a cornerstone of this years' budget, investing in human capital will provide a better prepared and productive population, which will contribute to future better and higher economic growth. Human capital investments under Goods and Services are composed solely of direct scholarships by UNTL.

#### *Social Investments*

\$66.5 million (or 15.1% of total Goods and Services expenditure) can be considered social investments. This comprises of the school feeding program, purchase of medicine, purchase of rice and local produce and food for hospital patients, all discussed in the previous sections. There is also \$750,000 towards control of crocodiles, \$500,000 to the Ministry of Health to fight against cancer and \$520,000 to the Ministry of Agriculture towards research at Charles Darwin University and projects for Karau milk.

#### *Physical Investments*

A further \$112.4 million (or 25.5% of total) can be classified as physical investment. This is mostly comprised of the large payments to the power plants, but also includes the seeds and 'Suku Ida Produ Ida' programs in the Ministry of Agriculture, as discussed above. There are also additional payments for the Government membership fees and the Counterpart Fund (\$7.5 million) and \$91,000 to SEAPRI to support the bamboo centre.

#### 2.4.2.3: Public Transfers

The Public Transfers budget is increasing to \$335.5 million in 2014 from \$239.0 million in 2013, or by 40.4%; the largest increase in any CFTL appropriation category. This is driven primarily by various projects including payment to social programs, rehabilitation of schools, development of the Special Zone for Social Market Economy in Oecussi and recapitalization of the Central Bank of Timor-Leste.

#### **Policy Measures**

- \$136.8 million to the Ministry of Social Solidarity for payments to veterans, the elderly, the 'Bolsa de Mae' program for single mothers and for natural disasters. The Government believes it is important to reward those citizens who have served Timor-Leste in the past, and to provide support for those who may need it today.
- \$25.0 million to rehabilitate all schools in all 13 districts. This includes new furniture, water and sanitation facilities and electricity.

- \$20.5 million towards the Special Zone for Social Market Economy. This will contribute to efforts for economic diversification and national market development. Moreover it will promote inclusiveness and help reduce poverty, by providing market development for those sectors of the population who are most marginalized.
- \$20.0 million towards the recapitalization of Timor-Leste's Central Bank. This will contribute to a facilitating credit and private sector development.
- \$15.4 million to the Office of the Prime Ministers to support the various NGOs carrying out essential work in Timor-Leste.
- \$13.6 million to the Ministry of State Administration to fund the PNDS village assistance program. Providing local assistance is part of the Government's policy of encouraging sustainable growth and development.
- \$10.0 million to provide loans for local private sector businesses. The Government sees this as part of its development strategy in order to foster high-quality, sustainable growth into the future.
- \$10.0 million to SEFOPE for the rural roads program. This is an initiative to improve transport links between villages constructed by local labor.
- \$7.5 million for the Timor-Leste Development Cooperation agency to support demobilization and modernization of the army in Guinea Bissau. The Government is committed to assisting other countries achieve peace and stability. We know from our own history that developing an effective, disciplined and efficient army is key to reducing instability. This expenditure will assist Guinea Bissau develop effective armed forces.
- \$7.2 million to the Ministry of State Administration to subsidize the Council for the administration of Sucos. Helping promote accountability and administration will help Sucos have a more unified and stronger voice to determine what they need to promote development across the whole country.
- \$6.0 million towards supporting ANP, Timor Gap and Petroleum and Geology Institute (IPG). Contributing towards the development of the private sector is part of the Government's strategy for better future growth.
- \$5.9 million in order to fund the pensions of former Prime Ministers, Presidents of the Republic and Presidents of Parliament, Government Ministers and Members of Parliament.
- \$5.0 million in donations to other countries for humanitarian and development reasons and disaster relief.

- \$5.0 million to assist other G7+ members. The Government, as head of the secretariat, is committed to supporting the economic and social development of other G7+ members. This expenditure will also strengthen the G7+ as a global actor; allowing Timor-Leste to increase its influence on world affairs.
- \$4.7 million to the Secretary of State for Youth and Sport for community sports activities. The Government recognizes the importance of sporting events on a local level in order to foster community spirit and to provide activities for the youth, as well as on a country-wise level to create a sense of national pride and unity .
- \$4.5 million to the Ministry of Health to support health treatments abroad. This expense is necessary to improve medical care despite constraints on treatment options in Timor-Leste.
- \$3.7 million to the Ministry of Health in order to subsidise the various health clinics throughout Timor-Leste as well as to send ill citizens abroad for treatment. This reinforces the Government's commitment to improved healthcare.
- \$3.6 million to MCIA to fund cooperative groups and support the development of small industries.
- \$3.1 million to the Ministry of Education in order to support private universities. This investment will improve the quality of education and contribute to a better prepared workforce in the future.
- \$2.2 to UNTL towards scholarships for students in universities abroad. This is a necessary expense to ensure the youth in Timor-Leste achieve the highest education standard possible, which will translate into greater future productivity amongst workers.
- \$2.0 million to SEPFOPE towards development of Tejolu industry. Promoting local industries and market is essential to build new markets and diversification of the economy.
- \$1.8 million to the Ministry of Tourism towards national and international events. These events include the Tour de Timor and other renowned events, which will promote the positive image of Timor-Leste internationally. They will also enhance a feeling of union by the promotion of citizen participation.
- \$1.5 million to purchase solar panels for communities that do not have access to the national electricity grid.
- \$1.0 million in the Secretary of State of Gender Equality for the empowerment of women. The Government is strongly committed to ensuring there is equality in society and empowering women so they can take an active part in the development.

- \$1.0 million for the Timor-Leste Football Federation. The Government is committed to the development of football in Timor-Leste for two main reasons. First, national sports teams contribute to an overall sense of nationhood and national pride and therefore indirectly contribute to peace and stability. Second, sports facilities/activities provide alternative activities for underemployed youth which reduces the likelihood of them becoming involved in antisocial or aggressive activities.

### **Investments**

The Government considers the majority of spending (\$308.9 million, or 92.1% of total) in the Public Transfers appropriation category to be investment with either human capital, social or physical characteristics. This follows from the fact that a lot of the expenditure in this category strives to improve the standard of living of many of the most disadvantaged citizens in Timor-Leste.

#### *Human Capital Investments*

\$31.8 million (9.5% of total Public Transfers) can be classified as Human Capital Investments. These investments include subsidies to universities, scholarships to study abroad and rehabilitation and acquisition of furniture for schools.

#### *Social Investment*

\$197.1 million (58.7% of total) from this category can be classified as social investment, with most of that total coming from the large amount allocated to payments to veterans, the elderly, single mothers and disaster relief. The rest comprises of support to NGOs, subsidies to health clinics, sporting activities, national and international events and foreign support (including to Guinea-Bissau and G7+) which have all already been discussed.

#### *Physical Investments*

A further \$80.1 million (23.9% of total) is considered to be expenditure on physical infrastructure. This incorporates PND, support for the rural roads and local factory programs, loans to the private sector, recapitalization of the Central Bank of Timor-Leste and support to the cooperatives and small industries.

#### **2.4.2.4: Minor Capital**

In 2014, Minor Capital is set to increase to \$52.1 million from \$49.6 million in 2013, or by 5.1%. This is in line with the Government's aim to control expenditure in this category.

### **Policy Measures**

- \$6.8 million to purchase CCTV system for the Betano and Hera power plants.

- \$5.0 million to MTC to purchase a new ferry for Timor-Leste in order to supplement the service currently provided by the 'Berlin-Nakroma', as well as to provide operational and maintenance costs for both ferries.
- \$2.8 million to the Secretary of State for the Council of Ministers to fund national printing.
- \$1.5 million for the Ministry of Education to invest in furniture for schools. Investments in education require both better quality but also more and better material to learn.
- \$1.2 million to the Ministry of Health to purchase important medical equipment. This once again reinforces the Government's determination to rapidly improve healthcare in Timor-Leste.
- \$1.0 million to buy vehicles for the UPF, PNTL and cars for the sub-districts and 'sukus'. This is a necessary investment which will improve the quality and quantity of assets available for these institutions to carry out their functions correctly.
- \$1.0 million for emergency cars for the airport. This expenditure will contribute to improving the increasing activity level at the airport.

### **Investments**

Obviously all of the Minor Capital expenditure is on physical goods. Investments total \$17.5 million for 2014, which is 33.6% of total budgeted Minor Capital for the year. However some of these investments can be broken down into human capital and social investments.

#### *Human Capital Investments*

\$1.5 million (2.9% of total Minor Capital expenditure) can be considered human capital investment. This corresponds to acquisition of furniture for schools by the Ministry of Education.

#### *Social Investments*

\$16.0 million of Minor Capital expenditure (30.7%) has social characteristics. The new ferry and CCTV cameras for the electrical power plans of Hera and Betano make up the majority of this expenditure, as discussed. There is also \$735,000 allocated to the Ministry of Health for 13 new ambulances, \$350,000 to the Secretary of State of Security for new fire trucks and \$160,000 to the Ministry of Social Solidarity for funeral cars.

### **2.4.2.5: Capital and Development**

The next table shows CFTL Capital and Development expenditures, which have shrunk by 43.1% from 2013 to 2014. The majority of expenditure is on district development programs. These programs build on the success of previous district development projects by continuing to finance the development of small scale infrastructure according to the needs

of local communities. Roads, education facilities, health facilities, water supply and sanitation and irrigation systems will be constructed under these programs. Projects in these programs are tendered to Timorese owned construction companies; boosting local development and keeping profits within Timor-Leste. These programs also provide employment opportunities to many Timorese workers and are contributing to development, economic growth and poverty reduction in all districts throughout Timor-Leste.

### **Policy Measures**

- \$1.3 million to the Ministry of Social Solidarity. \$0.8 million towards the 12th November Memorial and \$0.5 million the Heroes Garden. The Government wishes to promote the memory and honour of those who died in the Massacre of the 12th November. This Memorial will also contribute to the historical record of the events that took place in Timor-Leste as well as help promote a strong feeling of national pride.

**Table 2.4.2.5.1: PDID and Other Capital and Development Expenditures, \$ millions**

	2012 Actual	2013 BB1	2014 Budget	2015	2016	2017	2018
<b>Total Capital and Development</b>	<b>88.3</b>	<b>152.5</b>	<b>86.8</b>	<b>90.3</b>	<b>93.9</b>	<b>97.6</b>	<b>101.5</b>
District Development Programs	45.2	87.0	39.4	40.9	42.6	44.3	46.0
Ministries / Agencies	43.1	65.5	47.4	49.3	51.3	53.4	55.5

*Note: For 2011 and 2012, this value includes PDD1 and PDD2. From 2012 PDD1 and PDD2 are mostly budgeted under PDID.*

Source: National Directorate of Budget

The Government is committed to a fair and transparent distribution of District Development Programs throughout Timor-Leste. In this regard, meetings are organized with Suco chiefs, citizens and community leaders to identify the demand for different projects. These projects are then collated and reviewed by the Ministry of State Administration to ensure that spending on these programs is in line with set budget ceilings and with the fair distribution of programs between districts. The Ministry of State Administration also determines the distribution of the District Development Programs' budget between different districts using a formula that partly depends on population per district. The Budget Review Committee makes the final decision regarding the inclusion of projects in the State Budget proposed to Parliament. The Government is committed to transparently and clearly showing expenditure in different districts. Budget Book 3 shows total spending and spending per capita for PDID and ongoing PDD1 and PDD2 projects in each district.

Ministries and Agencies' CFTL capital and development expenditure continue to be relatively small. This matches with the Government's policy of mainly constructing new infrastructure through large multi-year projects which are included in the Infrastructure Fund.

### 2.4.3: Infrastructure Fund

Infrastructure is extremely important for Timor-Leste's development. Roads, reliable electricity supply and telecommunications systems are necessary to develop and support a modern, productive economy. Timor-Leste's current infrastructure is inadequate and may be constraining private sector growth. The Government is committed to improving this situation by building the core infrastructure necessary for high levels of economic growth. In order to construct these facilities, the Government established the Infrastructure Fund in 2011. The Major Projects Secretariat (MPS), the National Procurement Commission (NPC) and National Development Agency (ADN) were also established to evaluate, procure and monitor projects in the Fund.

Table 2.4.3.1 shows the distribution of the Infrastructure Fund budget by program. Column A shows the 2013 original budget. Column B shows the original 2013 budget after including the 2012 rollover. The rollover from 2013 to 2014 is shown in column C and additional appropriations regarding continuing and new projects are shown in column D. The 2014 final budget for each program is shown in column E and is equal to the rollover from 2013 to 2014 (column C) plus the additional appropriations (column D). Table 2.4.3.2 shows forecasts for outgoing years.

**Table 2.4.3.1: Calculation of Infrastructure Fund Expenditure by Program in 2014, \$ millions**

	A	B	C	D	E

Source: National Directorate of Budget and Major Projects Secretariat

Every effort has been made to forecast end of year expenditure accurately. The Ministry of Finance forecasted end of year expenditure separately for each project based on a detailed review of its stage in the procurement cycle and if applicable a review of relevant contracts and an evaluation of when payments to contractors were likely to fall due. Programs may, however, under- or overspend due to factors which are impossible to forecast and which are outside of the Government's control. The Government may, for example, predict that a section of a road will be completed in November; with payment to a contractor falling due in December. Higher than normal rains in October and November may delay construction

and mean the contractor is no longer entitled to payment in December. This in turn would result in the forecast being higher than actual expenditure.

The rolling over of the Infrastructure Fund's unspent balance is in accordance with international best practice and the Government's policies. For many large Infrastructure Fund projects multi-year contracts are signed between the Government and private sector contractors. These contracts normally specify multiple payments; with each payment depending on a component of the construction/project being finished. Delays in construction due to weather conditions or other events beyond the Government's control can cause payments to be delayed. This can result in the budget for one year not being fully utilised because it initially covered payments which have now been delayed to the next financial year. The Government, by rolling over the Infrastructure Fund's budget for each project, is ensuring that money to pay contractors on multi-year projects is effectively ring-fenced. This simplifies budgeting because projects' budgets do not have to be recalculated each year. It can also increase execution because the budget after rollover should be large enough to cover payments which may become due. By securing budgets over many years, this system also provides a degree of security to contractors and reduces their perceptions of the risk of non-payment. Companies are often prepared to accept lower profit margins on projects where they consider that the risk of not being paid for work is low. In the long term rolling over the Infrastructure Fund's budget may then contribute to lower procurement costs and more efficient expenditure.

Table 2.4.3.1 also shows the distribution of Infrastructure Fund expenditure across different programs. The largest three programs (excluding loans) in terms of budgeted expenditure are Electricity, Roads and the Tasi Mane project which account for 15.3%, 13.5% and 12.6% of total expenditure respectively. This distribution of expenditure is in line with the Government's policies as stated in the SDP and program of Government which strongly emphasize the importance of these sectors to the development of Timor-Leste.

Finally, Tables 2.4.3.1 and Table 2.4.3.2 present \$6.8 million for infrastructure development in Oecussi. The Government believes that the Special Economic Zone should lead to an increase in exports and industrial production. It should also promote economic development in one of the most marginalised district in Timor-Leste, as well as creating significant employment opportunities for the local population.

**Table 2.4.3.2: Infrastructure Fund Expenditures by Program 2013-2018, \$ millions**

	Budget 2014	Budget 2015	Budget 2016	Budget 2017	Budget 2018
<b>Total (including loans)</b>	<b>368.6</b>	<b>713.4</b>	<b>784.4</b>	<b>437.5</b>	<b>249.4</b>
<b>Total (excluding loans)</b>	<b>337.5</b>	<b>596.1</b>	<b>625.9</b>	<b>270.0</b>	<b>212.4</b>

#### 2.4.4: Human Capital Development Fund

Table 2.4.4.1 shows the Human Capital Development Fund for 2014. This number is obtained by adding a small rollover from 2013 with forecasted actual and new appropriations. Although the total amount in this fund is similar to last year, with a relatively small \$3.1 million reduction, the relative amounts given to the various programs have changed considerably. Although scholarships remain dominant, with over half the total budget, the amount allocated to vocational training has more than doubled, while the

amount given to 'Other Training' has declined significantly. This allocation is in line with the Government's goals of rapidly increasing human capital in Timor-Leste.

The Government considers the entire Human Capital Development fund to be social investment. Moreover greater expenditure on human capital now is in line with the Government's policy of frontloading, as present investment in education and training will increase productivity in the future and result in higher future growth.

**Table 2.4.4.1: Human Capital Development Fund by Program, \$ millions**

	2013 Budget	2013 F'casted Actual	Rollover 2013 to 2014	2014 Addition al Appropri ations	Final 2014 Budget	2015	2016	2017	2018
<b>Total HCDF (by Program)</b>	<b>42.4</b>	<b>39.4</b>	<b>3.1</b>	<b>36.9</b>	<b>40.0</b>	<b>45.0</b>	<b>45.0</b>	<b>49.0</b>	<b>49.0</b>

## 2.4.5: Development Partners

Development partners are set to contribute \$184.9 million in 2014, continuing the recent downward trend in this category. The details of these commitments are set out in Budget Book 5. It should be noted that this figure does not include loans.

**Figure 2.4.5.1: Development Partners' Indicative Commitment 2010-2018, \$ millions**

Source: Development Partnership Management Unit

## 2.5: Revenues

### 2.5.1: Overview of Revenue Projections

Table 2.5.1.1 shows projections for total revenue, which is the sum of domestic revenues and petroleum revenues, up to 2018. Projected total revenue in 2014 is significantly less than 2013 (and indeed significantly less than the projection made for 2014 in that year). This decline is due primarily to the reduction in petroleum revenues for various reasons which are outlined in section 2.5.3. This overall decline is despite the fact that domestic revenues are projected to continue their upward trajectory, although their contribution to total revenue is still set to be dwarfed by petroleum for some time to come.

**Table 2.5.1.1: Total Revenue 2012 – 2018, \$ millions**

	2012 Actual	2013 BB1	2014 Proj.	2015	2016	2017	2018
<b>Total Revenues</b>	<b>3,696.8</b>	<b>2,839.6</b>	<b>1,609.2</b>	<b>1,876.9</b>	<b>1,936.8</b>	<b>1,627.8</b>	<b>1,324.2</b>
Domestic Revenues	137.7	146.3	166.1	181.0	196.1	211.2	226.4
Petroleum Revenues	3,559.1	2,693.3	1,443.1	1,695.9	1,740.7	1,416.6	1,097.8

Autonomous Agencies	19.4	22.8	4.8	5.0	5.4	5.9	6.3

Source: National Directorate of Economic Policy

Domestic revenues make up the largest source of funding for the Government after petroleum. Primarily composed of taxes, fees and charges and autonomous agencies, there has been robust growth in most major categories in recent years. Total domestic revenue set to continue in 2014, as shown in Table 2.5.2.1.1, which is projected to be 13.6% higher than the figure given for 2013 in last year's Budget Book 1. The Government is aware of the importance of increased domestic revenue in order to finance future expenditure as petroleum revenues decline and efforts continue to eliminate excess withdrawals from the petroleum fund.

### 2.5.2.2: Taxes

Taxes are the mainstay of any country's domestic revenues, and Timor-Leste is no exception, with total taxes comprising 71.6% of total domestic revenue in 2012, a share that is projected to grow gradually over coming years. Table 2.5.2.2.1 lays out tax projections.

**Table 2.5.2.2.1: Total Tax Revenue 2012 – 2018, \$ millions**

	2012 Actual	2013 BB1	2014 Projection	2015	2016	2017	2018

Source: National Directorate of Economic Policy

Tax revenue as a percentage of (non-petroleum) GDP is quite low, at 7.1% in 2012. This is typical of a country at Timor-Leste's stage of development (and indeed of many petroleum-producing countries). However, given Timor-Leste's ambitious short and medium-term plans for infrastructure and other development initiatives, such as joining ASEAN, the Government is focused on faster growth and reform in the areas of tax revenue and collection.

In terms of projections, every effort has been made to use all available data and past trends in order to create the most realistic picture of revenues going forward. But with major shifts in Government expenditures, new tax reforms and updating of tax accounting methods happening on a regular basis in Timor-Leste, the figures presented should be approached with caution. This is particularly true in outer years, which are often an extrapolation of recent trends applied to the 2014 forecast.

In 2014, taxes are projected to increase to \$120.0 million, a 13.5% increase on the 2013 figure. This is driven largely by increases in indirect taxes, particularly excise and import taxes, as well as corporate income tax.

Indirect taxes are increasing due to increased levels of imports, reflecting Timor-Leste's dependence on goods and services from abroad. The increases in the levels of these taxes do not necessarily reflect increasing purchasing power on the part of the average citizen, but more likely the increase in imported material for large infrastructure projects already under development and also improved efforts by customs officials to increase compliance

with these taxes. Large infrastructure projects are also likely to explain the increases in corporate tax.

The decline in withholding tax is due to the fact that the execution of the Infrastructure Fund and the Budget have been lower than expected.

The overall level of income tax is set to continue its steady increase, though due to strengthening of application of the laws, the ratio between the 'Individual Income' and 'Individual income Other' categories has changed.

The slight decline projected in service taxes in 2014 is due to low projections for actual collections in 2013. Although it is projected to gradually recover, it emphasizes the fragile state of the private sector in Timor-Leste, as discussed in previous sections and also possibly the withdrawal of the UN at the end of 2012.

#### 2.5.2.3: Fees and Charges

Fees and charges refer to a wide selection of categories which contribute to domestic revenue from non-tax sources. These include administrative fees, utility payments and endowments to the Government from natural resources other than petroleum, as shown in Table 2.5.2.3.1. Most of the categories provide a negligible amount, perhaps a few thousand dollars, which is why the projections are rounded down to zero in some cases. However the list, which is updated with new categories regularly, reflects the work being done by various line ministries in terms of increasing administrative efficiency. Increased efficiency in the collection of these fees also ensures that citizens of Timor-Leste are compliant with various charges for Government services and make a contribution to domestic revenues.

Where possible, information was collected from the various line ministries responsible for each category and used to make projections. It should be emphasized that many of these categories are very small and highly variable and that the overall focus should be on the trend: slow but steady growth.

**Table 2.5.2.3.1: Fees and Charges Projections 2012 – 2018, \$ millions**

	2012 Actual	2013 BB1	2014 Proj.	2015	2016	2017	2018

#### 2.5.2.4: Other Revenue Streams

There are a few other categories of particular interest in terms of their contribution to domestic revenues. The major category here is revenue from electricity, which is now being collected the Ministry of Public Works, having formerly been under the autonomous agency EDTL. Using their internal projections shows steady growth in coming years due to the

second major power plant in Betano recently coming online and increasing numbers of meters ensuring more of their growing customer base is paying for their power.

Rice sales vary from year to year based on Government policy and the size of various subsidized food programs. The sale of local produce and products is based on the Government purchasing and subsequently selling on goods from small farmers to markets. Obviously this category will vary in response to the number of participants in the program and other factors such as climate.

Social Games Receipts are based on games of chance, which are forecast to increase in coming years due to the introduction of a new lottery. Finally, the total interest income is forecast to increase modestly, though is subject to changing international financial conditions.

#### 2.5.2.5: Autonomous Agencies

The Autonomous Agencies have independent budgets from their line ministries and are partially funded by their own revenues, as laid out in Table 2.5.2.5.1.

**Table 2.5.2.5.1: Autonomous Agencies' Revenues 2012 – 2018, \$ millions**

	2012 Actual	2013 BB1	2014 Projection	2015	2016	2017	2018
<b>Total Autonomous Agencies</b>	<b>19.4</b>	<b>22.8</b>	<b>4.8</b>	<b>5.0</b>	<b>5.4</b>	<b>5.9</b>	<b>6.3</b>
Equipment Management	0.1	0.0	0.3	0.3	0.4	0.4	0.5
Aviation	1.5	1.4	1.4	1.5	1.6	1.7	1.8
Port	2.7	3.3	3.1	3.2	3.5	3.7	4.0
EDTL	14.9	17.9	0.0	0.0	0.0	0.0	0.0
SAMES	0.2	0.3	0.0	0.0	0.0	0.0	0.0

Source: National Directorate of Economic Policy

A new port is set to open in Oecussi which should lead to increased growth in port revenues in outer years. An increase in airport charges should lead to a recovery in revenue growth in this category, especially if increasing rates of passenger numbers can be maintained. Equipment Management continues a slow yet steady growth in its contribution as in recent years. After a restructuring in its functions, future revenues from SAMES are expected to be negligible in outer years. As discussed in the previous section, from 2014 EDTL is no longer an autonomous agency.

#### 2.5.3: Petroleum Revenues and Investments

Petroleum revenues currently finance most of the state budget. The Petroleum Fund contributes to the wise management of petroleum resources for the benefit of both current and future generations.

### 2.5.3.1 Inflows of Petroleum Revenues

#### **Overview**

The factors driving the inflow of petroleum revenues are prices, production and costs. Compared with the 2013 General State Budget, the new oil price forecast is somewhat lower throughout the forecasting period. Costs are slightly higher, while there is a significant drop in production. Petroleum revenues from Bayu-Undan and Kitan are likely to have peaked at \$3,559.1 million in 2012 and are now forecasted to decline, slowly at first in 2013, then more significantly to \$1,443.1 million in 2014 (see Tables 2.5.3.1.1 and 2.5.3.1.2).

**Table 2.5.3.1.1: Estimated Petroleum Revenues 2012 – 2018, \$ millions**

	2012 Actual*	2013 Estimate **	2014 Budget	2015	2016	2017	2018

\*\*\*BU: Bayu Undan

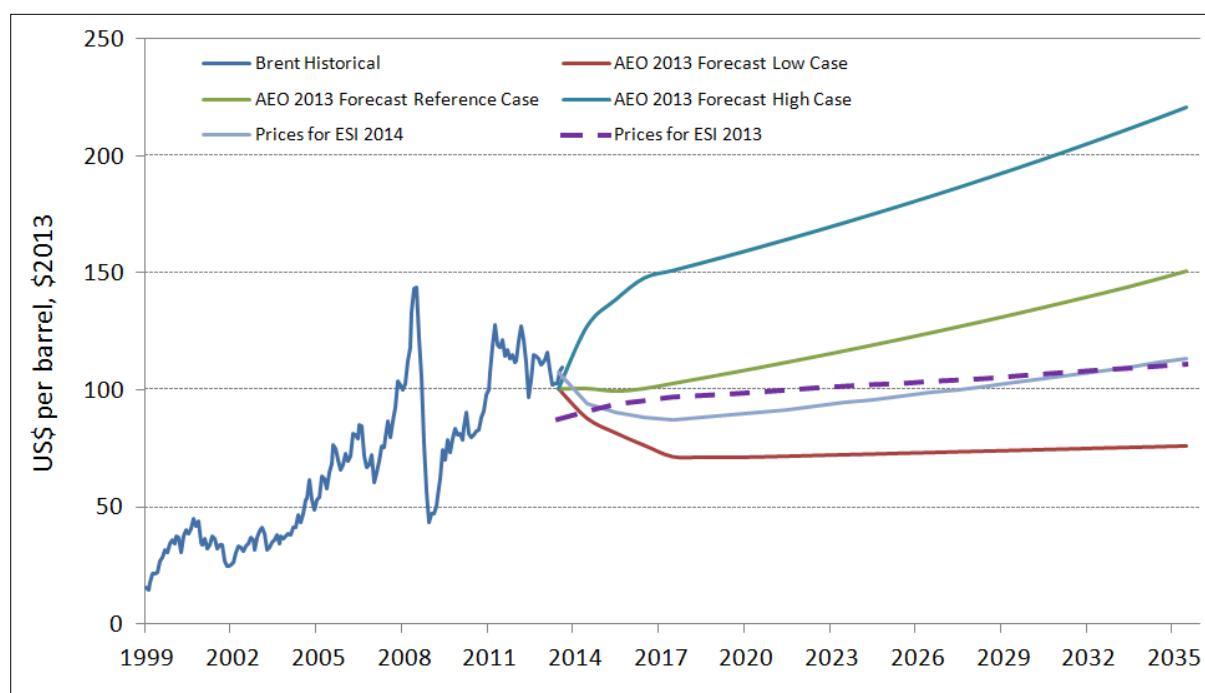

#### **Petroleum Prices**

In recent years the Brent benchmark has proved a better indicator of the price on Bayu Undan and Kitan liquid products (condensate and LPG) than the WTI benchmark used in previous years. For 2014, the benchmark oil price used in the petroleum wealth calculations has therefore been changed to Brent.<sup>9</sup> Section 2.5.3.2 on the Petroleum Wealth and ESI Calculation discusses this change further.

<sup>9</sup> The future prices on Bayu-Undan and Kitan liquids products (condensate and LPG) are estimated based on historical relationships with a benchmark price and the benchmark's forecast. Liquefied Natural Gas (LNG)

The Petroleum revenue forecasts in the 2014 General State Budget are based on a benchmark oil price (Brent) of \$107.5 per barrel in 2013, compared with (WTI) \$86.6 per barrel in the 2013 Budget. However, in the years after 2014, the current oil price forecast is somewhat lower than previously forecasted (see Figure 2.5.3.1.1).

**Figure 2.5.3.1.1: Historical Changes and Future Projections in the WTI Oil Price, \$ per barrel**

Source: Petroleum Fund Administration Unit, data from Energy Information Administration (EIA)

### **Oil Production**

The production forecast of liquids (condensate and LPG) for Bayu-Undan has been significantly revised down compared with the 2013 Budget. Total petroleum production from Bayu-Undan (also including LNG) is estimated to have peaked in 2011 at 59 million barrels of oil equivalents and is now set to decline before ceasing in 2020. This is four years earlier than its projected end in 2013 (see Figure 2.5.3.1.2). According to the information provided by the BU Operator in June 2013, the worsening of the production outlook is caused by higher than previously expected lean gas breakthrough, pressure depletion and water production.

Figure 2.5.3.1.2 shows Bayu-Undan's liquids production and gas production forecast for 2014 compared with 2013. The liquids production (charts a and b) is forecasted to be about 13% lower in the 2014 Budget than in 2013. While the 2014 forecast of gas production

---

prices are forecasted using the provisional price formula negotiated between sellers and buyers. The price formula is renegotiated every three years.

(charts C and D) projects a significant decline, of approximately 23%, relative to last year's forecast.

**Figure 2.5.3.1.2 BU Productions Forecasts for 2014 Budget**

The Field Development Plan for the Kitan field was approved in 2010 and production commenced in the final quarter of 2011. The total production is modest compared to the Bayu-Undan field. The 2014 Budget forecasts Kitan's Low Case to be 56.1 million barrels of oil over the life time of the project until 2016. The total revenue stream based on the Low Production Case is estimated at \$1,118.8 million, or some 5% of Bayu Undan.

**Table 2.5.3.1.2: Sustainable Income Calculations – Oil Price Assumptions, Production and Revenue Forecasts 2002-2025**

2023	111.1	0.0	0.0	0.0
2024	114.8	0.0	0.0	0.0
2025	118.7	0.0	0.0	0.0

Source: Petroleum Fund Administration Unit

### **Costs**

The estimated costs for the Bayu-Undan and Kitan projects are forecasted slightly higher in the 2014 Budget than in 2013. The change in the cost projections between the two years is primarily from the capital expenditures related to corrosion, new drilling programs and other operational issues.

### 2.5.3.2 Petroleum Wealth and ESI Calculation

According to the Petroleum Fund Law, the Estimated Sustainable Income (ESI) is the maximum amount that can be appropriated from the Petroleum Fund in a fiscal year which still leaves sufficient resources in the Petroleum Fund for an amount of equal real value to be appropriated in all later years. The ESI is set to be 3.0% of total Petroleum Wealth. However, the Government can withdraw an amount from the Petroleum Fund in excess of ESI if a justification that it is in the long term interest of Timor-Leste is provided to and approved by the National Parliament.

Petroleum Wealth, which comprises the balance of the Fund and the Net Present Value of future petroleum revenue, is estimated to be \$21,076.3 million as of 1 January 2014. Therefore, the ESI is estimated at \$632.3 million for 2014. This is a decrease of \$165.6 million compared with the 2014 ESI as estimated in last year's budget. The key assumptions behind the calculations are listed in Table 2.5.3.2.1.

**Table 2.5.3.2.1: Key Assumptions behind ESI**

<b>Asset recognition</b>	Forecast petroleum revenues are included only for projects with approved development plans. This includes Bayu-Undan and Kitan.
<b>Petroleum Reserves and Production Forecasts</b>	Production estimates are provided by project operators. Low case production is used, consistent with a 90 percent probability that actual will exceed the forecast.
<b>Oil price forecast</b>	ESI for Budget 2014 is prepared using the average of Energy Information Agency (EIA) low case and reference case for Brent.
<b>Prices for specific petroleum products</b>	Bayu Undan produces condensate, Liquefied Petroleum Gas (LPG) and Liquefied Natural Gas (LNG) while Kitan is producing only condensate. Forecast assumptions for each product are derived from historic differentials observed with Brent. Liquefied Natural Gas (LNG) prices are forecast using the provisional price formula negotiated between the Darwin LNG (DLNG) facility and Japanese LNG buyers. The price formula is renegotiated every three years.
<b>Production costs</b>	Central estimate of future capital and operating costs as provided by project operators.
<b>Discount rate</b>	Under Schedule 1 of the Petroleum Fund Law, the interest rate used to discount future petroleum revenue is the expected rate of return on the portfolio of financial assets held in the Fund.

Source: Petroleum Fund Administration Unit

Table 2.5.3.2.2 shows the estimated Petroleum Wealth and the ESI from 2013 onwards, assuming that withdrawals from the Fund are in line with the budget projection in Table 2.1.1.2.

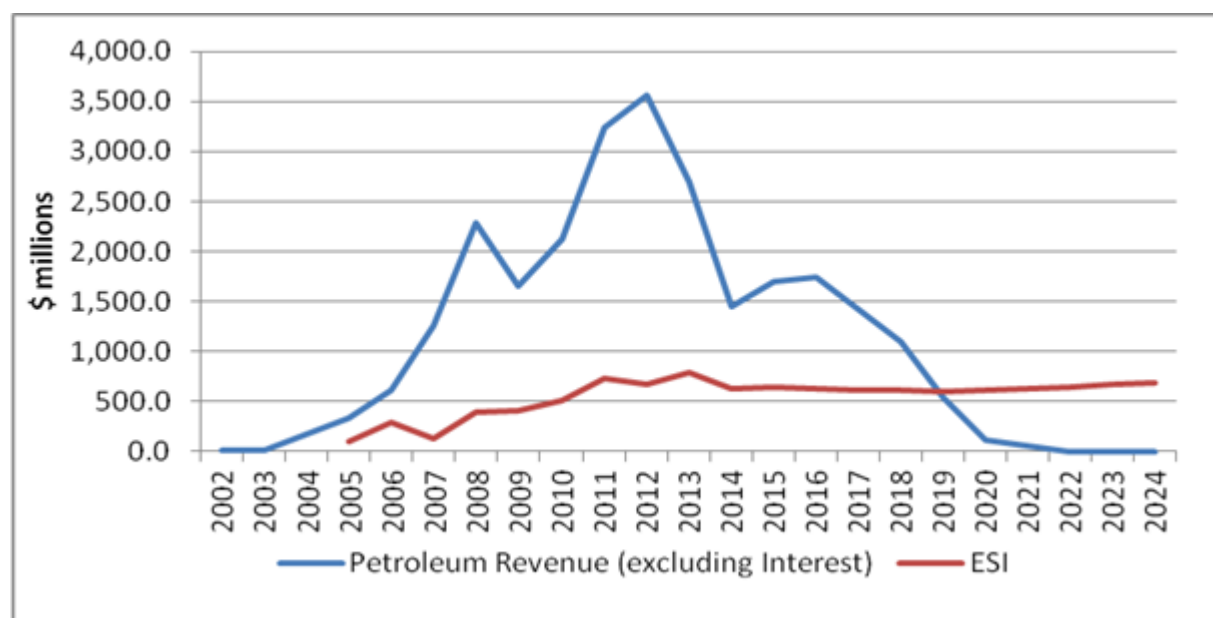

**Table 2.5.3.2.2: Petroleum Wealth and the Estimated Sustainable Income (ESI), \$ millions**

	2013 BB1	2014 Budget	2015	2016	2017	2018
Estimated Sustainable Income (PWx3%)	787.0	632.3	638.7	625.8	610.8	604.9
Total Petroleum Wealth (PW)	26,231.7	21,076.3	21,291.0	20,860.7	20,358.4	20,162.3
Opening PF Balance	10,776.7	14,058.5	15,369.0	16,344.4	17,372.0	18,460.3
Net Present Value of Future Revenues	15,455.0	7,017.8	5,922.0	4,516.3	2,986.4	1,702.0

Source: Petroleum Fund Administration Unit

Figure 2.5.3.2.1 depicts the main rationale behind using the ESI as a tool in the fiscal policy, *i.e.* smoothing the spending of temporarily high petroleum income. The extraction path of a non-renewable resource is typically bell-shaped with significant shorter-term swings. The ESI is meant to shield against this volatility and safeguard a sustainable use of public finances.

**Figure 2.5.3.2.1: Timor-Leste's Petroleum Revenues and Estimated Sustainable Income 2002-2025**

Source: Petroleum Fund Administration Unit

## **Changes in ESI from 2013 to 2014**

### *Overview*

Figure 2.5.3.2.2 shows the key incremental changes in 2014 ESI since the 2013 Budget. The main driving factors include oil price, price differentials, petroleum production and costs.

### *Actual Data 2012*

The current ESI for 2014 incorporates the actual development in 2012, which increases the 2014 ESI by \$34.0 million. The change is mostly due to higher than expected oil prices.

### *Actual 2013 withdrawals from the Petroleum Fund*

For 2013, the Government intends to withdraw from the Petroleum Fund an amount equal to the 2013 ESI which was \$787.0 million as approved by the Parliament. Therefore, this has no impact on the 2014 ESI.

### *Liquids and Gas Production*

As discussed and shown in Figure 2.5.3.1.2 in the previous section, liquids and gas production is forecasted lower in the 2014 Budget than in the 2013 Budget. The Operator has also indicated that production will end in 2020, which is 4 years earlier than previously assumed. These significant downward revisions reduce the ESI for 2014 by \$160.0 million.

The main causes for the downward revision in the production forecasts are lean gas breakthrough, low pressures and water production in the reservoir. A major shutdown is also scheduled for in 2014.

### *Oil Prices*

The current ESI for 2014 assumes a benchmark oil price of \$107.5 per barrel in 2013, based on the actual development for the first half of the year and EIA's forecasts going forward.<sup>10</sup> The 2013 Budget assumed a benchmark oil price of \$86.6 per barrel for 2013. Although the oil price trajectory onwards is now forecasted somewhat lower than last year, the net effect involves a \$5.0 million upward revision of the 2014 ESI.

### *Liquids Price Differentials (Condensate and LPG)*

The price for Bayu-Undan condensate products is forecasted based on the historical relationship with a benchmark price. This historical relationship, the so-called price differential, is then projected forward on the back of the benchmark's forecast (as determined by EIA) to give an estimate of the future price on the products sold in the Timor Sea. The change of the benchmark from WTI to Brent has impacted the price differentials and reduced the 2014 ESI by \$20.0 million.

### *Cost*

---

<sup>10</sup> These forecasts are reported by the EIA and also available from Annual Energy Outlook 2013: <http://www.eia.doe.gov/oiaf/aeo/index.html>.

Production costs from the two operators (COP and ENI) are forecasted slightly higher in 2014 Budget than in the 2013 Budget. The increase in the cost forecasts reduces the 2014 ESI by \$14.0 million.

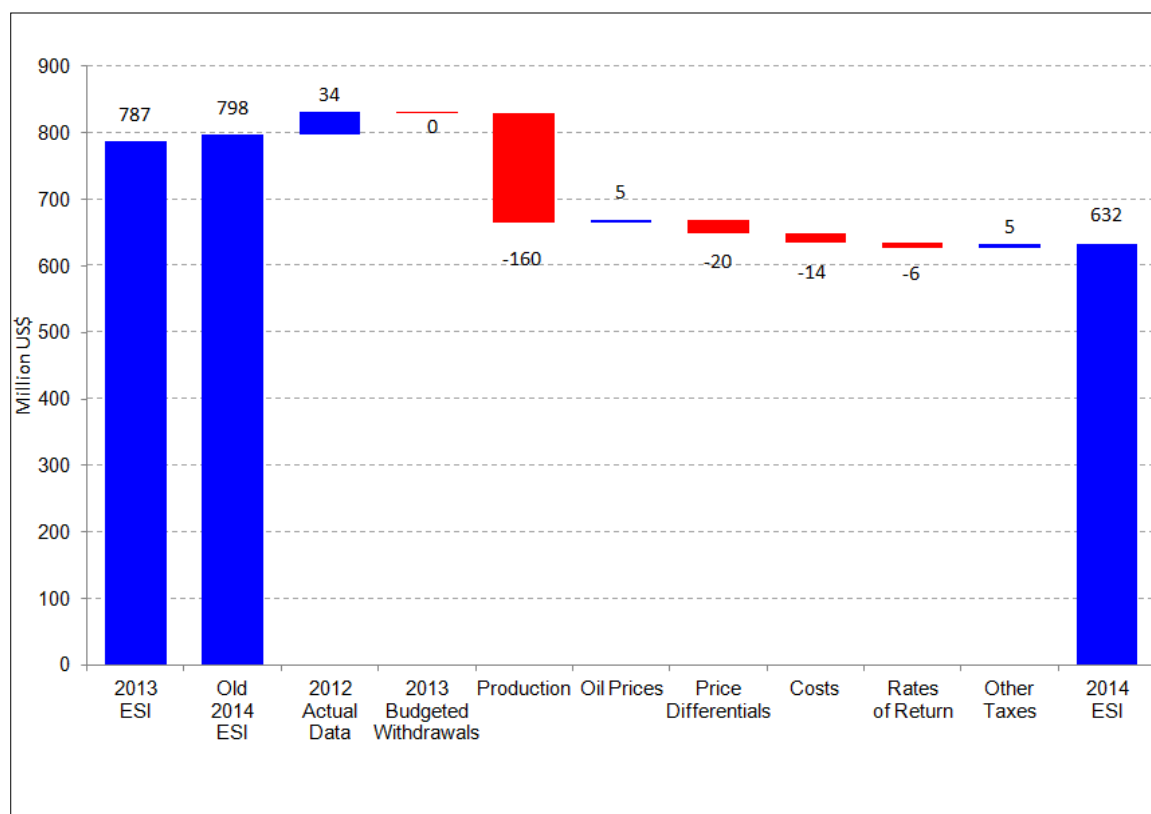

#### *Discount rate*

Under Timor-Leste law, the discount rate used in the Net Present Value (NPV) calculation of future petroleum revenues must equal the expected rate of return of the Petroleum Fund portfolio. The expected long-term nominal return is 5.7%. The slight change in the NPV discount rate results in a decrease in 2014 ESI of \$6.0 million.

#### *Other Taxes*

‘Other Taxes’ include wage taxes, tax collections from subcontractors and exploration drilling. These taxes are forecast for the 2014 Budget based on an analysis of recent collections and taking into account exploration work commitments as advised by Autoridade Nacional do Petroléu (ANP). The change in the forecast of other taxes increases 2013 ESI by \$5.0 million.

**Figure 2.5.3.2.3: Changes in the 2014 ESI (from Budget 2013 to Budget 2014), \$ millions**

Source: Petroleum Fund Administration Unit

## **Sensitivity Analysis**

The Government's objective is to prepare an ESI calculation that is prudent, as required by the Petroleum Fund Law. Although the calculations are based on the best information available and advice from experts, each input is inherently subject to significant uncertainty. Figure 2.5.3.2.3 shows how 2014 ESI changes when key assumptions are changed individually.

**Figure 2.5.3.2.4: Sensitivity Analysis – Estimated Sustainable Income, \$ millions**

Source: Petroleum Fund Administration Unit

The sensitivity analysis starts with the 2014 ESI of \$632.3 million and shows by how much the ESI would change if a different assumption for each key variable were used. The analysis shows that the oil price has by far the biggest impact on the ESI.

## **Review of Methodology**

Schedule 1 of the Petroleum Fund Law requires the ESI to be estimated using prudent assumptions reflecting international best practice and based upon recognised international standards. The Ministry of Finance undertook a comprehensive review of the methodology for the ESI calculated in the 2011 Budget with technical assistance from the IMF. However, it should be borne in mind that the projections come from the operators and are subject to change post-audit. This year's change in oil price forecast methodology is the first change of some significance since then.

The new methodology involves a change in oil price benchmark from WTI to Brent due to the latter's better tracking of the Bayu-Undan products in recent years (see Figure 2.5.3.2.4). The Independent Auditor of the Petroleum Fund, Deloitte Touche Tohmatsu, raised this issue in the Management Letter dated 14 March 2013 as part of its certification

of the ESI 2013. Lacking readily available alternative benchmarks that satisfied requirements in the Petroleum Fund Law, the Ministry of Finance found it necessary to continue using WTI as the benchmark for Budget 2013.

In 2013, the EIA started to publish three long-term forecasts of Brent benchmark prices, generally following the P90, P50, and P10 models. These new forecasts have made it possible to adopt Brent as the more suitable benchmark for ESI calculations starting with the 2014 ESI.

### 2.5.3.3 Managing the Petroleum Fund

#### The Petroleum Fund Model

The Petroleum Fund Law is designed to contribute to the wise management of Timor-Leste's petroleum resources for the benefit of current and future generations. The Petroleum Fund is a tool that facilitates sound fiscal policy where appropriate consideration and weight are given to the long-term interest of Timor-Leste's citizens. The Petroleum Fund helps policymakers to make well-informed budget decisions in an environment of fluctuating petroleum incomes that are temporarily at a high level. The decision on *how much to spend and how much to save* (i.e. spend later) is done in the Annual General State Budget, where all of the Government's priorities are weighed against each other.

The petroleum fund mechanism implies that petroleum revenues are transferred in their entirety to the Fund and invested abroad in financial assets. The investment policy of the Fund aims at maximizing the risk-adjusted return. The Fund's only outflow is transfers to the central Government budget, pursuant to parliamentary approval. The amount that may be transferred to the budget is guided by the Estimated Sustainable Income (ESI), which is

defined as 3.0% of total petroleum wealth. The implied investment objective of the Fund is accordingly set at 3.0% real return, as a necessary condition to enable sustainability on the spending side in terms of maintaining the purchasing power of the petroleum wealth when spending is constrained by the ESI.

### **Governing the Petroleum Fund**

Based on the “Santiago principles”<sup>11</sup>, the Petroleum Fund governance model is one with a high degree of transparency and disclosure of information. This helps build public support for wise management of petroleum revenues and reduces the risk of bad governance. *Transparency* ensures that information can be used to measure the authorities' performance and also guards against any possible misuse of powers. One of the fundamental elements of the Fund's governance structure is that no one person or institution is responsible for making and implementing investment decisions because each party is formally accountable to another for their role in the decision-making process. This degree of transparency serves to encourage *consensus* and enable *accountability*, which means authorities and whoever handles public money can be held responsible for their actions.

As the Executive, the Government through the Ministry of Finance is responsible for the overall management of the Petroleum Fund, on behalf of the people of Timor-Leste. The Petroleum Fund Law makes the Government accountable to Parliament through various reporting requirements. Operational management is carried out by the Central Bank, which invests the Fund's capital according to guidelines established by the Ministry of Finance and mandates developed by the Investment Advisory Board (IAB). The Ministry of Finance is required to seek advice from the IAB before making decisions on any matter relating to the investment strategy or management of the Petroleum Fund.

### **Petroleum Fund Investment Policy**

The Petroleum Fund was established in 2005 with a simple investment strategy that mainly constrained investments to US Dollar denominated high rated bonds issued or guaranteed by Governments. This was deemed necessary to avoid exposure to risk and volatility while building capacity. It was also considered important to take time to build public support and to avoid turbulence in terms of market losses before the management had received a certain degree of integrity, credibility and reputation for professionalism.

The Petroleum Fund Law amendments in 2011, which followed a long and thorough process involving all stakeholders, allowed for up to 50.0% allocation to public equities, not less than

---

<sup>11</sup> International Working Group's “Sovereign Wealth Funds: Generally Accepted Principles and Practices”, otherwise known as the Santiago Principles. The Principles identify a framework of generally accepted principles and practices that properly reflect appropriate governance and accountability arrangements as well as the conduct of investment practices by Sovereign Wealth Funds (SWFs) on a prudent and sound basis.

50.0% in fixed income, and not more than 5.0% in alternative instruments. The rationale for these changes was two-fold:

1. *Diversification*. This is the process of exposing the portfolio to a number of different asset classes (for example bonds and equities) rather than being concentrated in any one of these alone. The key to the diversification process is that different asset classes usually do not move together. Combining assets with returns that are less than perfectly correlated can therefore mitigate overall volatility.
2. *Enable sustainable spending*. The Government believes that a target allocation to equities of 40.0% over time will enable the Fund to generate 3.0% real return with reasonable probability. This would be a necessary condition to ensure the sustainability of public spending, which is guided by the Estimated Sustainable Income, set at 3.0% of Petroleum Wealth. The Government notes at the same time that the higher allocation to the traditionally more volatile asset class of public equities will involve more short-term fluctuations in the Fund's investment returns. Having a long-term investment horizon, the Government is ready to accept this increased short-term risk to pursue its belief that equities will perform better than bonds in the long term.

**Table 2.5.3.3.1 Petroleum Fund Portfolio and Managers Structure**

Number	Managers and Mandates, as of June 2013	Weight	Market Values, \$ millions	Return since inception*

Source: BCTL – Petroleum Fund Q2 2013 Report.

\*Inception dates for different managers are not equivalent, thus inception returns are not directly comparable.

In pursuing its investment belief, the Government's first order priority has been to gradually increase the equity allocation from 5.0% at the end of 2011 to 40.0% by June 2014, aiming, among other things, to buttress any adverse effects that bad market timing would incur. As of end of the 2nd quarter of 2013, the Fund's allocation to equities was 30.0% with the rest remaining in US Treasuries. The Government is currently also exploring ways to diversify the bond portfolio. As a first step to reduce the concentration of US Treasuries, 10.0% of the Fund has been allocated to non-US developed market investment grade sovereign bonds.

The evolving investment allocation of the Petroleum Fund involves a sound and responsible process of introducing new investment mandates and external managers. Table 2.5.3.3.1 shows the Petroleum Fund portfolio and manager structure as of June 2013. The Government is conscious that increasing the number of asset classes and sub-asset classes requires a more sophisticated monitoring framework to ensure that each manager is performing well and in accordance with their guidelines. In general, a gradual development of the governance structure and capabilities are a prerequisite for a successful development of the investment strategy.

### **Projected Petroleum Fund Development**

The Fund's balance is \$13,624.0 million as of June 2013. This is an increase of \$1,848.8 million from the start of the year. The Fund balance is expected to be \$14,058.5 million by the end of 2013 after deducting the withdrawal of \$787.0 million in 2013 adopted by Parliament.

The current forecast, as shown in Table 2.5.3.3.2, shows the total value of the Fund to be \$14,058.5 million by the end of 2013 and \$15,369.0 million by the end of 2014, assuming withdrawals in excess of ESI from 2014-2018, see Table 2.1.1.2.

**Table 2.5.3.3.2 Estimated Petroleum Fund Savings 2011-2016, \$ millions**

	2012 Actual	2013 Estimate	2014 Budget	2015	2016	2017	2018

## 2.6: Financing

### 2.6.1 Introduction

Table 2.6.1.1. shows total financing for the 2014 state budget. Total financing is equal to the non-oil deficit, which is defined as domestic revenue minus total expenditure. The financing items in the 2014 State Budget are the ESI, excess withdraws from the Petroleum Fund, loans and the use of cash balance.

The non-oil deficit shows the approximate contribution to aggregate demand from Government spending. When expenditure is financed mostly through domestic revenue, the increase in Government expenditure is approximately equal to the decrease in spending from firms and individuals (as they have to pay taxes). This means that aggregate demand remains roughly constant. However should the expenditure be financed by withdrawals from the Petroleum Fund, then extra money is being injected in the economy and this spurs demand. If this demand is not matched by a similar increase in supply then this can result in higher inflation.

As shown in Table 2.6.1.1, the ESI, withdrawals from the Petroleum Fund, the use of the cash balance and borrowing will all contribute to the financing of the 2014 budget. For the 2014 budget, loans still represent a fairly minor proportion of the overall financing, although this number is predicted to increase in the future.

**Table 2.6.1.1: Financing 2014 to 2018**

	2014	2015	2016	2017	2018
<b>Total Financing</b>	<b>1,333.9</b>	<b>1,712.5</b>	<b>1,813.8</b>	<b>1,503.0</b>	<b>1,348.8</b>
Estimated Sustainable Income (ESI)	632.3	638.7	625.8	610.8	604.9
Excess Withdrawals from PF	270.6	956.5	1,029.5	724.8	707.0
Use of Cash Balance	400.0	0.0	0.0	0.0	0.0
Borrowing /Loans	31.1	117.3	158.5	167.5	37.0

Sources: National Directorate of Budget, Petroleum Fund Administration Unit and Major Projects Secretariat

The Financing section is further subdivided into four more sections. The first will focus on explaining the ESI, and the concept of excess Withdraws. The second and third sections will focus on the use of loans and Cash Balance, respectively. Finally, the last section will look at the Public Private Partnerships (PPPs).

### 2.6.2 ESI and Excess Withdraws

The Estimated Sustainable Income (ESI) has been estimated at \$632.3 million for 2014, as described in section 2.5.3.2. According to the 2005 law the ESI is the maximum amount which can be withdrawn each fiscal year in order to leave sufficient resources in the Petroleum Fund for later years and is calculated as three percent (3%) of the Petroleum Wealth.

The estimated value for the ESI is lower than the 2013 ESI, estimated at \$787.0 million. The main reasons for the decrease in the ESI are a decrease in forecasted production and also a slight increase in forecasted costs.

Please note, however, that the ESI is based on data provided by the operator which will be subject to audit in 2014.

### 2.6.3 Loans

This section firstly describes the underlying rationale for taking loans and then describes loans signed in 2014.

When deciding on the method of financing for the required and agreed-upon infrastructure, if the required expenditure exceeds the ESI and domestic revenue together, the Government is confronted with two alternatives. First, it can finance this through excess withdrawals. However, when this alternative is taken, it can have a very high opportunity cost as the Government has to forego the returns from the Petroleum Fund's investments. The second alternative is to take loans when these are given at low interest rates and used to fund high quality and high return projects both from an economic and social perspective.

Two loans will be described in this section, namely the ADB Manatuto to Natarbora road upgrade loan and the World Bank Road Climate Resilience Project Loan (details shown in Table 2.6.3.1). Both projects feature in the Strategic Development Plan, which aims to rehabilitate all key arterial roads by 2017 and both projects have high associated Economic Internal Rates of Return, which is a measure used to compare the viability of an investment.

The total value of Manatuto to Natarbora road rehabilitation project, including the Government contribution of \$73 million, is approximately \$123 million. The \$50 million of loans are obtained from two sources, the Special Fund (SDR 6,672,000, roughly equivalent to \$10 million) and the OCR (\$40 million), with interest rates of 2% and LIBOR + 50bps (+0.5 percentage points), respectively. Moreover, both loans have a grace period of 5 years (meaning that the debt starts to be repaid after 5 years). Both these rates are lower than what the Government would have had to pay in interests if it had borrowed from private institutions and this rate of interest is also lower than the forecasted yield accruing from Petroleum Fund investments which was at 4.07% this year but is expected to reach 5.7% in the long-term. Note however, that since the Special Fund component of the loan is in SDR (Special Drawing Right), an IMF basket of currencies composed of the Euro, the Yen, the Dollar and the British Pound, this loan is exposed to some exchange rate risk. Finally, it should also be mentioned that the estimated Economic Internal Rate of Return of this project is 9%.

During the course of 2013, the Government also signed its first World Bank loan which was aimed at funding the Road Climate Resilience Project between Solerema and Ainaro. The total value of the project is \$87 million, including the Government contribution of \$47

million. The remaining \$40 million has two components. The first component is a \$25 million IDA loan with an interest rate of 2% and a grace period of 5 years whereas the second component is a \$15 Million IBRD loan with a predicted interest rate of 3.7% and a 8 year grace period. Note, however that the interest rate on the IBRD loan cannot be forecasted with certainty although it is likely that the fixed rate will be somewhere between the 3.2-3.8% range. Finally, given that this loan is fully in USD, it is not exposed to exchange rate risks.

**Table 2.6.3.1: Information on Signed Loan Agreements**

	<b>Loan 1: ADB Manatuto to Natarbora</b>	<b>Loan 2: World Bank Solerema-Ainaro</b>
<b>Total Loan Value</b>	<b>\$50.0 million</b>	<b>\$40.0 million</b>
Government Counterpart Contribution	73 million	47 million
Date signed	Not signed yet	18 <sup>th</sup> November 2013
Grace Period	5 years	IDA 5 years IBRD 8 years-
Repayment Period	25 years	IDA 25 years IBRD 28 years
Interest rate	SF: 2% OCR:LIBOR + 0.5 bps	IDA: 2% IBRD: forecasted at 3.7%

Source: National Directorate of Budget and Major Projects Secretariat

In terms of the disbursement of the total loans, the flow is described in Table 2.6.3.2. Note, however, that the repayment of the loans does not start until 2017 which is the end of the grace period for part of the ADB loan signed in May 2012.

**Table 2.6.3.2: Total Loan Disbursement, 2014 – 2018**

	<b>2014</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>	<b>2018</b>
<b>Total Loan Disbursement</b>	31.1	117.3	158.5	167.4	37.0

Source: National Directorate of Budget and Major Projects Secretariat

## 2.6.4 Use of the Cash Balance

Actual expenditure in 2013 is forecasted to be below the approved budget. This means that there will be a significant cash balance from the CFTL, Infrastructure and HCDF at the end of 2013. The Government plans to use some of this cash balance to finance expenditures in 2014.

The breakdown of this cash balance for 2014 is shown in Table 2.6.4.1. \$202.9 million is the rollover from the Infrastructure Fund from 2013 to 2014. The rollover from the Human Capital Development Fund is much smaller at \$3.1 million. Finally \$194.0 million of the cash balance from the Treasury Account is being used.

Table 2.6.4.1: Use of Cash Balance 2014, \$ millions

<b>Total</b>	400.0
Infrastructure Fund Rollover excluding loans, net of deductions	202.9
HCDF Rollover	3.1
Drawdown of Cash Balances from the Treasury Account	194.0

## 2.6.5 Public Private Partnerships

Public-Private Partnerships (“PPPs”) are an economic relationship between a public sector authority and a private sector company whereby the private sector company provides a public interest good or service and shares the respective financial, technical and operational risks. The underlying rationale for PPPs in Timor-Leste stems from the fact that this type of business arrangement which potentially allows the Government to benefit from the private sector expertise and financing which then results in higher quality and efficiency, as well as lower risk borne by the Government. However, in the case of Timor-Leste, such projects are only undertaken if they are aligned with the Government’s development objectives and have high rates of both economic and social return.

Having completed a PPP policy and legal framework, Timor-Leste has now approved one PPP, namely the Tibar Port.

The Tibar Port project was approved by the Council of Ministers on August 2, 2013 and the deadline for the expression of interest was September 5, 2013. The Tibar Port is expected to meet international standards in areas such as efficiency and cargo operations. Consequently, it is widely believed that it will alleviate congestion as well as dealing with some of the limitations of the Dili Port, which has very limited expansion possibilities and is capable of berthing only small vessels. This is viewed as necessary due to the expected increase in demand for imports given the forecasted increase in economic growth in Timor-Leste. In terms of construction, the project has three main components; the preparation of the site, the installation of the port facilities and their respective maintenance, both during and after its implementation.

# Part 3: 2014 General State Budget Law

## 3.1 General State Budget Law Text

### FIFTH CONSTITUTIONAL GOVERNMENT

---

Legislation Proposal no.     /2013

of .....

#### DECREE NO. 8/III

#### 2014 State General Budget

The 2014 State General Budget covers all revenues and expenditure by the State of Timor-Leste in financial year 2014.

Attachment I to the 2014 State General Budget Law, henceforth called SGB, sets the total estimated SGB revenue from January to December 2014 derived from petroleum and non-petroleum sources (tax revenues, non-tax revenues and loans).

The total estimated revenue is US\$ 2,410.5 million.

Attachment II to the present law sets all budget appropriations, systematized as follows:

1. 176.751 million for Salaries & Wages;
2. 480.277 million for Goods & Services;
3. 335.501 million for Public Transfers;
4. 52.122 million for Minor Capital;
5. 455.349 million for Capital Development.

Excluding autonomous funds and services, special funds and loans, the total budget appropriation is 1,074.522 million.

The SGB includes all revenues and expenses from autonomous funds and services, namely the Timor-Leste Airport and Air Navigation Authority (ANATL), the Port Authority of Timor-Leste

(APORTIL – including Berlin-Nakroma), the Equipment Management Institute (IGE) and the Autonomous Medical Stores (SAMES). Revenues from those entities are included under the item for own revenues from autonomous funds and services in Attachment I. Attachment III contains the budget for proposed expenses.

The total estimated expenditure for self-funded autonomous funds and services in 2014 is \$16.927 million, including \$12.159 million transferred from the SGB in order to subsidize expenditure exceeding the estimated own revenues.

The total budget appropriation for the Infrastructure Fund is \$368.551 million including loans and \$337.501 million excluding loans. The carryover from 2013, in accordance with the law, is \$221.013 million.

The total budget appropriation for the Human Capital Development Fund is \$40 million, including \$3.079 million as carryover from 2013, in accordance with the law.

Total estimated SGB expenditure is \$1,500 million.

The maximum threshold approved for public debt in 2014 is \$31.1 million.

Estimated non-petroleum revenue, including from autonomous funds and services, is \$166.1 million.

Thus the tax deficit is \$1,333.9 million, being funded by \$902.9 million from the Petroleum Fund, \$31.1 million from the use of public credit, \$206 million from the Special Fund balance (\$202.9 million from the Infrastructure Fund and \$3.1 million from the Human Capital Development Fund) and \$194 million from the Treasury Account balance.

Under section 95.3 (d) and section 145.1 of the Constitution of the Republic, the Government decrees the following, to prevail as law:

## **Chapter I**

### **Definitions and approval**

#### **Article 1**

#### **Definitions**

For the purposes of the present Law:

- a) "Expense Category" means the grouping of expenses under the five following categories:
  - i) "Salaries & Wages", meaning the full amount a Body may spend on Salaries & Wages for the holders of political offices and for permanent and temporary staff;
  - ii) "Goods & Services", meaning the full amount a Body may spend on the acquisition of Goods & Services;
  - iii) "Public Transfers", meaning the full amount a Body may spend on public grants and consigned payments;
  - iv) "Minor Capital", meaning the full amount a Body may spend on the acquisition of Minor Capital goods;

- v) "Capital Development", meaning the full amount a Body may spend on Capital Development projects.
- b) "Expenses Offset by Revenues" means expenses met by the own revenues charged by autonomous funds and services, provided that the amount does not exceed the full value of the revenues entered in the relevant Treasury accounts;
- c) "Budget Appropriation" means the full amount inscribed in the SGB in favour of a Body towards the payment of a certain expense;
- d) "Body / Bodies" is the generic term adopted in the SGB to indicate the administrative public sector subjected to budget discipline and that, according to the organic classification, may be divided by such titles as: Office of the President of the Republic, Parliament, Government (Office of the Prime Minister, Presidency of the Council of Ministers, Ministries and Secretariats of State), Courts and Office of the Prosecutor General of the Republic, as well as other institutions featured in Attachment II;
- e) "Expenditure Items" means the individual expenditure items within each Expense Category, based on the expenditure account code structure maintained by Treasury.

## **Article 2**

### **Approval**

The present Law approves the State General Budget for the period from 1 January 2014 to 31 December 2014, which covers:

- a) Total revenues per groupings, including own revenues from autonomous funds and services, special funds and loans featured in Attachment I to the present diploma, which is an integral part of it;
- b) Total expenses per groupings, including the amounts to be transferred from the State General Budget for autonomous funds and services in 2014, featured in Attachment II to the present diploma, which is an integral part of it;
- c) Total expenses from the autonomous funds and services to be funded from their own revenues and from the State General Budget, featured in Attachment III to the present diploma, which is an integral part of it;
- d) Total expenses corresponding to the appropriation for the Infrastructure Fund in 2014, including carryover balance and expenses funded through public debt, featured in Attachment IV to the present diploma, which is an integral part of it;
- e) Total expenses corresponding to the appropriation for the Human Capital Development Fund in 2014, including carryover balance, featured in Attachment V to the present diploma, which is an integral part of it.

## **Chapter II Revenues**

### **Article 3 Taxes and Fees**

During 2014 the Government is authorized to collect taxes and other fees set by law.

## **Chapter III Authorization to make transfers from the Petroleum Fund**

### **Article 4 Authorized limit for funding the SGB**

Under article 7 of Law no. 9/2005, of 3 August, ex vi the wording given to it by Law no. 12/2011, of 28 September (the Petroleum Fund Law), the transfer amount from the Petroleum Fund in 2014 may not exceed \$902.9 million and may only take place after complying with the provisions of article 8 of the above law.

## **Chapter IV Public Indebtness, Public-Private Partnerships and Guarantees**

### **Article 5 Maximum Threshold of Authorized Debt**

1. In order to meet the funding needs related with the construction of strategic infrastructures for the development of the Country, the Government is authorized, under article 20 of Law no. 13/2009, of 21 October, as changed by Law no. 9/2011, of 17 August, Law no. 3/2013, of 7 August, on Budget and Financial Management, and article 3 of Law no. 13/2011, of 28 September, on the Public Debt Regime, to make use of external concessional loans up to a maximum amount of \$270 million, with a maximum time frame of 40 years.
2. Subject to the provisions in the previous paragraph, funding from loans in 2014 may not exceed \$31.1.

### **Article 6 Maximum Threshold Authorized for Public-Private Partnership Arrangements**

1. In 2014 the Government is authorized to sign public-private partnership arrangements up until the maximum threshold of \$500 million.
2. For the purposes of the previous paragraph, the entity responsible for administering and managing State participations is the one set in the law.

### **Article 7 Maximum Threshold Authorized for International Organization Membership Fee Increases**

1. In 2014 the Government is authorized to sign a guarantee concerning the payment of the fee as member of the International Monetary Fund, if requested, up until the maximum threshold of \$3 million.
2. Any payment related with the previous paragraph shall be approved by Parliament.

## **Chapter V**

### **Budget Execution**

#### **Article 8**

##### **Complementary rules concerning budget execution**

1. Budget execution by the Bodies must make use of the Financial Management IT System.
2. In 2014, verification of budget execution by Parliament will focus on all recurring expenses.
3. Each body is only entitled to conduct single source public procurement up to 10% of the total respective budget appropriation for 2014, subject to compliance with legal rules on admissibility.
4. Parliament shall hold quarterly debates on the budget execution of each ministry, secretary of State and autonomous fund and service, with the presence of the respective members of Government and senior officers.
5. Should budget execution reach 75% by the end of the third quarter, the Government may make withdrawals from the Petroleum Fund above the Estimated Sustainable Revenue, provided that it notifies Parliament in advance and that it ensures a reserve of \$200 million in the Treasury Account.
6. Should it be estimated during the third quarter that the budget execution rate until the end of the year will be below 80%, the Budget is to be rectified by reducing the respective total amount between the months of July and September.
7. Requests for making use of the contingency reserve must be properly justified under articles 7.3 and 37 of Law no. 13/2009, of 21 October, as changed by Law no. 9/2011, of 17 August, and by Law no. 3/2013, of 7 August, on Budget and Financial Management, and must contain a detailed description of the activities to be carried out.

#### **Article 9**

##### **Payment of taxes on imports**

Treasury is authorized to establish and implement an accounting mechanism for registering and controlling revenues and expenses, corresponding to the payment of taxes on imports done by the Bodies or on their behalf.

#### **Article 10**

##### **Appropriations for the Whole of Government**

According to the criteria set for public expenses, the Government shall inscribe the following appropriations in the budget of Appropriations for the Whole of Government, to be managed by the Ministry of Finance:

- a) Counterpart Fund;
- b) External Audit;
- c) Contingency Reserve;
- d) International Organization Membership Fees;
- e) Payment of pensions to former holders and former members of Sovereignty Bodies;
- f) Construction of Integrated Border Posts;
- g) Contribution Fund for Social Institutions;
- h) Provision for the g7+, Secretariat and Foundation;
- i) Business Registration and Verification Service;
- j) Large Project Secretariat;
- k) Provision for Legal Services;

## **Chapter VI**

### **Autonomous funds and services and special funds**

#### **Article 11**

##### **Own Revenues**

1. Attachment I indicates the estimated revenues to be collected by autonomous funds and services.
2. Attachment II indicates the expenses resulting from transfers from the SGB to the autonomous funds and services and to the special funds, as well as the estimated respective expenses.
3. Attachment III indicates the budgets by expense category concerning the autonomous funds and services partly funded by own revenues.
4. Attachment IV indicates the appropriation for the Infrastructure Fund.
5. Attachment V indicates the appropriation for the Human Capital Development Fund.
6. Expenditure Authorization Notices in favour of autonomous funds and services from own revenues may only be authorized after the State receives the respective revenues. The said authorizations must be of an equal or lesser value.

## **Chapter VII**

### **Final Provisions**

#### **Article 12**

##### **Funding through independent donors**

1. Each Body may only establish agreements with independent donors for the provision of additional or complementary resources to the funding contained in the budget allocations of the present Law, after hearing the mandatory opinion of the minister responsible for the area of Finance.
2. This funding must be managed in accordance with the directives issued by the Ministry of Finance and with the donor requirements.

#### **Article 13**

##### **Accountability**

1. Signing contracts without budget provision entails political, financial, civil and criminal accountability, in accordance with article 46 of Law no. 13/2009, of 21 October, as changed by Law no. 9/2011, of 17 August, and by Law no. 3/2013, of 7 August, on Budget and Financial Management.
2. For purposes of activating the financial accountability described in the previous paragraph, the holder of a political office is considered to have made an undue payment, subjected to being ordered to replace the corresponding amount, under article 44 and following of Law no. 9/2011, of 17 August, approving the Organic Structure of the Chamber of Accounts under the High Administrative, Tax and Audit Court, ex vi Law no. 3/2013, of 7 August.

#### **Article 14**

##### **Entry into force**

The present law enters into force on the day after its publication and will have effect starting on 1 January 2014.

Approved on 24 January 2014.

The Speaker of Parliament,

Vicente da Silva Guterres

Promulgated on

Publish it.

The President of the Republic,

Taur Matan Ruak

## ATTACHMENT I

### Estimated revenues to be collected and funding for expenses

in the 2014 State General Budget (US\$ million) \*

**Table I – Estimated Revenues**

<b>1</b>	<b>Total Revenues</b>	<b>2,410.5</b>
<b>1.1</b>	<b>Petroleum Revenues</b>	<b>2,213.4</b>

## Part 4: 2014 Supporting Documentation

### 4.1 Justification for Transfer from the Petroleum Fund

	<b>PRIMEIRO MINISTRO</b>	Gabinete do Primeiro-Ministro
N.º Ref. 1308/GPM/X/2013		
<b>Assunto: Justificação da transferência superior ao Rendimento Sustentável Estimado do Fundo Petrolífero</b>		
Excelência,		
<p>Declara a Lei n.º 12/2011 "Primeira alteração à Lei n.º 9/2005 de 3 de Agosto, Lei do Fundo Petrolífero", no seu Artigo 9.º, que sempre que se apresente uma necessidade de proceder a uma transferência do Fundo que exceda o Rendimento Sustentável Estimado, o Governo deve expor ao Parlamento Nacional uma justificação detalhada que explique o interesse nacional desse trâmite.</p>		
<p>A par com a submissão, para consideração e aprovação do Parlamento Nacional, da Proposta de Lei do Orçamento Geral do Estado para 2013, vimos apresentar a Vossa Excelência a presente justificação para cumprir com o requisito legal mencionado.</p>		
<p>Enquanto Governo, temos sempre presente na nossa acção governativa que as decisões que tomamos num momento têm um impacto não apenas imediato, mas com repercussões nas décadas seguintes, afectando igualmente as gerações futuras. Em poucos decisões este facto será tão real como na justificação do levantamento do Fundo Petrolífero acima do Rendimento Sustentável Estimado. É por esta razão que imprimimos a esta decisão a responsabilidade, o profissionalismo e a transparência que a mesma exige.</p>		
<p>Responsabilidade, profissionalismo e transparência têm aliás sido os princípios primordiais que têm orientado o compromisso do V Governo Constitucional, nesta fase que o país atravessa. Já o IV Governo tinha iniciado em 2008 uma Reforma profunda da gestão do Estado para assegurar que o grande projecto do desenvolvimento de Timor-Leste tinha alicerces sólidos que garantissem daí para a frente a eficiência e a prestação de contas do aparelho de Estado.</p>		
<p>Esse propósito não tem sido negligenciado nestes últimos anos, sendo, pelo contrário, um fundamento basilar do Programa do Governo o fortalecimento de uma arquitectura</p>		
		Pedro Jo Gouveia Vice do Primeiro-Ministro 24. Junho 2013

PRIMEIRO  
MINISTRO

Gabinete do  
Primeiro-Ministro

institucional que aperfeiçoe os mecanismos de monitorização e de fiscalização do sector público.

Dessa arquitectura fazem parte instituições como a Comissão da Função Pública, a Comissão Anti-Corrupção, a Câmara de Contas ou a Inspeção-Geral do Estado, que por diferentes perspectivas observam e garantem a eficácia e o profissionalismo na gestão das contas públicas. O Ministério das Finanças reserva também um protagonismo essencial nesse âmbito pelo controlo da execução da despesa e seus resultados. Hoje contamos ainda com a Secretaria de Estado para o Fortalecimento Institucional que conduz auditorias de desempenho e fiscalização, a todas as linhas ministeriais, corrigindo por dentro a capacidade da nossa administração pública.

A persistência e o compromisso determinado com a transparência e a responsabilidade da acção governativa em Timor-Leste têm sido reconhecidos internacionalmente. Inclusivamente no que concerne à gestão do Fundo Petrolífero, o relatório internacional do Instituto 'Revenue Watch' que dá conta da transparência na gestão dos recursos valoriza muito positivamente o cumprimento exemplar de Timor-Leste da Iniciativa de Transparência das Indústrias Extractivas.

Com esse compromisso pela transparência e dentro do espírito da Lei, é o interesse nacional a longo prazo que hoje aqui apresentamos, num compromisso com um desenvolvimento que se quer inclusivo e imperativamente sustentável. Os nossos objectivos para 2014, não são senão parte de um quadro mais amplo de desenvolvimento integrado a médio e longo prazo, no âmbito da implementação do Plano Estratégico de Desenvolvimento 2011-2030.

Aquilo com que ambicionamos para o curto prazo, os objectivos que queremos para 2014, são peça-chave no futuro das gerações vindouras.

Para melhor nortear a continuidade da estratégia nacional, em Março deste ano, foi aprovado em Conselho de Ministros um novo Mecanismo que visa melhorar o planeamento, coordenação e monitorização da implementação do Programa do Governo e do Plano Estratégico de Desenvolvimento 2011-2030. O Mecanismo de Coordenação de Políticas de Desenvolvimento tenderá a ser o principal instrumento de seguimento das políticas de desenvolvimento de Timor-Leste, favorecendo uma maior coordenação inter-ministerial, assim como entre o Governo e os Parceiros de Desenvolvimento.

Prémio do Governo  
Apoio do desenvolvimento local e social  
G4, 100-1000

PRIMEIRO  
MINISTRO

Gabinete do  
Primeiro-Ministro

Através deste Mecanismo podemos assegurar uma melhor articulação entre os Planos Anuais dos próximos anos e aqueles que são os documentos orientadores da nossa estratégia de médio e longo prazo, respectivamente o Programa do V Governo Constitucional e o Plano Estratégico de Desenvolvimento.

Neste quadro, o Orçamento Geral do Estado para 2014 é perfeitamente coerente com esta visão de médio e longo prazo. O Plano Estratégico de Desenvolvimento propõe que na primeira década da sua implementação seja o Estado a liderar o processo de desenvolvimento económico, assegurando as condições necessárias no país para que mais tarde o sector privado possa assumir esse protagonismo.

Essas condições passam pelo reforço de 4 pilares essenciais que, num espírito de continuidade com o Governo anterior, temos vindo a priorizar:

- Capital humano
- Desenvolvimento das infra-estruturas
- Governação e fortalecimento das Instituições
- Crescimento Económico.

O novo mecanismo monitorizará cada um destes sectores estratégicos de uma forma integrada, de forma a garantir a articulação dos princípios últimos do crescimento, da inclusividade, da resiliência e da sustentabilidade.

Em termos de crescimento económico, temos alcançado resultados muito esperançosos, com um crescimento médio desde 2008 de 11,9% e com a previsão de que se mantenha na ordem dos dois dígitos. Mas este crescimento só se poderá manter se for aliado a um compromisso com a inclusão social, à manutenção de instituições do Estado resilientes e a uma perspectiva de sustentabilidade a longo prazo.

Só a combinação destes princípios permitiu que superássemos juntos crises cíclicas e períodos de instabilidade, saindo destes reforçados porque nos obrigaram a olhar para dentro e a corrigir o caminho de construção nacional que queríamos fazer.

A paz e a estabilidade, conseguidas pela estreita colaboração de todos os órgãos de soberania, aliadas agora ao crescimento económico, começam a ter um impacto visível, mas também mais duradouro na vida da nossa comunidade. Esse impacto é tão mais relevante quando se reflecte não apenas numa maior capacidade de sonhar com o futuro, mas na sua concretização no dia-a-dia. Se o combate ao flagelo da pobreza continua a ser uma prioridade crucial do nosso Governo e nos indica que há muito

Palácio do Governo  
Avenida Pres. Bento Gonçalves, 10000  
DLX - Luanda

PRIMEIRO  
MINISTRO

Gabinete do  
Primeiro-Ministro

percurso pela frente, a verdade é que alguns sinais nos indicam que o caminho escolhido foi o acertado.

Em Junho deste ano, foi aberto o balcão único SERVE que veio facilitar o registo de empresas. Aliado ao apoio que se tem vindo a prestar às pequenas e médias empresas, cooperativas e grupos industriais e comerciais, este veio dinamizar muito positivamente a nossa economia. Desde então e até à data, neste curto espaço de tempo, o número de empresas que iniciaram actividade ascende às 1470, sendo, destas, a imensa maioria – 1279 – empresas nacionais.

Este resultado é fruto das reformas cruciais que temos vindo a desenvolver e da estabilidade que conseguimos alcançar. Estamos a viver um período de paz continuada que permite aos nossos cidadãos não apenas sonhar, mas investir num futuro melhor.

A abertura de empresas por timorenses mostra que por um lado os nossos profissionais têm capacidades próprias para desenvolver novas actividades económicas e que o investimento na educação e na formação profissional começa a dar frutos. Mostra que as condições básicas para esse desenvolvimento começam a existir, ao nível das infra-estruturas que oferecem a logística de base e ao nível das instituições que enquadram o esforço individual num projecto colectivo. Mostra que o crescimento económico nacional está a gerar emprego e melhores condições de vida. Mas mostra também que existe confiança no nosso projecto de Nação que permite aos timorenses concretizar o seu futuro pelas próprias mãos. A estabilidade e a paz conseguidas foram fundamentais para este espírito de confiança. O papel do Estado como potenciador do crescimento económico começa então a contagiar o sector privado.

O empreendedorismo nacional demonstra que o Plano que traçámos para o desenvolvimento de Timor-Leste está a funcionar.

Queremos por isso continuar este caminho, do qual vislumbramos por agora apenas o início.

Sabemos que tanto está ainda por fazer, que grandes desafios estão por ultrapassar, por isso queremos persistir neste projecto de crescimento inclusivo que é feito por todos e para todos.

O levantamento adicional do Fundo Petrolífero que aqui colocamos à vossa consideração será orientado fundamentalmente para infra-estruturas e desenvolvimento

Paulina da Conceição  
Assessora do Primeiro-Ministro, Gabinete  
do Primeiro-Ministro

PRIMEIRO  
MINISTRO

Gabinete do  
Primeiro-Ministro

do capital humano, ambas condições cruciais para que Timor-Leste possa continuar o momento de notável crescimento económico, de forma inclusiva e sustentável.

Queremos com esse investimento adicional continuar a investir na educação e na formação profissional com carácter de prioridade. Estamos a formar os jovens que serão os cidadãos e profissionais de Timor-Leste nas próximas décadas. Queremos fazê-lo com uma cada vez mais sólida articulação com as necessidades do mercado de trabalho, através de iniciativas como um sistema de estágios, atribuição de bolsas, centros nacionais de formação profissional em todo o país e a instalação de centros de auto emprego nos 13 distritos.

Queremos também assegurar que os nossos estudantes estão bem nutridos, com programas como os da merenda escolar.

Reforçaremos o atual pacote de prestação de cuidados de saúde primários fazendo chegar estes serviços a cada timorense, a cada mãe e a cada filho, aos nossos velhos e mais frágeis. Além destes serviços mínimos, queremos investir igualmente numa série de serviços especializados para elevar o quadro hospitalar em Timor-Leste respondendo às necessidades dos nossos cidadãos. Este esforço terá que incidir igualmente na formação de pessoal qualificado, e para isso prevemos que até 2016, haja mais de 1.000 graduados da medicina timorenses a trabalhar como médicos de pleno direito em Timor-Leste.

Este capital adicional será, assim, orientado para o desenvolvimento das infra-estruturas fundamentais que sirvam os timorenses em todos os aspectos da melhoria das suas condições de vida.

Em Agosto deste ano, foi inaugurada a Central Eléctrica de Betano o que melhorará consideravelmente o acesso à Electricidade em todo o país. Além da Electricidade, continuaremos a investir em água e saneamento com programas como a instalação de 27.000 casas-de-banho por todo o país, ou a construção e reabilitação de 80 sistemas de água potável nas áreas rurais.

Outra prioridade que continuaremos a reforçar é a da construção de uma infra-estrutura rodoviária, de nível internacional, combinada com um sector de transportes articulado, numa rede que é crucial para o desenvolvimento integrado de todos os sectores, da saúde à educação, do comércio ao turismo, numa visão compreensiva do país como um todo.

Palácio do Governo,  
Avenida Presidente Nicolau Lobato,  
Dili, Timor-Leste

PRIMEIRO  
MINISTRO

Gabinete do  
Primeiro-Ministro

O investimento nas infra estruturas é basilar como capitalizador da actividade económica e concebêmo-lo também a pensar nos sectores de futuro, como o plano de desenvolvimento da Costa Sul, ou como uma série de instalações viradas para as nossas relações externas – como o Porto de Tibar e as melhorias no Aeroporto Internacional Nicolau Lobato.

Queremos igualmente investir na modernização dos nossos sectores económicos tradicionais, como a agricultura e a pesca. Nestes sectores continuaremos a apostar numa combinação entre formação, novos recursos técnicos – como sejam os sistemas de irrigação ou de processamento de peixe – e serviços de apoio com vista ao aumento da produtividade.

Das comunidades que vivem junto ao mar, às que se concentram nas montanhas, queremos que este projecto de desenvolvimento nacional seja integrado, chegando a todos os timorenses, para que possamos continuar o caminho do crescimento que agora começamos, mas de um crescimento inclusivo.

Dado que o potencial de crescimento deve ser equilibrado em todo o país, duas iniciativas tiveram também especial atenção em 2013 que merecem menção nesta reflexão: as consultas populares desenvolvidas no âmbito do projecto de descentralização e os passos dados no estabelecimento das Zonas económicas especiais.

No primeiro caso, as consultas populares permitiram descortinar a vontade dos timorenses sobre o processo de descentralização, evidenciando um sentido entusiasmo com um maior envolvimento na tomada de decisões, assim como com a potencialidade de uma prestação de serviços públicos mais eficaz e adequada às suas necessidades. Este processo de auscultação foi crucial para definir com mais clareza a intenção que temos de estabelecer neste mandato 3 a 5 municípios no país.

No segundo caso, o projecto para o qual contamos com a experiência e profissionalismo do Dr. Mari Alkatiri, ensaia de forma pioneira, no Oecussi, um investimento que associa uma componente social profunda a uma outra de cariz económico, com vista a um impacto equilibrado e abrangente daquele distrito que pelas suas condições particulares apresenta desafios singulares no espaço do Timor-Leste. Com a criação da Zona Especial de Economia Social de Mercado, pretendemos dar um arranque integrado ao

Palácio do Governo,  
Avenida Pío de S. Paulo Lobato,  
DIL, Timor-Leste

PRIMEIRO  
MINISTRO

Gabinete do  
Primeiro-Ministro

desenvolvimento do Oecussi que tenha um impacto claro na melhoria da vida das populações pelo fomento da produtividade e do empreendedorismo local.

Finalmente, queremos continuar a pensar no desenvolvimento do país, olhando também para o exterior, fortalecendo as relações com os nossos parceiros mundiais. O OGE 2014 presta por isso especial atenção ao posicionamento de Timor-Leste no mundo, sendo um ano particularmente importante pela futura Presidência da CPLP e pelo nosso esforço de adesão à ASEAN.

No quadro internacional, queremos igualmente apostar nas potencialidades de uma abordagem sub-regional para o desenvolvimento, com o estabelecimento de uma parceria especial triangular com as províncias vizinhas da Indonésia e o Northern Territory da Austrália. Essa iniciativa tri-lateral, para o desenvolvimento económico regional integrado dos três Estados, pretende reforçar vínculos na área económica em sectores tão diversos como o turismo, a I&D, a energia ou a agricultura, alavancando o sector privado num novo quadro de cooperação multisectorial externa. Mas contará também com uma componente social e cultural fundamental articulada com a promoção de atividades comerciais, geradoras de riqueza, emprego e qualidade de vida para as comunidades locais.

Com projectos como os aqui mencionados, breves exemplos de um plano estratégico claro e coerente, pretendemos conduzir Timor-Leste a uma nova etapa de crescimento que se quer consolidado, inclusivo, sustentável. O Orçamento Geral do Estado para 2014 espelha na sua totalidade esta intenção de investir drasticamente na melhoria das condições de vida dos timorenses.

Se esse objectivo está manifesto na categoria de despesas de capital de desenvolvimento, está também plasmado na categoria de despesas recorrentes. Não servem essas últimas para manter simplesmente o aparelho de Estado em funcionamento como tal, mas antes congregam investimentos físicos e sociais que correspondem afinal a funções de serviço público basilar que assumimos como prioritárias. Destas podemos destacar a compra de medicamentos e equipamento médico ou de sementes, a prestação de subsídios aos Veteranos e as Bolsas de Mãe, programas como o da Merenda Escolar ou o de salários para professores voluntários.

Em perfeita articulação com o Programa do V Governo Constitucional e com o Plano Estratégico de Desenvolvimento 2011-2030, este OGE para 2014 dá continuidade e

Público-Governo  
Assento do Primeiro-Ministro  
DL 1/2014

PRIMEIRO  
MINISTRO

Gabinete do  
Primeiro-Ministro

coerência a um projecto nacional abrangente que até aqui se tem feito com o compromisso notável de todos os timorenses.

Exposto isto, Senhor Presidente do Parlamento Nacional, o Governo está a dar cumprimento àquilo que se comprometeu, ou seja, dar continuidade às reformas e investimentos que têm comprovadamente obtido resultados satisfatórios para a Nação e para melhorar as condições de vida de todo o Povo.

Por outras palavras, estamos a investir o Fundo Petrolífero nos sectores produtivos do país, na diversificação da economia e na qualificação e dignidade dos timorenses. Por esta razão, consideramos que o levantamento do Fundo Petrolífero acima do RSE se justifica pelo seu interesse nacional de longo prazo.

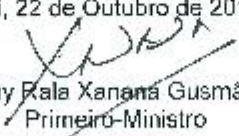

Excelência,

Concluindo,

Para terminar, junto o "Relatório com a estimativa do montante em que ficará o RSE dos exercícios orçamentais subsequentes, por força de transferência a partir do Fundo Petrolífero de montante superior ao Rendimento Sustentável Estimado", cumprindo assim o requisito legal, da alínea b) artigo 9.º da Lei do Fundo Petrolífero. No que concerne à alínea c) do mesmo artigo, o "Relatório do Auditor Independente que certifique as estimativas de redução do rendimento sustentável estimado" será enviado com a maior brevidade possível, aguardando-se a certificação do Auditor independente.

Aceite Vossa Excelência a minha mais elevada consideração e estima.

Dili, 22 de Outubro de 2013

Prime Minister  
Democratic Republic of Timor-Leste

**SUBJECT: REQUIREMENT FOR TRANSFERS FROM PETROLEUM FUND**

Excellency,

This report is provided in accordance with Article 8 a) and b) of the Petroleum Fund Law No. 9/2005, of 3<sup>rd</sup> August as amended by Law No. 12/2011, of 28<sup>th</sup> September.

The Estimated Sustainable Income is calculated in accordance with provisions outlined in Schedule 1 of the Petroleum Fund Law.

Estimated Sustainable Income For Financial Year: 2014	<b>Amount (USD)</b> \$632.3 million
Estimated Sustainable Income For preceding Financial Year: 2013	<b>Amount (USD)</b> \$787.0 million

A review of the methodology which the ESI-calculations are based on is included in the Budget 2014.

According to Article 8 c) of the Petroleum Fund Law, the Independent Auditor shall certify the amount of the Estimated Sustainable Income. The certification report is attached.

Yours sincerely,

**SUBJECT: REQUIREMENT FOR TRANSFERS FROM PETROLEUM FUND**

Excellency,

This report is provided in accordance with Article 9 b) of the Petroleum Fund Law No. 9/2005, of 3<sup>rd</sup> August as amended by Law No. 12/2011, of 28<sup>th</sup> September.

As required in Article 9 b), the table below shows the reduction of Estimated Sustainable Income for Fiscal Years commencing after 2014, as a result of the proposed transfer from the Petroleum Fund of an amount in excess of the Estimated Sustainable Income in 2014:

Fiscal Year	Estimated Sustainable Income Withdrawals in 2014	
	\$632.3 million	\$902.9 million
2015	647.1	638.7
2016	663.9	655.3
2017	681.6	672.8
2018	700.0	691.0
2019	718.8	709.5
2020	737.7	728.2
2021	757.2	747.5
2022	777.2	767.2
2023	797.5	787.2
2024	818.1	807.5
2025	839.2	828.4

According to Article 9 c) the Independent Auditor shall certify the estimates of reduction in the Sustainable Income. The certification report is attached.

All calculations have been carried out by technical experts in the Ministry of Finance and with external professional assistance.

Yours sincerely,

  
**Emilia Pires**  
Minister of Finance

Dear Minister

**Report on Factual Findings relating to the estimated reduction in the Estimated Sustainable Income  
(Article 9)**

In accordance with Contract RDTL 83683 and subsequent addenda we have performed certain agreed upon-procedures solely for the purpose of providing a report to the Government of the Democratic Republic of Timor-Leste in accordance with Article 9 (c) of Law 9/2005 *Petroleum Fund Law* as amended by Law 12/2011 *First Amendment to Petroleum Fund Law*. Our engagement was performed in accordance with the International Standard on Related Services (ISRS) 4400 *Engagements to Perform Agreed-upon Procedures Regarding Financial Information*. This report should be read in conjunction with our contract which sets out the basis on which our work was performed.

**Scope of work and statement of responsibility**

At your request and agreement, we performed the procedures set out in the table below. The scope of our work was limited solely to those procedures. You are responsible for determining whether the scope of our work is sufficient for your purposes and we make no representations regarding the sufficiency of these procedures for your purposes. If we were to perform additional procedures, other matters might have come to our attention that would be reported to you.

This report should not be taken to supplant any other enquiries and procedures that may be necessary to satisfy the requirements of the recipients of the report.

The procedures we performed did not constitute a review or an audit of any kind and we have not expressed any opinion or drawn any conclusions on the procedures we have performed. We did not subject the information contained in this report or given to us by the Ministry of Finance to checking or verification procedures except to the extent expressly stated below. This is normal practice when carrying out such limited scope procedures, but contrasts significantly with, for example, an audit. The procedures we performed were not designed to and are not likely to have revealed fraud or misrepresentation by the Ministry of Finance. Accordingly, we cannot accept responsibility for detecting fraud (whether by management or by external parties) or misrepresentation by the management of the Ministry of Finance.

Liability limited by a scheme approved under Professional Standards Legislation.  
Member of Deloitte Touche Tohmatsu Limited

This report is provided solely for your exclusive use and solely for the purpose of satisfying the requirements Article 9 (c) of Law 9/2005 *Petroleum Fund Law* as amended by Law 12/2011 *First Amendment to Petroleum Fund Law*. Our report is not to be used for any other purpose, recited or referred to in any document, copied or made available (in whole or in part) to any other person without our prior written express consent. We accept no duty, responsibility or liability to any other party in connection with the report or this engagement.

#### Procedures and Findings

Procedures	Findings
1. Obtain the underlying calculations which support the report of Government that is to be provided to Parliament pursuant to Article 9(b).	1. The underlying calculations which support the report of Government to be provided to Parliament pursuant to Article 9(b) were obtained from the Ministry of Finance on 7 October 2013.
2. Agree the calculation methodology to the Estimated Sustainable Income calculation for the Fiscal Year Budget 2014 as previously obtained by Deloitte.	2. The calculation methodology was agreed to that of the Estimated Sustainable Income calculation used for the Fiscal Year Budget 2014 as previously obtained by Deloitte.
3. Obtain the value of the proposed Government transfer being an amount in excess of the Estimated Sustainable Income calculated by the Government for purposes of the Fiscal Year Budget 2014 and agree the value to the updated underlying calculation, which incorporates the proposed Government transfer.	3. A Government transfer of US\$902.9 million was advised by the Ministry of Finance to Deloitte and is noted to exceed the Estimated Sustainable Income of US\$632.3 million as previously calculated by the Government for purposes of the Fiscal Year Budget 2014, by US\$270.6 million. The US\$902.9 million was incorporated into the updated underlying calculation.
4. Re-perform the calculation of the estimated reduction in the Estimated Sustainable Income for the Fiscal Years commencing 1 January 2015 that results from the proposed Government transfer from the Petroleum Fund in Fiscal Year 2014.	4. The calculation of the estimated reduction in the Estimated Sustainable Income for future Fiscal Years commencing 1 January 2015 was re-performed without exception. The estimated reduction in the Estimated Sustainable Income in each future year from 2015 to 2025 ranged from US\$8.4 million to US\$10.8 million over the period as set out in Appendix A.
5. Provide a report to Government in accordance with of Law 9/2005 <i>Petroleum Fund Law</i> as amended by Law 12/2011 <i>First Amendment to Petroleum Fund Law</i> .	5. Report herewith.

Yours faithfully

Deloitte Touche Tohmatsu
